ment has adopted a medium-term austerity program that includes cutting government spending, reducing the size of the public sector, decreasing tax evasion, reforming the health care and pension systems, and improving competitiveness through structural reforms to the labor and product markets. Athens, however, faces long-term challenges to push through unpopular reforms in the face of often vocal opposition from the country's powerful labor unions and the general public. Greek labor unions are striking over new austerity measures, but the strikes so far have had a limited impact on the government's will to adopt reforms. An uptick in widespread unrest, however, could challenge the government's ability to implement reforms and meet budget targets, and could also lead to rioting or violence. In April 2010 a leading credit agency assigned Greek debt its lowest possible credit rating; in May, the International Monetary Fund and Eurozone governments provided Greece emergency short- and medium-term loans worth \$147 billion so that the country could make debt repayments to creditors. In exchange for the largest bailout ever assembled, the government announced combined spending cuts and tax increases totaling \$40 billion over three years, on top of the tough austerity measures already taken. Greece, however, struggled to boost revenues and cut spending to meet 2010 targets set by the EU and the IMF, especially after Eurostat—the EU's statistical office—revised upward Greece's deficit and debt numbers for 2009 and 2010. Greece's lenders are calling on Athens to step up efforts in 2011 to increase tax collection, shore up public enterprises, and rein in health spending, and are planning to give Greece more time to repay its EU-IMF loan. Greece responded by introducing major structural reforms, but investors still question whether Greece can sustain fiscal efforts in the face of a bleak economic outlook and public discontent.

the East; some South American cocaine transits or is consumed in Greece; money laundering related to drug trafficking and organized crime

GREENLAND

(PART OF THE KINGDOM OF DENMARK)

INTRODUCTION

Background: Greenland, the world's largest island, is about 81% ice capped. Vikings reached the island in the 10th century from Iceland; Danish colonization began in the 18th century, and Greenland was made an integral part of Denmark in 1953. It joined the European Community (now the EU) with Denmark in 1973 but withdrew in 1985 over a dispute centered on stringent fishing quotas. Greenland was granted self-government in 1979 by the Danish parliament; the law went into effect the following year. Greenland voted in favor of increased self-rule in November 2008 and acquired greater responsibility for internal affairs in June 2009. Denmark, however, continues to exercise control of Greenland's foreign affairs, security, and financial policy in consultation with Greenland's Home Rule Government.

GEOGRAPHY

Location: Northern North America, island between the Arctic Ocean and the North Atlantic Ocean, northeast of Canada
Geographic coordinates: 72 00 N, 40 00 W

National anthem: name: "Nunarput utoqqarsuanngoravit" ("Our Country, Who's Become So Old" also translated as "You Our Ancient Land")

lyrics/music: Henrik LUND/Jonathan PETERSEN

note: adopted 1916; the government also recognizes "Nuna asiilasooq" as a secondary anthem

ECONOMY

Economy—overview: The economy remains critically dependent on exports of shrimp and fish and on a substantial subsidy—about \$650 million in 2009—from the Danish Government, which supplies nearly 60% of government revenues. The public sector, including publicly owned enterprises and the municipalities, plays the dominant role in Greenland's economy. Greenland's GDP contracted about 2% in 2009 as a result of the global economic slowdown. Budget surpluses turned to deficits beginning in 2007 and unemployment has risen. During the last decade the Greenland Home Rule Government (GHRG) pursued conservative fiscal and monetary policies, but public pressure has increased for better schools, health care and retirement systems. The Greenlandic economy has benefited from increasing catches and exports of shrimp, Greenland halibut and, more recently, crabs. Due to Greenland's continued dependence on exports of fish—which account for 82% of exports—the economy remains very

sensitive to foreign developments. International consortia are increasingly active in exploring for hydrocarbon resources off Greenland's western coast, and international studies indicate the potential for oil and gas fields in northern and northeastern Greenland. In May 2007 a US aluminum producer concluded a memorandum of understanding with the Greenland Home Rule Government to build an aluminum smelter and a power generation facility, which takes advantage of Greenland's abundant hydropower potential. Within the area of mining, olivine sand continues to be produced and gold production has resumed in south Greenland. Tourism also offers another avenue of economic growth for Greenland, with increasing numbers of cruise lines now operating in Greenland's western and southern waters during the peak summer tourism season.

GRENADA

INTRODUCTION

Background: Carib Indians inhabited Grenada when COLUMBUS discovered the island in 1498, but it remained uncolonized for more than a century. The French settled Grenada in the 17th century, established sugar estates, and imported large numbers of African slaves. Britain took the island in 1762 and vigorously expanded sugar production. In the 19th century,

cacao eventually surpassed sugar as the main export crop; in the 20th century, nutmeg became the leading export. In 1967, Britain gave Grenada autonomy over its internal affairs. Full independence was attained in 1974 making Grenada one of the smallest independent countries in the Western Hemisphere. Grenada was seized by a Marxist military council on 19 October 1983. Six days later the island was invaded by US forces and those of six other Caribbean nations, which quickly captured the ringleaders and their hundreds of Cuban advisers. Free elections were reinstituted the following year and have continued since that time. Hurricane Ivan struck Grenada in September of 2004 causing severe damage.

Flag description: a rectangle divided diagonally into yellow triangles (top and bottom) and green triangles (hoist side and outer side), with a red border around the flag; there are seven yellow, five-pointed stars with three centered in the top red border, three centered in the bottom red border, and one on a red disk superimposed at the center of the flag; there is also a symbolic nutmeg pod on the hoist-side triangle (Grenada is the world's second-largest producer of nutmeg, after Indonesia); the seven stars stand for the seven administrative divisions, with the central star denoting the capital, St. George; yellow represents the sun and the warmth of the people, green stands for vegetation and agriculture, and red symbolizes harmony, unity, and courage

National anthem: name: "Hail Grenada"

lyrics/music: Irva Merle BAPTISTE/Louis Arnold MASANTO

note: adopted 1974

ECONOMY

Economy—overview: Grenada relies on tourism as its main source of foreign exchange especially since the construction of an international airport in 1985. Hurricanes Ivan (2004) and Emily (2005) severely damaged the agricultural sector—particularly nutmeg and cocoa cultivation—which had been a key driver of economic growth. Grenada has rebounded from the devastating effects of the hurricanes but is now saddled with the debt burden from the rebuilding process. Public debt-to-GDP is nearly 110%, leaving the THOMAS administration limited room to engage in public investments and social spending. Strong performances in construction and manufacturing, together with the development of tourism and an offshore financial industry, have also contributed to growth in national output; however, economic growth was stagnant in 2010 after a sizeable contraction in 2009, because of the global economic slowdown's effects on tourism and remittances.

GUATEMALA

INTRODUCTION

Background: The Mayan civilization flourished in Guatemala and surrounding regions during the first millennium A.D. After almost three centuries as a Spanish

colony, Guatemala won its independence in 1821. During the second half of the 20th century, it experienced a variety of military and civilian governments, as well as a 36-year guerrilla war. In 1996,

the government signed a peace agreement formally ending the conflict, which had left more than 100,000 people dead and had created, by some estimates, some 1 million refugees.

GEOGRAPHY

Location: Central America, bordering the North Pacific Ocean, between El Salvador and Mexico, and bordering the Gulf of Honduras (Caribbean Sea) between Honduras and Belize

Geographic coordinates: 15 30 N, 90 15 W
Map references: Central America and the Caribbean

Area: total: 108,889 sq km

Coastline: 400 km

Maritime claims: territorial sea: 12 nm

exclusive economic zone: 200 nm

continental shelf: 200 m depth or to the depth of exploitation

Climate: tropical; hot, humid in lowlands; cooler in highlands

Terrain: mostly mountains with narrow coastal plains and rolling limestone plateau

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: Volcan Tajumulco 4,211 m

note: highest point in Central America

Natural resources: petroleum, nickel, rare woods, fish, chicle, hydropower

Land use: arable land: 13.22%

per capita: 160 cu m/yr (2000)

Natural hazards: numerous volcanoes in mountains, with occasional violent earthquakes; Caribbean coast extremely susceptible to hurricanes and other tropical storms

volcanism: Guatemala experiences significant volcanic activity in the Sierra Madre range; Santa Maria (elev. 3,772 m) has been deemed a "Decade Volcano" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to its explosive history

and close proximity to human populations; Pacaya (elev. 2,552 m), which erupted in May 2010 causing an ashfall on Guatemala City and prompting evacuations, is one of the country's most active volcanoes; the volcano has frequently been in eruption since 1965; other historically active volcanoes include Acatenango, Almolonga, Atitlan, Fuego, and Tacana

Environment—current issues: deforestation in the Peten rainforest; soil erosion; water pollution

Environment—international agreements: party to: Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands, Whaling

ECONOMY

Economy—overview: Guatemala is the most populous country in Central America with a GDP per capita roughly one-half that of the average for Latin America and the Caribbean. The agricultural sector accounts for nearly 15% of GDP and half of the labor force; key agricultural exports include coffee, sugar, and bananas. The 1996 peace accords, which ended 36 years of civil war, removed a major obstacle to foreign investment, and since then Guatemala has pursued important reforms and macroeconomic stabilization. The Dominican Republic-Central American Free Trade Agreement (CAFTA-DR) entered into force in July 2006 spurring increased investment and diversification of exports, with the largest increases in ethanol and non-traditional agricultural exports. While CAFTA-DR has helped improve the investment climate, concerns over security, the lack of skilled workers and poor infrastructure continue to hamper foreign direct investment. The distribution of income remains highly unequal with the richest 10% of the population accounting for more than 40% of Guatemala's overall consumption. More than half of the population is below the national poverty line and 15% lives in extreme poverty. Poverty among indigenous groups, which make up 38% of the population, averages 76% and extreme poverty rises to 28%. 43% of children under five are chronically malnourished, one of the highest malnutrition rates in the world. President COLOM entered into office with the promise to increase education, healthcare, and rural development, and in April 2008 he inaugurated a conditional cash transfer program, modeled after programs in Brazil and Mexico, that provide financial incentives for poor families to keep their children in school and get regular health check-ups. Given Guatemala's large expatriate community in the United States, it is the top remittance recipient in Central

America, with inflows serving as a primary source of foreign income equivalent to nearly two-thirds of exports or one-tenth of GDP. Economic growth fell in 2009 as export demand from US and other Central American markets fell and foreign investment slowed amid the global recession, but the economy recovered gradually in 2010 and will likely return to more normal growth rates by 2012. President COLOM, in his last year in office, will likely face opposition to economic reform, particularly over a long-delayed tax reform and an IMF-recommended reform to strengthen the banking sector.

TRANSNATIONAL ISSUES

Disputes—international: annual ministerial meetings under the OAS-initiated Agreement on the Framework for Negotiations and Confidence Building Measures continue to address Guatemalan land and maritime claims in Belize and the Caribbean Sea; Guatemala persists in its territorial claim to half of Belize, but agrees to Line of Adjacency to keep Guatemalan squatters out of Belize's forested interior; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States

Refugees and internally displaced persons: IDPs: undetermined (the UN does not estimate there are any IDPs, although some NGOs estimate over 200,000 IDPs as a result of over three decades of internal conflict that ended in 1996) (2007)

Trafficking in persons: current situation: Guatemala is a source, transit, and destination country for Guatemalans and Central Americans trafficked for the purposes of commercial sexual exploitation and forced labor; human trafficking is a significant and growing problem in the country;

Guatemalan women and children are trafficked within the country for commercial sexual exploitation, primarily to Mexico and the United States; Guatemalan men, women, and children are also trafficked within the country, and to Mexico and the United States, for forced labor

tier rating: Tier 2 Watch List—for a second consecutive year, Guatemala is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat trafficking in persons, particularly with respect to ensuring that trafficking offenders are appropriately prosecuted for their crimes; while prosecutors initiated trafficking prosecutions, they continued to face problems in court with application of Guatemala's comprehensive anti-trafficking law; the government made modest improvements to its protection efforts, but assistance remained inadequate overall in 2007 (2008)

Illicit drugs: major transit country for cocaine and heroin; in 2005, cultivated 100 hectares of opium poppy after reemerging as a potential source of opium in 2004; potential production of less than 1 metric ton of pure heroin; marijuana cultivation for mostly domestic consumption; proximity to Mexico makes Guatemala a major staging area for drugs (particularly for cocaine); money laundering is a serious problem; corruption is a major problem

**INTRODUCTION**

Background: Guernsey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy, which held sway in both France and England. The islands were the only British soil occupied by German troops in World War II. Guernsey is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government is constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Financial services—banking, fund management, insurance—account for about 23% of employment and about 55% of total income in this tiny, prosperous Channel Island economy. Tourism, manufacturing, and horticulture, mainly tomatoes and cut flowers, have been declining. Financial services, construction, retail, and the public sector have been growing. Light tax and death duties make Guernsey a popular tax haven. The evolving economic integration of the EU nations is changing the environment under which Guernsey operates.

GUINEA

INTRODUCTION

Background: Guinea has had a history of authoritarian rule since gaining its independence from France in 1958. Lansana CONTE came to power in 1984 when the military seized the government after the death of the first president, Sekou TOURE. Guinea did not hold democratic elections until 1993 when Gen. CONTE (head of the military government) was elected president of the civilian government. He was reelected in 1998 and again in 2003, though all the polls were marred by irregularities. History repeated itself in December 2008 when following President CONTE's death, Capt. Moussa Dadis CAMARA led a military coup, seizing power and suspending the constitution. His unwillingness to yield to domestic and international pressure to step down led to heightened political tensions that culminated in September 2009 when presidential guards opened fire on an opposition rally killing more than 150 people, and in early December 2009 when CAMARA was wounded in an assassination attempt and evacuated to Morocco and subsequently to Burkina Faso. A transitional government led by General Sekouba KONATE held democratic elections in 2010 and Alpha CONDE was elected president in the country's first free and fair elections since independence.

ECONOMY

Economy—overview: Guinea is a poor country that possesses major mineral, hydropower, and agricultural resources. The country has almost half of the world's bauxite reserves and significant iron ore, gold, and diamond reserves. However, Guinea has been unable to profit from this potential, as rampant corruption, dilapidated electricity and other degraded infrastructure, and political uncertainty have drained investor confidence. In the time since a 2008 coup following the death of long-term President Lansana CONTE, international donors, including the G-8, the IMF, and the World Bank, have significantly curtailed their development programs. Throughout 2009, policies of the ruling military junta severely weakened the economy. The junta leaders spent and printed money at an accelerated rate, driving inflation and debt to perilously high levels. In early 2010, the junta collapsed and was replaced by a Transition Government, which ceded power in December 2010 to the country's first-ever democratically elected president, Alpha CONDE. International assistance and investment are expected to return to Guinea, but the levels will depend upon the ability of the new government to combat corruption and reform its banking system. IMF and World Bank programs will be especially critical as Guinea attempts to gain debt relief. Since the 2009 global economic downturn, the price and value of bauxite and alumina exports has steadily risen. Export levels will likely continue to grow as investor confidence returns. International investors have expressed keen interest in Guinea's vast iron ore reserves, which could further propel the country's growth.

TRANSNATIONAL ISSUES

Disputes—international: conflicts among rebel groups, warlords, and youth gangs in

neighboring states have spilled over into Guinea resulting in domestic instability; Sierra Leone considers Guinea's definition of the flood plain limits to define the left bank boundary of the Makona and Moa rivers excessive and protests Guinea's continued occupation of these lands, including the hamlet of Yenga, occupied since 1998

Refugees and internally displaced persons: refugees (country of origin): 21,856 (Liberia); 5,259 (Sierra Leone); 3,900 (Cote d'Ivoire)
IDPs: 19,000 (cross-border incursions from Cote d'Ivoire, Liberia, Sierra Leone) (2007)

Trafficking in persons: current situation: Guinea is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; the majority of victims are children, and internal trafficking is more prevalent than transnational trafficking; within the country, girls are trafficked primarily for domestic servitude and sexual exploitation, while boys are trafficked for forced agricultural labor, and as forced beggars, street vendors, shoe shiners, and laborers in gold and diamond mines; some Guinean men are also trafficked for agricultural labor within Guinea; transnationally, girls are trafficked into Guinea

for domestic servitude and likely also for sexual exploitation

tier rating: Tier 2 Watch List—Guinea is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to eliminate trafficking over 2006; Guinea demonstrated minimal law enforcement efforts for a second year in a row, while protection efforts diminished over efforts in 2006; the government did not report any trafficking convictions in 2007; due to a lack of resources, the government does not provide shelter services for trafficking victims; the government took no measures to reduce the demand for commercial sexual exploitation (2008)

GUINEA-BISSAU

INTRODUCTION

Background: Since independence from Portugal in 1974, Guinea-Bissau has experienced considerable political and military upheaval. In 1980, a military coup established authoritarian dictator Joao Bernardo 'Nino' VIEIRA as president. Despite setting a path to a market economy and multiparty system, VIEIRA's regime was characterized by the suppression of political opposition and the purging of political rivals. Several coup attempts through the 1980s and early 1990s failed to unseat him. In 1994 VIEIRA was elected president in the country's first free elections. A military mutiny and resulting civil war in 1998 eventually led to VIEIRA's ouster in May 1999. In February 2000, a transitional government turned over power to opposition leader Kumba YALA after he was elected president in transparent polling. In September 2003, after only three years in office, YALA was ousted by the military in a bloodless coup, and businessman Henrique ROSA was sworn in as interim president. In 2005, former President VIEIRA was re-elected president pledging to pursue economic development and national reconciliation; he was assassinated in March 2009. Malam Bacai SANHA was elected in an emergency election held in June 2009.

Economy-Bissau

Economy—overview: One of the poorest countries in the world, Guinea-Bissau's legal economy depends mainly on farming and fishing, but trafficking narcotics is probably the most lucrative trade. Cashew crops have increased remarkably in recent years. Guinea-Bissau exports fish and seafood along with small amounts of peanuts, palm kernels, and timber. Rice is the major crop and staple food. However, intermittent fighting between Senegalese-backed government troops and a military junta destroyed much of the country's infrastructure and caused widespread damage to the economy

in 1998; the civil war led to a 28% drop in GDP that year, with partial recovery in 1999-2002. In December 2003, the World Bank, IMF, and UNDP were forced to step in to provide emergency budgetary support in the amount of \$107 million for 2004, representing over 80% of the total national budget. The combination of limited economic prospects, a weak and faction-ridden government, and favorable geography have made this West African country a way station for drugs bound for Europe.

TRANSNATIONAL ISSUES

Disputes—international: in 2006, political instability within Senegal's Casamance region resulted in thousands of Senegalese refugees, cross-border raids, and arms smuggling into Guinea-Bissau

Refugees and internally displaced persons: refugees (country of origin): 7,454 (Senegal) (2007)

Trafficking in persons: current situation: Guinea-Bissau is a source country for children trafficked primarily for forced begging

and forced agricultural labor to other West African countries

tier rating: Tier 2 Watch List—for the second year in a row, Guinea-Bissau is on the Tier 2 Watch List for its failure to combat severe forms of trafficking in persons, as evidenced by the continued

failure to pass an anti-trafficking law and inadequate efforts to investigate or prosecute trafficking crimes or convict and punish trafficking offenders (2008)

illicit drugs: increasingly important transit country for South American

cocaine enroute to Europe; enabling environment for trafficker operations thanks to pervasive corruption; archipelago-like geography around the capital facilitates drug smuggling

GUYANA

INTRODUCTION

Background: Originally a Dutch colony in the 17th century, by 1815 Guyana had become a British possession. The abolition of slavery led to black settlement of urban areas and the importation of indentured servants from India to work the sugar plantations. This ethnocultural divide has persisted and has led to turbulent politics. Guyana achieved independence from the UK in 1966, and since then it has been ruled mostly by socialist-oriented governments. In 1992, Cheddi JAGAN was elected president in what is considered the country's first free and fair election since independence. After his death five years later, his wife, Janet JAGAN, became president but resigned in 1999 due to poor health. Her successor, Bharrat JAGDEO, was reelected in 2001 and again in 2006.

ECONOMY

Economy—overview: The Guyanese economy exhibited moderate economic growth in recent years and is based largely on agriculture and extractive industries. The economy is heavily dependent upon the export of six commodities—sugar, gold, bauxite, shrimp, timber, and rice—which represent nearly 60% of the country's GDP and are highly susceptible to adverse weather conditions and fluctuations in commodity prices. Guyana's entrance into the Caricom Single Market and Economy (CSME) in January 2006 has broadened the country's export market, primarily in the raw materials sector. Economic recovery since a 2005 flood-related contraction was buoyed by increases in remittances and foreign direct investment in the sugar and rice industries as well as the mining sector. Chronic problems include a shortage of skilled labor and a deficient infrastructure. The government is juggling a sizable external debt against the urgent need for expanded public investment. In March 2007, the Inter-American Development Bank, Guyana's principal donor, canceled Guyana's nearly \$470 million debt, equivalent to nearly 48% of GDP, which along with other Highly Indebted Poor Country (HIPC) debt forgiveness brought the debt-to-GDP ratio down from 183% in 2006 to 120% in 2007. Guyana became heavily indebted as a result of the inward-looking, state-led development model pursued in the 1970s and 1980s. Growth slowed in 2009-10 as a result of the world recession. The slowdown in the domestic economy and lower import costs helped to narrow the country's current account deficit, despite generally lower earnings from exports.

TRANSNATIONAL ISSUES

Disputes—international: all of the area west of the Essequibo River is claimed by Venezuela preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting

claims before UNCLOS that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks arbitration under provisions of the UN Convention on the Law of the Sea (UNCLOS) to resolve the long-standing dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Trafficking in persons: current situation: Guyana is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; most

trafficking appears to take place in remote mining camps in the country's interior; some women and girls are trafficked from northern Brazil; reporting from other nations suggests Guyanese women and girls are trafficked for sexual exploitation to neighboring countries and Guyanese men and boys are subject to labor exploitation in construction and agriculture; trafficking victims from Suriname, Brazil, and Venezuela transit Guyana en route to Caribbean destinations

tier rating: Tier 2 Watch List—for a second consecutive year, Guyana is on the Tier 2 Watch List for failing to provide evidence of increasing efforts to combat trafficking, particularly in the area of law enforcement

actions against trafficking offenders; the government has yet to produce an anti-trafficking conviction under the comprehensive Combating of Trafficking in Persons Act, which became law in 2005; the government operates no shelters for trafficking victims, but did include limited funding for anti-trafficking NGOs in its 2008 budget; the government did not make any effort to reduce demand for commercial sex acts during 2007 (2008)

Illicit drugs: transshipment point for narcotics from South America—primarily Venezuela—to Europe and the US; producer of cannabis; rising money laundering related to drug trafficking and human smuggling

HAITI

INTRODUCTION

Background: The native Taino Amerindians—who inhabited the island of Hispaniola when it was discovered by COLUMBUS in 1492—were virtually annihilated by Spanish settlers within 25 years. In the early 17th century, the French established a presence on Hispaniola. In 1697, Spain ceded to the French the western third of the island, which later became Haiti. The French colony, based on forestry and sugar-related industries, became one of the wealthiest in the Caribbean but only through the heavy importation of African slaves and considerable environmental degradation. In the late 18th century, Haiti's nearly half million slaves revolted under Toussaint L'OUVREURE. After a prolonged struggle, Haiti became the first black republic to declare independence in 1804. The poorest country in the Western Hemisphere, Haiti has been plagued by political violence for most of its history. After an armed rebellion led to the forced resignation and exile of President Jean-Bertrand ARISTIDE in February 2004, an interim government took office to organize new elections under the auspices of the United Nations Stabilization Mission in Haiti (MINUSTAH). Continued violence and technical delays prompted repeated postponements, but Haiti finally did inaugurate a democratically elected president and parliament in May of 2006. A massive magnitude 7.0 earthquake struck Haiti in January 2010 with an epicenter about 15 km southwest of the capital, Port-au-Prince. An estimated 2 million people lived within the zone of heavy to moderate structural damage. The earthquake was assessed as the worst in this region over the last 200 years and massive international assistance will be required to help the country recover.

ECONOMY

Economy—overview: Haiti is a free market economy that enjoys the advantages of low labor costs and tariff-free access to the US for many of its exports. Poverty, corruption, and poor access to education for much of the population are among Haiti's most serious disadvantages. Over the longer term, Haiti needs to create jobs for its young workforce and to build institutional capacity. Haiti's economy suffered a severe setback when a 7.0 magnitude earthquake destroyed much of its capital city, Port-au-Prince, and neighboring areas in January 2010. Already the poorest country in the Western Hemisphere with 80% of the population living under the poverty line and 54% in abject poverty, the damage to Port-au-Prince caused the country's GDP to contract an estimated 5.1% in 2010. Two-thirds of all Haitians depend on the agricultural sector, mainly small-scale subsistence farming, and remain vulnerable to damage from frequent natural disasters, exacerbated by the country's widespread deforestation. US economic engagement under the Haitian Hemispheric Opportunity through Partnership Encouragement

(HOPE) Act, passed in December 2006, has boosted apparel exports and investment by providing duty-free access to the US. Congress voted in 2010 to extend the legislation until 2020 under the Haitian Economic Lift Act (HELP); the apparel sector accounts for three-quarters of Haitian exports and nearly one-tenth of GDP. Remittances are the primary source of foreign exchange, equaling nearly 20% of GDP and more than twice the earnings from exports. Haiti suffers from a lack of investment, partly because of limited infrastructure and a lack of security. In 2005, Haiti paid its arrears to the World Bank, paving the way for reengagement with the Bank. Haiti received debt forgiveness for over \$1 billion through the Highly-Indebted Poor Country (HIPC) initiative in mis-2009. The remainder of its outstanding external debt was cancelled by donor countries in early 2010 but has since risen to about \$400 million. The government relies on formal international economic assistance for fiscal sustainability, with over half of its annual budget coming from outside sources.

HOLY SEE (VATICAN CITY)**INTRODUCTION**

Background: Popes in their secular role ruled portions of the Italian peninsula for more than a thousand years until the mid 19th century, when many of the Papal States were seized by the newly united Kingdom of Italy. In 1870, the pope's holdings were further circumscribed when Rome itself was annexed. Disputes between a series of "prisoner" popes and Italy were resolved in 1929 by three Lateran Treaties, which established the independent state of Vatican City and granted Roman Catholicism special status in Italy. In 1984, a concordat between the Holy See and Italy modified certain of the earlier treaty provisions, including the primacy of Roman Catholicism as the Italian state religion. Present concerns of the Holy See include religious freedom, international development, the environment, the Middle East, China, the decline of religion in Europe, terrorism, interreligious dialogue and reconciliation, and the application of church doctrine in an era of rapid change and globalization. About 1 billion people worldwide profess the Catholic faith.

lyrics/music: Raffaello LAVAGNA/Charles Francois GOUNOD

note: adopted 1950; although used as such, "Inno e Marcia Pontificale" is not officially a national anthem but rather a hymn meant to appeal to Roman Catholics throughout the world

ECONOMY

Economy—overview: The Holy See is supported financially by a variety of sources, including investments, real estate income, and donations from Catholic individuals, dioceses, and institutions; these help fund the Roman Curia (Vatican bureaucracy), diplomatic missions, and media outlets. The separate Vatican City State budget includes the Vatican museums and post office and is supported financially by the sale of stamps, coins, medals, and tourist mementos; by fees for admission to museums; and by publications sales. Moreover, an annual collection taken up in dioceses and direct donations go to a non-budgetary fund known as Peter's Pence, which is used directly by the Pope for charity, disaster relief, and aid to churches in developing nations. The incomes and living standards of lay workers are comparable to those of counterparts who work in the city of Rome.

HONDURAS

INTRODUCTION

Background: Once part of Spain's vast empire in the New World, Honduras became an independent nation in 1821. After two and a half decades of mostly military rule, a freely elected civilian government came to power in 1982. During the 1980s, Honduras proved a haven for anti-Sandinista contras fighting

the Marxist Nicaraguan Government and an ally to Salvadoran Government forces fighting leftist guerrillas. The country was devastated by Hurricane Mitch in 1998, which killed about 5,600 people and caused approximately \$2 billion in damage. Since then, the economy has slowly rebounded.

GEOGRAPHY

Natural hazards: frequent, but generally mild, earthquakes; extremely susceptible to damaging hurricanes and floods along the Caribbean coast

Environment—current issues: urban population expanding; deforestation results from logging and the clearing of land for agricultural purposes; further land degradation and soil erosion hastened by uncontrolled development and improper land use practices such as farming of marginal lands; mining activities polluting Lago de Yojoa (the country's largest source of fresh water), as well as several rivers and streams, with heavy metals

ECONOMY

Economy—overview: Honduras, the second poorest country in Central America, suffers from extraordinarily unequal distribution of income, as well as high underemployment. While historically dependent on the export of bananas and coffee, Honduras has diversified its export base to include apparel and automobile wire harnessing. Nearly half of Honduras's economic activity is directly tied to the US, with exports to the US accounting for 30% of GDP and remittances for another 20%. The US-Central America Free Trade Agreement (CAFTA) came into force in 2006 and has helped foster foreign direct investment, but physical and political insecurity, as well as crime and perceptions of corruption, may deter potential investors; about 70% of FDI is from US firms. The economy registered sluggish economic growth in 2010, insufficient to improve living standards for the nearly 60% of the population in poverty. The LOBO administration inherited a difficult fiscal position with off-budget debts accrued in previous administrations and government salaries nearly equivalent to tax collections. His government has displayed a commitment to improving tax collection and cutting expenditures, and attracting foreign investment. This enabled Tegucigalpa to secure an IMF Precautionary Stand-By agreement in October 2010. The IMF agreement has helped renew multilateral and bilateral donor confidence in Honduras following the ZELAYA administration's economic mismanagement and the 2009 coup.

TRANSNATIONAL ISSUES

Disputes—international: International Court of Justice (ICJ) ruled on the delimitation of “bolsones” (disputed areas) along the El Salvador-Honduras border in 1992 with final settlement by the parties in 2006 after an Organization of American States (OAS) survey and a further ICJ ruling in 2003; the 1992 ICJ ruling advised a tripartite resolution to a maritime boundary in the Gulf of Fonseca with consideration of Honduran access to the Pacific; El Salvador continues to claim tiny Conejo Island, not mentioned in the ICJ ruling, off Honduras in the Gulf of Fonseca; Honduras claims the Belizean-administered Sapodilla Cays off the coast of Belize in its constitution, but agreed to a joint ecological park around the cays should Guatemala consent to a maritime corridor in the Caribbean under the OAS-sponsored 2002 Belize-Guatemala Differendum; memorials and counter-memorials were filed by the parties in Nicaragua’s 1999 and 2001 proceedings against Honduras and Colombia at the ICJ over the maritime boundary and territorial claims in the western Caribbean Sea—final public hearings are scheduled for 2007

Illicit drugs: transshipment point for drugs and narcotics; illicit producer of cannabis, cultivated on small plots and used principally for local consumption; corruption is a major problem; some money-laundering activity

HONG KONG

(SPECIAL ADMINISTRATIVE REGION OF CHINA)

INTRODUCTION

Background: Occupied by the UK in 1841, Hong Kong was formally ceded by China the following year; various adjacent lands were added later in the 19th century. Pursuant to an agreement signed by China and the UK on 19 December

1984, Hong Kong became the Hong Kong Special Administrative Region (SAR) of the People’s Republic of China on 1 July 1997. In this agreement, China promised that, under its “one country, two systems” formula, China’s socialist economic system would not be imposed on Hong Kong and that Hong Kong would enjoy a high degree

of autonomy in all matters except foreign and defense affairs for the next 50 years.

Flag description: red with a stylized, white, five-petal Bauhinia flower in the center; each petal contains a small, red, five-pointed star in its middle; the red color is the same as that on the Chinese flag and

represents the motherland; the fragrant Bauhinia—developed in Hong Kong the late 19th century—has come to symbolize the region; the five stars echo those on the flag of China

National anthem: *note*: as a Special Administrative Region of China, "Yiyong-gun Jinxingqu" is official (see China)

ECONOMY

Economy—overview: Hong Kong has a free market economy highly dependent on international trade and finance—the value of goods and services trade, including the sizable share of re-exports, is about four times GDP. Hong Kong's open economy left it exposed to the global economic slowdown, but its increasing integration with China, through trade, tourism, and financial links, helped it recover more quickly than many observers anticipated. The Hong Kong government is promoting the Special Administrative Region (SAR) as the site for Chinese renminbi (RMB) internationalization. Hong Kong residents are allowed to establish RMB-denominated savings accounts; RMB-denominated corporate and Chinese government bonds have been issued in Hong Kong; and RMB trade settlement is allowed. The territory far exceeded the RMB conversion quota set by Beijing for trade settlements in 2010 due to the growth of earnings from exports to the mainland. RMB deposits grew to roughly 4.6% of total system deposits in Hong Kong by the end of 2010, an increase of over 392% since the beginning of the year. The government is pursuing efforts to introduce additional use of RMB in Hong Kong financial markets and is seeking to expand the RMB quota for 2011. The mainland has long been Hong Kong's largest trading partner, accounting for about half of Hong Kong's exports by value. Hong Kong's natural resources are limited, and food and raw materials must be imported. As a result of China's easing of travel restrictions, the number of mainland tourists to the territory has surged from 4.5 million in 2001 to 22.5 million in 2010, outnumbering visitors from all other countries combined. Hong Kong has also established itself as the premier stock market for Chinese firms seeking to list abroad. In 2010 mainland Chinese companies constituted about 19% of the firms listed on the Hong Kong Stock Exchange and accounted for 62% of the Exchange's market capitalization. During the past decade, as Hong Kong's manufacturing industry moved to the mainland, its service industry has grown rapidly and in 2009 accounted for more than 90% of the territory's GDP. GDP growth averaged a strong 3.8% from 1989 to 2010. Hong Kong's GDP fell in 2009 as a result of the global financial crisis, but a recovery began in third quarter 2009, and the economy grew nearly 6.8% in 2010. The Hong Kong government adopted several temporary fiscal policy support measures in response to the crisis that it may discontinue if strong growth is sustained. Credit expan-

sion and tight housing supply conditions caused Hong Kong property prices to rise rapidly in 2010, and some lower income segments of the population are increasingly unable to afford adequate housing. Hong Kong continues to link its currency closely to the US dollar, maintaining an arrangement established in 1983.

HUNGARY

INTRODUCTION

Background: Hungary became a Christian kingdom in A.D. 1000 and for many centuries served as a bulwark against Ottoman Turkish expansion in Europe. The kingdom eventually became part of the polyglot Austro-Hungarian Empire, which collapsed during World War I. The country fell under Communist rule following World War II. In 1956, a revolt and an announced withdrawal from the Warsaw Pact were met with a massive military intervention by Moscow. Under the leadership of Janos KADAR in 1968, Hungary began liberalizing its economy, introducing so-called "Goulash Communism." Hungary held its first multiparty elections in 1990 and initiated a free market economy. It joined NATO in 1999 and the EU five years later. In 2011, Hungary assumed the six-month rotating presidency of the EU for the first time.

Flag description: three equal horizontal bands of red (top), white, and green; the flag dates to the national movement of the 18th and 19th centuries, and fuses the medieval colors of the Hungarian coat of arms with the revolutionary tricolor form of the French flag; folklore attributes virtues to the colors: red for strength, white for faithfulness, and green for hope; alternatively, the red is seen as being for the blood spilled in defense of the land, white for freedom, and green for the pasturelands that make up so much of the country

National anthem:

name: "Himnusz" (Hymn)

lyrics/music: Ferenc KOLCSEY/Ferenc ERKEL

note: adopted 1844; the anthem is also known as "Isten, add meg a magyart" (God, Bless the Hungarians)

ECONOMY

Economy—overview: Hungary has made the transition from a centrally planned to a market economy, with a per capita income nearly two-thirds that of the EU-25 average. The private sector accounts for more than 80% of GDP. Foreign ownership of and investment in Hungarian firms are widespread, with cumulative foreign direct investment worth more than \$70 billion. The government's austerity measures, imposed since late 2006, have reduced the budget deficit from over 9% of GDP in 2006 to 3.2% in 2010, with a target of less than 3% in 2011. Hungary's impending inability to service its short-term debt—brought on by the global financial crisis in late 2008—led Budapest to obtain an IMF/EU/World Bank-arranged financial assistance package worth over \$25 billion. The global economic downturn, declining exports, and low domestic consumption and fixed asset accumulation, dampened by government austerity measures, resulted in an economic contraction of 6.3% in 2009. In 2010 the new government implemented a number of changes including cutting business and personal income taxes, but imposed "crisis taxes" on

financial institutions, energy and telecom companies, and retailers. The economy rebounded in 2010 with a big boost from exports, especially to Germany, and growth of more than 2.5% is expected in 2011. Unemployment remained high, at more than 10% in 2010.

TRANSNATIONAL ISSUES

Disputes—international: bilateral govern-
ment, legal, technical and economic
working group negotiations continue in
2006 with Slovakia over Hungary's failure
to complete its portion of the Gabcikovo-
Nagymaros hydroelectric dam project along
the Danube; as a member state that forms
part of the EU's external border, Hungary
has implemented the strict Schengen
border rules

Illicit drugs: transshipment point for
Southwest Asian heroin and cannabis
and for South American cocaine destined
for Western Europe; limited producer
of precursor chemicals, particularly for
amphetamine and methamphetamine;
efforts to counter money laundering,
related to organized crime and drug traf-
ficking are improving but remain vulner-
able; significant consumer of ecstasy

ICELAND

INTRODUCTION

Background: Settled by Norwegian and Celtic (Scottish and Irish) immigrants during the late 9th and 10th centuries A.D., Iceland boasts the world's oldest functioning legislative assembly, the Althing, established in 930. Independent for over 300 years, Iceland was subsequently ruled by Norway and Denmark. Fallout from the Askja volcano of 1875 devastated the Icelandic economy and caused widespread famine. Over the next quarter century, 20% of the island's population emigrated, mostly to Canada and the US. Limited home rule from Denmark was granted in 1874 and complete independence attained in 1944. The second half of the 20th century saw substantial economic growth driven primarily by the fishing industry. The economy diversified greatly after the country joined the European Economic Area in 1994, but Iceland was especially hard hit by the global financial crisis in the years following 2008. Literacy, longevity, and social cohesion are first rate by world standards.

GEOGRAPHY

Location: Northern Europe, island between the Greenland Sea and the North Atlantic Ocean, northwest of the United Kingdom
Geographic coordinates: 65 00 N, 18 00 W
Map references: Europe
Area: total: 103,000 sq km
country comparison to the world: 107
 land: 100,250 sq km

Area—comparative: slightly smaller than Kentucky
Land boundaries: 0 km
Coastline: 4,970 km
Maritime claims: territorial sea: 12 nm
 exclusive economic zone: 200 nm
 continental shelf: 200 nm or to the edge of the continental margin
Climate: temperate; moderated by North Atlantic Current; mild, windy winters; damp, cool summers
Terrain: mostly plateau interspersed with mountain peaks, icefields; coast deeply indented by bays and fiords
Elevation extremes: lowest point: Atlantic Ocean 0 m

highest point: Hvannadalshnukur 2,110 m (at Vatnajökull glacier)

Natural resources: fish, hydropower, geothermal power, diatomite

Land use: arable land: 0.07%

Total renewable water resources: 170 cu km (2005)

Freshwater withdrawal (domestic/industrial/agricultural): total: 0.17 cu km/yr (34%/66%/0%)

per capita: 567 cu m/yr (2003)

Natural hazards: earthquakes and volcanic activity

volcanism: Iceland, situated on top of a hotspot, experiences severe volcanic activity; Eyjafjallajökull (elev. 1,666 m) erupted in 2010, sending ash high into the atmosphere and seriously disrupting European air traffic; scientists continue to monitor nearby Katla (elev. 1,512 m), which has a high probability of eruption in the very near future, potentially disrupting air traffic; Grimsvotn and Hekla are Iceland's most frequently active volcanoes; other historically active volcanoes include Askja, Bardarbunga, Brennisteinsfjoll, Esjufjoll, Hengill, Krafla, Krisuvik, Kverkfjoll, Oraefajökull, Reykjanes, Torfajökull, and Vestmannaeyjar

Environment—current issues: water pollution from fertilizer runoff; inadequate wastewater treatment

Environment—international agreements: party to: Air Pollution, Air Pollution-Persistent Organic Pollutants, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Hazardous Wastes, Kyoto Protocol, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Transboundary Air Pollution, Wetlands, Whaling

signed, but not ratified: Environmental Modification, Marine Life Conservation

Geography—note: strategic location between Greenland and Europe; westernmost European country; Reykjavik is the northernmost national capital in the world; more land covered by glaciers than in all of continental Europe

ECONOMY

Economy—overview: Iceland's Scandinavian-type social-market economy combines a capitalist structure and free-market principles with an extensive welfare system. Prior to the 2008 crisis, Iceland had achieved high growth, low unemployment, and a remarkably even distribution of income. The economy depends heavily on the fishing industry, which provides

40% of export earnings, more than 12% of GDP, and employs 7% of the work force. It remains sensitive to declining fish stocks as well as to fluctuations in world prices for its main exports: fish and fish products, aluminum, and ferrosilicon. Iceland's economy has been diversifying into manufacturing and service industries in the last decade, particularly within the fields of software production, biotechnology, and tourism. Abundant geothermal and hydro-power sources have attracted substantial foreign investment in the aluminum sector and boosted economic growth, although the financial crisis has put several investment projects on hold. Much of Iceland's economic growth in recent years came as the result of a boom in domestic demand following the rapid expansion of the country's financial sector. Domestic banks expanded aggressively in foreign markets, and consumers and businesses borrowed heavily in foreign currencies, following the privatization of the banking sector in the early 2000s. Worsening global financial conditions throughout 2008 resulted in a sharp depreciation of the krona vis-a-vis other major currencies. The foreign exposure of Icelandic banks, whose loans and other assets totaled more than 10 times the country's GDP, became unsustainable. Iceland's three largest banks collapsed in late 2008. The country secured over \$10 billion in loans from the IMF and other countries to stabilize its currency and financial sector, and to back government guarantees for foreign deposits in Icelandic banks. GDP fell 6.8% in 2009, and unemployment peaked at 9.4% in February 2009. GDP fell 3.4% in 2010. Since the collapse of Iceland's financial sector, government economic priorities have included: stabilizing the krona, reducing Iceland's high budget deficit, containing inflation, restructuring the financial sector, and diversifying the economy. Three new banks were established to take over the domestic assets of the collapsed banks. Two of them have foreign majority ownership, while the State holds a majority of the shares of the third. British and Dutch authorities have pressed claims totaling over \$5 billion against Iceland to compensate their citizens for losses suffered on deposits held in the failed Icelandic bank, Landsbanki Islands. Iceland agreed to new terms with the UK and the Netherlands to compensate British and Dutch depositors, but the agreement must first be approved by the Icelandic President. Iceland began accession negotiations with the EU in July 2010; however, public support has dropped substantially because of concern about losing control over fishing resources and in reaction to measures taken by Brussels during the ongoing Eurozone crisis.

INDIA

INTRODUCTION

Background: The Indus Valley civilization, one of the world's oldest, flourished during the 3rd and 2nd millennia B.C. and extended into northwestern India. Aryan tribes from the northwest infiltrated onto the Indian subcontinent about 1500 B.C.; their merger with the earlier Dravidian inhabitants created the classical Indian culture. The Maurya Empire of the 4th and 3rd centuries B.C.—which reached its zenith under ASHOKA—united much of South Asia. The Golden Age ushered in by the Gupta dynasty (4th to 6th centuries A.D.) saw a flowering of Indian science, art, and culture. Islam spread across the subcontinent over a period of 700 years. In the 10th and 11th centuries, Turks and Afghans invaded India and established the Delhi Sultanate. In the early 16th century, the Emperor BABUR established the Mughal Dynasty which ruled India for more than three centuries. European explorers began establishing footholds in India during the 16th century. By the 19th century, Great Britain had become the dominant political power on the subcontinent. The British Indian Army played a vital role in both World Wars. Nonviolent resistance to British rule, led by Mohandas GANDHI and Jawaharlal NEHRU, eventually brought about independence in 1947. Communal violence led to the subcontinent's bloody partition, which resulted in the creation of two separate states, India and Pakistan. The two countries have fought three wars

since independence, the last of which in 1971 resulted in East Pakistan becoming the separate nation of Bangladesh. India's nuclear weapons tests in 1998 caused Pakistan to conduct its own tests that same year. In November 2008, terrorists allegedly originating from Pakistan conducted a series of coordinated attacks in Mumbai, India's financial capital. Despite pressing problems such as significant overpopulation, environmental degradation, extensive poverty, and widespread corruption, rapid economic development is fueling India's rise on the world stage. In January 2011, India assumed a nonpermanent seat in the UN Security Council for the 2011–12 term.

ECONOMY

Economy—overview: India is developing into an open-market economy, yet traces of its past autarkic policies remain. Economic liberalization, including industrial deregulation, privatization of state-owned enterprises, and reduced controls on foreign trade and investment, began in the early 1990s and has served to accelerate the country's growth, which has averaged more than 7% per year since 1997. India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly more than half of the work force is in agriculture, but services are the major source of economic growth, accounting for more than half of India's output, with only one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services and software workers. In 2010, the Indian economy rebounded robustly from the global financial crisis—in large part because of strong domestic demand—and growth exceeded 8% year-on-year in real terms. Merchandise exports, which account for about 15% of GDP, returned to pre-financial crisis levels. An industrial expansion and high food prices, resulting from the combined effects of the weak 2009 monsoon and inefficiencies in the government's food distribution system, fueled inflation which peaked at about 11% in the first half of 2010, but has gradually decreased to single digits following a series of central bank interest rate hikes. In 2010 New Delhi reduced subsidies for fuel and fertilizers, sold a small percentage of its shares in some state-owned enterprises and auctioned off rights to radio bandwidth for 3G telecommunications in part to lower the government's deficit. The Indian Government seeks to reduce its budget deficit to 5.5% of GDP in FY 2010-11, down from 6.8% in the previous fiscal year. India's long term challenges include widespread poverty, inadequate physical and social infrastructure, limited non-agricultural employment opportunities, insufficient access to quality basic and higher education, and accommodating rural-to-urban migration.

TRANSNATIONAL ISSUES

Disputes—international: since China and India launched a security and foreign policy dialogue in 2005, consolidated discussions related to the dispute over most of their rugged, militarized boundary, regional nuclear proliferation, Indian claims that China transferred missiles to Pakistan, and other matters continue; various talks and confidence-building measures have cautiously begun to defuse tensions over Kashmir, particularly since the October 2005 earthquake in the region; Kashmir nevertheless remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); India and Pakistan have maintained the 2004 cease fire in Kashmir and initiated discussions on defusing the armed stand-off in the Siachen glacier region; Pakistan protests India's fencing the highly militarized Line of Control and construction of the Baglihar Dam on the Chenab River in Jammu and Kashmir, which is part of the larger dispute on water sharing of the Indus River and its tributaries; UN Military Observer Group in India and Pakistan (UNMOGIP) has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964;

to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show its Junagadh claim in Indian Gujarat State; discussions with Bangladesh remain stalled to delimit a small section of river boundary, to exchange territory for 51 Bangladeshi exclaves in India and 111 Indian exclaves in Bangladesh, to allocate divided villages, and to stop illegal cross-border trade, migration, violence, and transit of terrorists through the porous border; Bangladesh protests India's fencing and walling-off high-traffic sections of the porous boundary; a joint Bangladesh-India boundary commission agreed to fully demarcate the Bangladesh-India boundary in the Dhubri-Kruigram sector; Bangladesh referred its maritime boundary claims with Burma and India to the International Tribunal on the Law of the Sea; fencing along the India-Burma international border at Manipur's Moreh town is in progress to check illegal drug trafficking and movement of militants; Bhutan cooperates with India to expel Indian Nagaland separatists; Joint Border Committee with Nepal continues to examine contested boundary sections, including the 400 square kilometer dispute over the source of the Kalapani River; India maintains a strict border regime to keep out Maoist insurgents and control illegal cross-border activities from Nepal

Refugees and internally displaced persons:

refugees (country of origin): 77,200 (Tibet/China); 69,609 (Sri Lanka); 9,472 (Afghanistan)

IDPs: at least 600,000 (about half are Kashmiri Pandits from Jammu and Kashmir) (2007)

Trafficking in persons:

current situation: India is a source, destination, and transit country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; internal forced labor may constitute India's

largest trafficking problem; men, women, and children are held in debt bondage and face forced labor working in brick kilns, rice mills, agriculture, and embroidery factories; women and girls are trafficked within the country for the purposes of commercial sexual exploitation and forced marriage; children are subjected to forced labor as factory workers, domestic servants, beggars, and agriculture workers, and have been used as armed combatants by some terrorist and insurgent groups; India is also a destination for women and girls from Nepal and Bangladesh trafficked for the purpose of commercial sexual exploitation; Indian women are trafficked to the Middle East for commercial sexual exploitation; men and women from Bangladesh and Nepal are trafficked through India for forced labor and commercial sexual exploitation in the Middle East

tier rating: Tier 2 Watch List—India is on the Tier 2 Watch List for a fifth consecutive year for its failure to provide evidence of increasing efforts to combat human trafficking in 2007; despite the reported extent of the trafficking crisis in India, government authorities made uneven efforts to prosecute traffickers and protect trafficking victims; government authorities continued to rescue victims of commercial sexual exploitation and forced child labor and child armed combatants, and began to show progress in law enforcement against these forms of trafficking; a critical challenge overall is the lack of punishment for traffickers, effectively resulting in impunity for acts of human trafficking; India has not ratified the 2000 UN TIP Protocol (2008)

illicit drugs: world's largest producer of licit opium for the pharmaceutical trade, but an undetermined quantity of opium is diverted to illicit international drug markets; transit point for illicit narcotics produced in neighboring countries and throughout Southwest Asia; illicit producer of methaqualone; vulnerable to narcotics money laundering through the hawala system; licit ketamine and precursor production

INDIAN OCEAN

INTRODUCTION

Background: The Indian Ocean is the third largest of the world's five oceans (after the Pacific Ocean and Atlantic Ocean, but larger than the Southern Ocean and Arctic Ocean). Four critically important access waterways are the Suez Canal (Egypt), Bab el Mandeb (Djibouti-Yemen), Strait of Hormuz (Iran-Oman), and Strait of Malacca (Indonesia-Malaysia). The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Indian Ocean south of 60 degrees south latitude.

GEOGRAPHY

Location: body of water between Africa, the Southern Ocean, Asia, and Australia

Geographic coordinates: 20 00 S, 80 00 E

Map references: Political Map of the World

Area: total: 68.556 million sq km

note: includes Andaman Sea, Arabian Sea, Bay of Bengal, Flores Sea, Great Australian Bight, Gulf of Aden, Gulf of Oman, Java Sea, Mozambique Channel, Persian Gulf, Red Sea, Savu Sea, Strait of Malacca, Timor Sea, and other tributary water bodies

Area—comparative: about 5.5 times the size of the US

Coastline: 66,526 km

Climate: northeast monsoon (December to April), southwest monsoon (June to October); tropical cyclones occur during May/June and October/November in the northern Indian Ocean and January/February in the southern Indian Ocean

Terrain: surface dominated by counter-clockwise gyre (broad, circular system of currents) in the southern Indian Ocean; unique reversal of surface currents in the northern Indian Ocean; low atmospheric pressure over southwest Asia from hot, rising, summer air results in the southwest monsoon and southwest-to-northeast winds and currents, while high pressure over northern Asia from cold, falling, winter air results in the northeast monsoon and northeast-to-southwest winds and currents; ocean floor is dominated by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian Ocean Ridge, Southwest Indian Ocean Ridge, and Ninetyeast Ridge

Elevation extremes: lowest point: Java Trench -7,258 m

highest point: sea level 0 m

Natural resources: oil and gas fields, fish, shrimp, sand and gravel aggregates, placer deposits, polymetallic nodules

Natural hazards: occasional icebergs pose navigational hazard in southern reaches

Environment—current issues: endangered marine species include the dugong, seals, turtles, and whales; oil pollution in the Arabian Sea, Persian Gulf, and Red Sea

Geography—note: major chokepoints include Bab el Mandeb, Strait of Hormuz, Strait of Malacca, southern access to the Suez Canal, and the Lombok Strait

ECONOMY

Economy—overview: The Indian Ocean provides major sea routes connecting the Middle East, Africa, and East Asia with Europe and the Americas. It carries a particularly heavy traffic of petroleum and petroleum products from the oilfields of the Persian Gulf and Indonesia. Its fish are of great and growing importance to the bordering countries for domestic consumption and export. Fishing fleets from Russia, Japan, South Korea, and Taiwan also exploit the Indian Ocean, mainly for shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran, India, and western Australia. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, South Africa, Indonesia, Sri Lanka, and Thailand.

TRANSPORTATION

Ports and terminals: Chennai (Madras, India); Colombo (Sri Lanka); Durban

(South Africa); Jakarta (Indonesia); Kolkata (Calcutta, India); Melbourne (Australia); Mumbai (Bombay, India); Richards Bay (South Africa)

Transportation—note: the International Maritime Bureau reports the territorial waters of littoral states and offshore waters as high risk for piracy and armed robbery against ships, particularly in the Gulf of Aden, along the east coast of Africa, the Bay of Bengal, and the Strait of Malacca; numerous vessels, including commercial shipping and pleasure craft, have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crew and passengers are often held for ransom, murdered, or cast adrift; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators have reduced the piracy incidents in that body of water by more than half in 2010; in response, Somali-based pirates, using hijacked fishing trawlers as "mother ships" to extend their range, shifted operations as far south as the Mozambique Channel and eastward to the vicinity of the Maldives

TRANSNATIONAL ISSUES

Disputes—international: some maritime disputes (see littoral states)

INDONESIA

INTRODUCTION

Background: The Dutch began to colonize Indonesia in the early 17th century; Japan occupied the islands from 1942 to 1945. Indonesia declared its independence after Japan's surrender, but it required four years of intermittent negotiations, recurring hostilities, and UN mediation before the Netherlands agreed to transfer sovereignty in 1949. Free and fair legislative elections took place in 1999 after decades of repressive rule. Indonesia is now the world's third most populous democracy, the world's largest archipelagic state, and home to the world's largest Muslim population. Current issues include: alleviating poverty, improving education, preventing terrorism, consolidating democracy after

four decades of authoritarianism, implementing economic and financial reforms, stemming corruption, holding the military and police accountable for human rights violations, addressing climate change, and controlling infectious diseases, particularly those of global and regional importance. In 2005, Indonesia reached a historic peace agreement with armed separatists in Aceh, which led to democratic elections in Aceh in December 2006. Indonesia continues to face low intensity armed resistance by the separatist Free Papua Movement.

GEOGRAPHY

ECONOMY

Economy—overview: Indonesia, a vast polyglot nation, has weathered the global financial crisis relatively smoothly because of its heavy reliance on domestic consumption as the driver of economic growth. Increasing investment by both local

and foreign investors is also supporting solid growth. Although the economy slowed to 4.5% growth in 2009 from the 6%-plus growth rate recorded in 2007 and 2008, by 2010 growth returned to a 6% rate. During the recession, Indonesia outperformed most of its regional neighbors. The government made economic advances under the first administration of President YUDHOYONO, introducing significant reforms in the financial sector, including tax and customs reforms, the use of Treasury bills, and capital market development and supervision. Indonesia's debt-to-GDP ratio in recent years has declined steadily because of increasingly robust GDP growth and sound fiscal stewardship, leading two of the three leading credit agencies to upgrade credit ratings for Indonesia's sovereign debt to one notch below investment grade. Indonesia still struggles with poverty and unemployment, inadequate infrastructure, corruption, a complex regulatory environment, and unequal resource distribution among regions. YUDHOYONO and his vice president, respected economist BOEDIONO, have maintained broad continuity of economic policy, although the economic reform agenda has been slowed during the first year of their term by corruption scandals and the departure of an internationally respected finance minister. In late 2010, increasing inflation, driven by higher and volatile food prices, posed an increasing challenge to economic policymakers and threatened to push millions of the near-poor below the poverty line. The government in 2011 faces the ongoing challenge of improving Indonesia's infrastructure to remove impediments to growth, while addressing climate change concerns, particularly with regard to conserving Indonesia's forests and peatlands, the focus of a potentially trailblazing \$1 billion REDD+ pilot project.

TRANSNATIONAL ISSUES

Disputes—international: Indonesia has a stated foreign policy objective of establishing stable fixed land and maritime boundaries with all of its neighbors; some sections of border along Timor-Leste's Oecussi exclave and maritime boundaries with Timor-Leste remain unresolved; many refugees from Timor-Leste who left in 2003 still reside in Indonesia and refuse repatriation; a 1997 treaty between Indonesia and Australia settled some parts of

their maritime boundary but outstanding issues remain; ICJ's award of Sipadan and Ligitan islands to Malaysia in 2002 left the sovereignty of Unarang rock and the maritime boundary in the Ambalat oil block in the Celebes Sea in dispute; the ICJ decision has prompted Indonesia to assert claims to and to establish a presence on its smaller outer islands; Indonesia and Singapore continue to work on finalization of their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; Indonesian secessionists, squatters, and illegal migrants create repatriation problems for Papua New Guinea; maritime delimitation talks continue with Palau; Indonesian groups challenge Australia's claim to Ashmore Reef; Australia has closed parts of the Ashmore and Cartier Reserve to Indonesian traditional fishing and placed restrictions on certain catches

Refugees and internally displaced persons: IDPs: 200,000–350,000 (government

offensives against rebels in Aceh; most IDPs in Aceh, Central Kalimantan, Central Sulawesi Provinces, and Maluku) (2007)

Illicit drugs: illicit producer of cannabis largely for domestic use; producer of methamphetamine and ecstasy

IRAN

INTRODUCTION

Background: Known as Persia until 1935, Iran became an Islamic republic in 1979 after the ruling monarchy was overthrown and Shah Mohammad Reza PAHLAVI was forced into exile. Conservative clerical forces established a theocratic system of government with ultimate political authority vested in a learned religious scholar referred to commonly as the Supreme Leader who, according to the constitution, is accountable only to the Assembly of Experts—a popularly elected 86-member body of clerics. US-Iranian relations have been strained since a group of Iranian students seized the US Embassy in Tehran on 4 November 1979 and held it until 20 January 1981. During 1980–88, Iran fought a bloody, indecisive war with Iraq that eventually expanded into the

Persian Gulf and led to clashes between US Navy and Iranian military forces between 1987 and 1988. Iran has been designated a state sponsor of terrorism for its activities in Lebanon and elsewhere in the world and remains subject to US, UN, and EU economic sanctions and export controls because of its continued involvement in terrorism and its nuclear weapons ambitions. Following the election of reformer Hojjat ol-Eslam Mohammad KHATAMI as president in 1997 and a reformist Majles (legislature) in 2000, a campaign to foster political reform in response to popular dissatisfaction was initiated. The movement floundered as conservative politicians, through the control of unelected institutions, prevented reform measures from being enacted and increased repressive measures. Starting with nationwide municipal elections in 2003 and continuing through Majles elections in 2004, conservatives reestablished control over Iran's elected government institutions, which culminated with the August 2005 inauguration of hardliner Mahmud AHMADI-NEJAD as president. His controversial reelection in June 2009 sparked nationwide protests over allegations of electoral fraud. The UN Security Council has passed a number of resolutions (1696 in July 2006, 1737 in December 2006, 1747 in March 2007, 1803 in March 2008, and 1835 in September 2008 and 1929 in June 2010) calling for Iran to suspend its uranium enrichment and reprocessing activities and comply with its IAEA obligations and responsibilities. Resolutions 1737, 1477,

1803 and 1929 subject a number of Iranian individuals and entities involved in Iran's nuclear and ballistic missile programs to sanctions. Additionally, several Iranian entities are subject to US sanctions under Executive Order 13382 designations for proliferation activities and EO 13224 designations for support of terrorism. In mid-February 2011, opposition activists conducted the largest antiregime rallies since December 2009, spurred by the success of uprisings in Tunisia and Egypt. Protester turnout probably was at most tens of thousands and security forces were deployed to disperse protesters. Additional protests in March 2011 failed to elicit significant participation largely because of the robust security response, although discontent still smolders.

Independence: 1 April 1979 (Islamic Republic of Iran proclaimed); notable earlier dates: ca. 625 B.C. (unification of Iran under the Medes); ca. A.D. 1501 (Iran reunified under the Safavids); 12 December 1925 (modern Iran established under the Pahlavis)

National holiday: Republic Day, 1 April (1979)

Constitution: 2–3 December 1979; revised 1989

note: the revision in 1989 expanded powers of the presidency and eliminated the prime ministership

Legal system: religious law based on sharia

International law organization participation: has not submitted an ICJ jurisdiction declaration; non-party state to the ICCt

Suffrage: 18 years of age; universal

Executive branch: chief of state: Supreme Leader Ali Hoseini-KHAMENEI (since 4 June 1989)

head of government: President Mahmud AHMADI-NEJAD (since 3 August 2005);

First Vice President Mohammad Reza RAHIMI (since 13 September 2009)
cabinet: Council of Ministers selected by the president with legislative approval; the Supreme Leader has some control over appointments to the more sensitive ministries

(For more information visit the World Leaders website)

note: also considered part of the Executive branch of government are three oversight bodies: 1) Assembly of Experts (Majles-Khebragan), a popularly elected body charged with determining the succession of the Supreme Leader, reviewing his performance, and deposing him if deemed necessary; 2) Expediency Council or the Council for the Discernment of Expediency (Majma-e-Tashkhis-e-Maslahat-e-Nezam) exerts supervisory authority over the executive, judicial, and legislative branches and resolves legislative issues on which the Majles and the Council of Guardians disagree and since 1989 has been used to advise national religious leaders on matters of national policy; in 2005 the Council's powers were expanded to act as a supervisory body for the government; 3) Council of Guardians of the Constitution or Council of Guardians or Guardians Council (Shora-ye Negban-e-Qanon-e Asasi) determines whether proposed legislation is both constitutional and faithful to Islamic law, vets candidates in popular elections for suitability, and supervises national elections

elections: Supreme Leader appointed for life by the Assembly of Experts; president elected by popular vote for a four-year term (eligible for a second term and third nonconsecutive term); election last held on 12 June 2009 (next presidential election slated for June 2013)

election results: Mahmud AHMADI-NEJAD reelected president; percent of vote—Mahmud AHMADI-NEJAD 62.6%, Mir-Hosein MUSAVI-Khamenei 33.8%, other 3.6%; voter turnout 85% (according to official figures published by the government)

Legislative branch: unicameral Islamic Consultative Assembly or Majles-e-Shura-ye-Eslami or Majles (290 seats; members elected by popular vote to serve four-year terms)

elections: last held on 14 March 2008 with a runoff held on 25 April 2008 (next to be held in 2012)

election results: percent of vote—NA; seats by party—conservatives/Islamists 167, reformers 39, independents 74, religious minorities 5, other 5

Judicial branch: The Supreme Court (Qeveh Qazaiieh) and the four-member High Council of the Judiciary have a single head and overlapping responsibilities; together they supervise the enforcement of all laws and establish judicial and legal policies; lower courts include a special clerical court, a revolutionary court, and a special administrative court

Political parties and leaders: formal political parties are a relatively new phenomenon in Iran and most conservatives still

prefer to work through political pressure groups rather than parties; often political parties or coalitions are formed prior to elections and disbanded soon thereafter; a loose pro-reform coalition called the 2nd Khordad Front, which includes political parties as well as less formal groups and organizations, achieved considerable success in elections for the sixth Majles in early 2000; groups in the coalition included the Islamic Iran Participation Front (IIPF), Executives of Construction Party (Kargozaran), Solidarity Party, Islamic Labor Party, Mardom Salari, Mojahedin of the Islamic Revolution Organization (MIRO), and Militant Clerics Society (Ruhaniyun); the coalition participated in the seventh Majles elections in early 2004; following his defeat in the 2005 presidential elections, former MCS Secretary General and sixth Majles Speaker Mehdi KARUBI formed the National Trust Party; a new conservative group, Islamic Iran Developers Coalition (Abadgaran), took a leading position in the new Majles after winning a majority of the seats in February 2004; following the 2004 Majles elections, traditional and hardline conservatives have attempted to close ranks under the United Front of Principalists and the Broad Popular Coalition of Principalists; several reformist groups, such as the Mujahadin of the Islamic Revolution, came together as a reformist coalition in advance of the 2008 Majles elections; the IIPF has repeatedly complained that the overwhelming majority of its candidates have been unfairly disqualified from the 2008 elections

Political pressure groups and leaders: groups that generally support the Islamic Republic: Ansar-e Hizballah-Islamic Coalition Party (Motalefeh); Followers of the Line of the Imam and the Leader; Islamic Engineers Society; Tehran Militant Clergy Association (Ruhaniyat); active pro-reform student group: Office of Strengthening Unity (OSU); opposition groups: Baluchistan People's Party (BPP); Freedom Movement of Iran; Green Path movement [Mehdi KARUBI, Mir-Hosein MUSAVI]; Marze Por Gohar; National Front; and various ethnic and Monarchist organizations; armed political groups that have been repressed by the government: Democratic Party of Iranian Kurdistan (KDPI); Jundallah; Komala; Mujahedin-e Khalq Organization (MEK or MKO); People's Fedayeen; People's Free Life Party of Kurdistan (PJAK)

ECONOMY

Economy—overview: Iran's economy is marked by an inefficient state sector, reliance on the oil sector, which provides the majority of government revenues, and statist policies, which create major distortions throughout the system. Private sector activity is typically limited to small-scale workshops, farming, and services. Price controls, subsidies, and other rigidities weigh down the economy, undermining the potential for private-sector-led growth. Significant informal market activity flourishes. The legislature in late 2009 passed President Mahmud AHMADI-NEJAD's bill to reduce subsidies, particularly on food and energy. The bill would phase out subsidies—which benefit Iran's upper and middle classes the most—over three to five years and replace them with cash payments to Iran's lower classes. However, the start of the program was delayed repeatedly throughout 2010 over fears of public reaction to higher prices. This is the most extensive economic reform since the government implemented gasoline rationing in 2007. The recovery of world oil prices in the last year increased Iran's oil export revenue by at least \$10 billion over 2009, easing some of the financial impact of the newest round of international sanctions. Although inflation has fallen substantially since the mid-2000s, Iran continues to suffer from double-digit unemployment and underemployment. Underemployment among Iran's educated youth has convinced many to seek jobs overseas, resulting in a significant "brain drain."

TRANSNATIONAL ISSUES

Disputes—international: Iran protests Afghanistan's limiting flow of dammed Helmand River tributaries during drought; Iraq's lack of a maritime boundary with Iran prompts jurisdiction disputes beyond the mouth of the Shatt al Arab in the Persian Gulf; Iran and UAE dispute Tunb Islands and Abu Musa Island, which are occupied by Iran; Azerbaijan, Kazakhstan, and Russia ratified Caspian seabed delimitation treaties based on equidistance, while Iran

continues to insist on a one-fifth slice of the lake; Afghan and Iranian commissioners have discussed boundary monument densification and resurvey

Refugees and internally displaced persons: refugees (country of origin): 914,268 (Afghanistan); 54,024 (Iraq) (2007)

Trafficking in persons: current situation: Iran is a source, transit, and destination country for men, women, and children trafficked for the purposes of sexual exploitation and involuntary servitude; Iranian women are trafficked internally for the purpose of forced prostitution and for forced marriages to settle debts; Iranian and Afghan children living in Iran are trafficked internally for the purpose of forced marriages, commercial sexual exploitation and involuntary servitude as beggars or laborers to pay debts, provide income or support drug addiction of their families; press reports indicate that criminal organizations play a significant role in human trafficking to and from Iran, in connection with smuggling of migrants, drugs, and arms

tier rating: Tier 3—Iran did not provide evidence of law enforcement activities against trafficking, and credible reports indicate that Iranian authorities' response is not sufficient to penalize offenders, protect victims, and eliminate trafficking; some aspects of Iranian law and policy hinder efforts to combat trafficking including punishment of victims and legal obstacles to punishing offenders; Iran has not ratified the 2000 UN TIP Protocol (2009)

Illicit drugs: despite substantial interdiction efforts and considerable control measures along the border with Afghanistan, Iran remains one of the primary transshipment routes for Southwest Asian heroin to Europe; suffers one of the highest opiate addiction rates in the world, and has an increasing problem with synthetic drugs; lacks anti-money laundering laws; has reached out to neighboring countries to share counter-drug intelligence

IRAQ

INTRODUCTION

Background: Formerly part of the Ottoman Empire, Iraq was occupied by Britain during the course of World War I; in 1920, it was declared a League of Nations mandate under UK administration. In stages over the next dozen years, Iraq attained its independence as a kingdom in 1932. A "republic" was proclaimed in 1958, but in actuality a series of strongmen ruled the country until 2003. The last was SADDAM Husayn. Territorial disputes with Iran led to an inconclusive and costly eight-year war (1980-88). In August 1990, Iraq seized Kuwait but was expelled by US-led, UN coalition forces during

the Gulf War of January-February 1991. Following Kuwait's liberation, the UN Security Council (UNSC) required Iraq to scrap all weapons of mass destruction and long-range missiles and to allow UN verification inspections. Continued Iraqi noncompliance with UNSC resolutions over a period of 12 years led to the US-led invasion of Iraq in March 2003 and the ouster of the SADDAM Husayn regime. US forces remained in Iraq under a UNSC mandate through 2009 and under a bilateral security agreement thereafter, helping to provide security and to train and mentor Iraqi security forces. In October 2005, Iraqis approved a constitution in a national referendum and, pursuant to this

document, elected a 275-member Council of Representatives (CoR) in December 2005. The CoR approved most cabinet ministers in May 2006, marking the transition to Iraq's first constitutional government in nearly a half century. In January 2009, Iraq held elections for provincial councils in all provinces except for the three provinces comprising the Kurdistan Regional Government and Kirkuk province. Iraq held a national legislative election in March 2010, and after nine months of deadlock the CoR approved the new government in December 2010.

Flag description: three equal horizontal bands of red (top), white, and black; the Takbir (Arabic expression meaning "God is great") in green Arabic script is centered in the white band; the band colors derive from the Arab Liberation flag and represent oppression (black), overcome through bloody struggle (red), to be replaced by a bright future (white); the Council of Representatives approved this flag in 2008 as a compromise temporary replacement for the Ba'athist Saddam-era flag

note: similar to the flag of Syria, which has two stars but no script, Yemen, which has a plain white band, and that of Egypt, which has a gold Eagle of Saladin centered in the white band

National anthem: *name:* "Mawtini" (My Homeland)

lyrics/music: Ibrahim TOUQAN/Mohammad FLAYFEL

note: adopted 2004; following the ousting of Saddam HUSSEIN, Iraq adopted "Mawtini," a popular folk song throughout the Arab world, which also serves as an unofficial anthem of the Palestinian people

ECONOMY

Economy—overview: An improved security environment and an initial wave of foreign investment are helping to spur economic activity, particularly in the energy, construction, and retail sectors. Broader economic improvement, long-term fiscal health, and sustained increases in the standard of living still depend on the government passing major policy reforms and on continued development of Iraq's massive oil reserves. Although foreign investors viewed Iraq with increasing interest in 2010, most are still hampered by difficulties in acquiring land for projects and by other regulatory impediments. Iraq's economy is dominated by the oil sector, which provides over 90% of government revenue and 80% of foreign exchange earnings. Since mid-2009, oil export earnings have returned to levels seen before Operation Iraqi Freedom and government revenues have rebounded, along with global oil prices. In 2011 Baghdad probably will increase oil exports above the current level of 1.9 million barrels per day (bbl/day) as a result of new contracts with international oil companies, but is likely to fall short of the 2.4 million bbl/day it is forecasting in its budget. Iraq is making modest progress in building the institutions needed to implement economic policy. In 2010, Bagdad signed a new agreement with both the IMF and World Bank for conditional aid programs that will help strengthen Iraq's economic institutions. Some reform-minded leaders within the Iraqi government are seeking to pass laws to strengthen the economy. This legislation includes a package of laws to establish a modern legal framework for the oil sector and a mechanism to equitably divide oil revenues within the nation, although these and other important reforms are still under contentious and sporadic negotiation. Iraq's recent contracts with major oil companies have the potential to greatly expand oil revenues, but Iraq will need to upgrade its oil processing, pipeline, and export infrastructure to enable these deals to reach their potential. The Government of Iraq is pursuing a strategy to gain additional foreign investment in Iraq's economy. This includes an amendment to the National Investment Law, multiple international trade and investment events, as well as potential participation in joint ventures with state-owned enterprises. Provincial Councils also are using their own budgets to promote and facilitate investment at the local level. However, widespread corruption, inadequate infrastructure, insufficient essential services, and antiquated commercial laws and regulations stifle investment and continue to constrain the growth of private, non-energy sectors. The Central Bank has successfully held the exchange rate at approximately

1,170 Iraqi dinar/US dollar since January 2009. Inflation has decreased consistently since 2006 as the security situation has improved. However, Iraqi leaders remain hard pressed to translate macroeconomic gains into improved lives for ordinary Iraqis. Unemployment remains a problem throughout the country. Reducing corruption and implementing reforms—such as bank restructuring and developing the private sector—would be important steps in this direction.

Telephone system: general assessment: the 2003 liberation of Iraq severely disrupted telecommunications throughout Iraq including international connections; widespread government efforts to rebuild domestic and international communications through fiber optic links are in progress; the mobile cellular market has expanded rapidly and its subscribership base is expected to continue increasing rapidly

domestic: repairs to switches and lines destroyed during 2003 continue; additional switching capacity is improving access; mobile-cellular service is available and centered on 3 GSM networks which are being expanded beyond their regional roots, improving country-wide connectivity; wireless local loop is available in some metropolitan areas and additional licenses have been issued with the hope of overcoming the lack of fixed-line infrastructure

international: country code—964; satellite earth stations—4 (2 Intelsat—1 Atlantic Ocean and 1 Indian Ocean, 1 Intersputnik—Atlantic Ocean region, and 1 Arabsat (inoperative)); local microwave radio relay connects border regions to Jordan, Kuwait, Syria, and Turkey; international terrestrial fiber-optic connections have been established with Saudi Arabia, Turkey, and Kuwait with planned connections to Iran and Jordan; a link to the Fiber-Optic Link Around the Globe (FLAG) submarine fiber-optic cable is planned (2009)

Broadcast media: the number of private radio and television stations has increased rapidly since 2003; government-owned TV and radio stations are operated by the publicly-funded Iraqi Public Broadcasting Service; private broadcast media are mostly linked to political, ethnic, or religious groups; satellite TV is available to an estimated 70% of viewers and many of the broadcasters are based abroad; transmissions of multiple international radio broadcasters are accessible (2007)

TRANSNATIONAL ISSUES

Disputes—international: coalition forces assist Iraqis in monitoring internal and cross-border security; approximately two million Iraqis have fled the conflict in Iraq, with the majority taking refuge in Syria and Jordan, and lesser numbers to Egypt, Lebanon, Iran, and Turkey; Iraq's lack of a maritime boundary with Iran prompts jurisdiction disputes beyond the mouth of the Shatt al Arab in the Persian Gulf; Turkey has expressed concern over the autonomous status of Kurds in Iraq

Refugees and internally displaced persons: refugees (country of origin): 10,000-15,000 (Palestinian Territories); 11,773 (Iran); 16,832 (Turkey) IDPs: 2.4 million (ongoing US-led war and ethno-sectarian violence) (2007)

IRELAND

INTRODUCTION

Background: Celtic tribes arrived on the island between 600-150 B.C. Invasions by Norsemen that began in the late 8th century were finally ended when King Brian BORU defeated the Danes in 1014. English invasions began in the 12th century and set off more than seven centuries of Anglo-Irish struggle marked by fierce rebellions and harsh repressions. A failed 1916 Easter Monday Rebellion touched off several years of guerrilla warfare that in 1921 resulted in independence from the UK for 26 southern counties; six northern (Ulster) counties remained part of the UK. In 1949, Ireland withdrew from the British Commonwealth; it joined the European Community in 1973. Irish governments have sought the peaceful unification of Ireland and have cooperated with Britain against terrorist groups. A peace settlement for Northern Ireland

is gradually being implemented despite some difficulties. In 2006, the Irish and British governments developed and began to implement the St. Andrews Agreement, building on the Good Friday Agreement approved in 1998.

Flag description: three equal vertical bands of green (hoist side), white, and orange; officially the flag colors have no meaning, but a common interpretation is that the green represents the Irish nationalist (Gaelic) tradition of Ireland; orange represents the Orange tradition (minority supporters of William of Orange); white symbolizes peace (or a lasting truce) between the green and the orange

note: similar to the flag of Cote d'Ivoire, which is shorter and has the colors reversed—orange (hoist side), white, and green; also similar to the flag of Italy, which is shorter and has colors of green (hoist side), white, and red

National anthem: *name:* "Amhran na bhFiann" (The Soldier's Song)

lyrics/music: Peadar KEARNEY [English], Liam O RINN [Irish]/Patrick HEENEY and Peadar KEARNEY

note: adopted 1926; instead of "Amhran na bhFiann," the song "Ireland's Call" is often used in athletic events where citizens of the Republic of Ireland and Northern Ireland compete as a unified team

ECONOMY

Economy—overview: Ireland is a small, modern, trade-dependent economy. Ireland was among the initial group of 12 EU nations that began circulating the euro on 1 January 2002. GDP growth averaged 6% in 1995-2007, but economic activity has dropped sharply since the onset of the world financial crisis, with GDP falling by over 3% in 2008, nearly 8% in 2009, and 1% in 2010. Ireland entered into a recession in 2008 for the first time in more than a decade, with the subsequent collapse of its domestic property and construction markets. Property prices rose more rapidly

in Ireland in the decade up to 2007 than in any other developed economy. Since their 2007 peak, average house prices have fallen 50%. In the wake of the collapse of the construction sector and the downturn in consumer spending and business investment, the export sector, dominated by foreign multinationals, has become a key component of Ireland's economy. Agriculture, once the most important sector, is now dwarfed by industry and services. In 2008 the COWEN government moved to guarantee all bank deposits, recapitalize the banking system, and establish partly-public venture capital funds in response to the country's economic downturn. In 2009, in continued efforts to stabilize the banking sector, the Irish Government established the National Asset Management Agency (NAMA) to acquire problem commercial property and development loans from Irish banks. Faced with sharply reduced revenues and a burgeoning budget deficit, the Irish Government introduced the first in a series of draconian budgets in 2009. In addition to across-the-board cuts in spending, the 2009 budget included wage reductions for all public servants. These measures were not sufficient. The budget deficit reached nearly 32% of GDP in 2010 because of additional government support for the banking sector. In late 2010, the COWEN Government agreed to a \$112 billion loan package from the EU and IMF to help Dublin further increase the capitalization of its banking sector and avoid defaulting on its sovereign debt. The government also initiated a four-year austerity plan to cut an additional \$20 billion from its budget. A return to modest growth is expected in 2011.

Illicit drugs: transshipment point for and consumer of hashish from North Africa to the UK and Netherlands and of European-produced synthetic drugs; increasing consumption of South American cocaine; minor transshipment point for heroin and cocaine destined for Western Europe; despite recent legislation, narcotics-related money laundering—using bureaux de change, trusts, and shell companies involving the offshore financial community—remains a concern

ISLE OF MAN

(BRITISH CROWN DEPENDENCY)

INTRODUCTION

Background: Part of the Norwegian Kingdom of the Hebrides until the 13th century when it was ceded to Scotland, the isle came under the British crown in 1765. Current concerns include reviving the

almost extinct Manx Gaelic language. Isle of Man is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government remains constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Offshore banking, manufacturing, and tourism are key sectors of the economy. The government offers low taxes and other incentives to high-technology companies and financial institutions to locate on the island; this has paid off in expanding employment opportunities in high-income industries. As a result, agriculture and fishing, once the mainstays of the economy, have declined in their contributions to GDP. The Isle of Man also attracts online gambling sites and the film industry. Trade is mostly with the UK. The Isle of Man enjoys free access to EU markets.

INTRODUCTION

Background: Following World War II, the British withdrew from their mandate of Palestine, and the UN partitioned the area into Arab and Jewish states, an arrangement rejected by the Arabs. Subsequently, the Israelis defeated the Arabs in a series of wars without ending the deep tensions between the two sides. The territories Israel occupied since the 1967 war are not included in the Israel country profile, unless otherwise noted. On 25 April 1982, Israel withdrew from the Sinai pursuant to the 1979 Israel-Egypt Peace Treaty. In keeping with the framework established at the Madrid Conference in October 1991, bilateral negotiations were conducted between Israel and Palestinian representatives and Syria to achieve a permanent settlement. Israel and Palestinian officials signed on

13 September 1993 a Declaration of Principles (also known as the “Oslo Accords”) guiding an interim period of Palestinian self-rule. Outstanding territorial and other disputes with Jordan were resolved in the 26 October 1994 Israel-Jordan Treaty of Peace. In addition, on 25 May 2000, Israel withdrew unilaterally from southern Lebanon, which it had occupied since 1982. In April 2003, US President BUSH, working in conjunction with the EU, UN, and Russia—the “Quarter”—took the lead in laying out a roadmap to a final settlement of the conflict by 2005, based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. However, progress toward a permanent status agreement was undermined by Israeli-Palestinian violence between September 2003 and February 2005. In the summer of 2005, Israel unilaterally disengaged from the Gaza

Strip, evacuating settlers and its military while retaining control over most points of entry into the Gaza Strip. The election of HAMAS to head the Palestinian Legislative Council froze relations between Israel and the Palestinian Authority (PA). Ehud OLMERT became prime minister in March 2006 and presided over a 34-day conflict with Hizballah in Lebanon in June-August 2006 and a 23-day conflict with HAMAS in the Gaza Strip during December 2008 and January 2009. OLMERT, who in June 2007 resumed talks with PA President Mahmoud ABBAS, resigned in September 2008. Prime Minister Binyamin NETANYAHU formed a coalition in March 2009 following a February 2009 general election. Direct talks launched in September 2010 collapsed following the expiration of Israel’s 10-month partial settlement construction moratorium in the West Bank. Diplomatic

initiatives to revive the negotiations through proximity talks began at the end of 2010.

lyrics/music: Naftali Herz IMBER/traditional, arranged by Samuel COHEN

note: adopted 2004, unofficial since 1948; used as the anthem of the Zionist movement since 1897; the 1888 arrangement by Shmuel COHEN is thought to be based on the Romanian folk song "Carul cu boi" (The Ox Driven Cart)

ECONOMY

Economy—overview: Israel has a technologically advanced market economy. It depends on imports of crude oil, grains, raw materials, and military equipment. Despite limited natural resources, Israel has intensively developed its agricultural and industrial sectors over the past 20 years. Cut diamonds, high-technology equipment, and agricultural products (fruits and vegetables) are the leading exports. Israel usually posts sizable trade deficits, which are covered by large transfer payments from abroad and by foreign loans. Roughly half of the government's external debt is owed to the US, its major source of economic and military aid. Israel's GDP, after contracting slightly in 2001 and 2002 due to the Palestinian conflict and troubles in the high-technology sector, grew about 5% per year from 2004-07. The global financial crisis of 2008-09 spurred a brief recession in Israel, but the country entered the crisis with solid fundamentals—following years of prudent fiscal policy and a series of liberalizing reforms—and a resilient banking sector, and the economy has shown signs of an early recovery. Following GDP growth of 4% in 2008, Israel's GDP slipped to 0.2% in 2009, but reached 3.4% in 2010, as exports rebounded. The global economic downturn affected Israel's economy primarily through reduced demand for Israel's exports in the United States and EU, Israel's top trading partners. Exports of goods and services account for about 40% of the country's GDP. The Israeli Government responded to the recession by implementing a modest fiscal stimulus package and an aggressive expansionary monetary policy—including cutting interest rates to record lows, purchasing government bonds, and intervening in the foreign currency market. The Bank of Israel began raising interest rates in the summer of 2009 when inflation rose above the upper end of the Bank's target and the economy began to show signs of recovery.

TRANSNATIONAL ISSUES

Disputes—international: West Bank and Gaza Strip are Israeli-occupied with current status subject to the Israeli-Palestinian Interim Agreement—permanent status to be determined through further negotiation; Israel continues construction of a "seam line" separation barrier along parts of the Green Line and within

the West Bank; Israel withdrew its settlers and military from the Gaza Strip and from four settlements in the West Bank in August 2005; Golan Heights is Israeli-occupied (Lebanon claims the Shab'a Farms area of Golan Heights); since 1948, about 350 peacekeepers from the UN Truce Supervision Organization (UNTSO) headquartered in Jerusalem monitor ceasefires, supervise armistice agreements, prevent isolated incidents from escalating, and assist other UN personnel in the region

Refugees and internally displaced persons: IDPs: 150,000-420,000 (Arab villagers displaced from homes in northern Israel) (2007)

Illicit drugs: increasingly concerned about ecstasy, cocaine, and heroin abuse; drugs arrive in country from Lebanon and, increasingly, from Jordan; money-laundering center

ITALY

INTRODUCTION

Background: Italy became a nation-state in 1861 when the regional states of the peninsula, along with Sardinia and Sicily, were united under King Victor EMMANUEL II. An era of parliamentary government came to a close in the early 1920s when Benito MUSSOLINI established a Fascist dictatorship. His alliance with Nazi Germany led to Italy's defeat in World War II. A democratic republic replaced the monarchy in 1946 and economic revival followed. Italy was a charter member of NATO and the European Economic Community (EEC). It has been at the forefront of European economic and political unification, joining the Economic and Monetary Union in 1999. Persistent problems include illegal immigration, organized crime, corruption, high unemployment, sluggish economic growth, and the low incomes and technical standards of southern Italy compared with the prosperous north.

GEOGRAPHY

Location: Southern Europe, a peninsula extending into the central Mediterranean Sea, northeast of Tunisia

Geographic coordinates: 42 50 N, 12 50 E

Map references:

Area: total: 301,340 sq km

country comparison to the world: 71

land: 294,140 sq km

water: 7,200 sq km

note: includes Sardinia and Sicily

Area—comparative: slightly larger than Arizona

Land boundaries: total: 1,899.2 km

border countries: Austria 430 km, France 488 km, Holy See (Vatican City) 3.2 km,

San Marino 39 km, Slovenia 199 km, Switzerland 740 km

Coastline: 7,600 km

Maritime claims: territorial sea: 12 nm

continental shelf: 200 m depth or to the depth of exploitation

Climate: predominantly Mediterranean; Alpine in far north; hot, dry in south

Terrain: mostly rugged and mountainous; some plains, coastal lowlands

Elevation extremes: lowest point: Mediterranean Sea 0 m

highest point: Mont Blanc (Monte Bianco) de Courmayeur 4,748 m (a secondary peak of Mont Blanc)

Natural resources: coal, mercury, zinc, potash, marble, barite, asbestos, pumice, fluorspar, feldspar, pyrite (sulfur), natural gas and crude oil reserves, fish, arable land

Land use: arable land: 26.41%

permanent crops: 9.09%

other: 64.5% (2005)

Irrigated land: 27,500 sq km (2003)

Total renewable water resources: 175 cu km (2005)

Freshwater withdrawal (domestic/industrial/agricultural): total: 41.98 cu km/yr (18%/37%/45%)

per capita: 723 cu m/yr (1998)

Natural hazards: regional risks include landslides, mudflows, avalanches, earthquakes, volcanic eruptions, flooding; land subsidence in Venice

volcanism: Italy experiences significant volcanic activity; Etna (elev. 3,330 m),

which is in eruption as of 2010, is Europe's most active volcano; flank eruptions pose a threat to nearby Sicilian villages; Etna, along with the famous Vesuvius, which remains a threat to the millions of nearby residents in the Bay of Naples area, have both been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; Stromboli, on its namesake island, has also been continuously active with moderate volcanic activity; other historically active volcanoes include Campi Flegrei, Ischia, Larderello, Pantelleria, Vulcano, and Vulcini

Environment—current issues: air pollution from industrial emissions such as sulfur dioxide; coastal and inland rivers polluted from industrial and agricultural effluents; acid rain damaging lakes; inadequate industrial waste treatment and disposal facilities

Environment—international agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulfur 85, Air Pollution-Sulfur 94, Air Pollution-Volatile Organic Compounds, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: strategic location dominating central Mediterranean as well as southern sea and air approaches to Western Europe

Flag description: three equal vertical bands of green (hoist side), white, and red; design inspired by the French flag brought to Italy by Napoleon in 1797; colors are those of Milan (red and white) combined with the green uniform color of the Milanese civic guard

note: similar to the flag of Mexico, which is longer, uses darker shades of red and green, and has its coat of arms centered on the white band; Ireland, which is longer and is green (hoist side), white, and orange; also similar to the flag of the Cote d'Ivoire, which has the colors reversed—orange (hoist side), white, and green

National anthem: *name:* "Il Canto degli Italiani" (The Song of the Italians)

lyrics/music: Goffredo MAMELI/Michele NOVARO

note: adopted 1946; the anthem, originally written in 1847, is also known as "L'Inno di Mameli" (Mameli's Hymn), and "Fratelli D'Italia" (Brothers of Italy)

into a developed industrial north, dominated by private companies, and a less-developed, welfare-dependent, agricultural south, with high unemployment. The Italian economy is driven in large part by the manufacture of high-quality consumer goods produced by small and medium-sized enterprises, many of them family owned. Italy also has a sizable underground economy, which by some estimates accounts for as much as 15% of GDP. These activities are most common within the agriculture, construction, and service sectors. Italy has moved slowly on implementing needed structural reforms, such as reducing graft, overhauling costly entitlement programs, and increasing employment opportunities for young workers, particularly women. The international financial crisis worsened conditions in Italy's labor market, with unemployment rising from 6.2% in 2007 to 8.4% in 2010, but in the longer-term Italy's low fertility rate and quota-driven immigration policies will increasingly strain its economy. A rise in exports and investment driven by the global economic recovery nevertheless helped the economy grow by about 1% in 2010 following a 5% contraction in 2009. The Italian government has struggled to limit government spending, but Italy's exceedingly high public debt remains above 115% of GDP, and its fiscal deficit—just 1.5% of GDP in 2007—exceeded 5% in 2009 and 2010, as the costs of servicing the country's debt rose.

JAMAICA

INTRODUCTION

Background: The island—discovered by Christopher COLUMBUS in 1494—was settled by the Spanish early in the 16th century. The native Taino Indians, who had inhabited Jamaica for centuries, were gradually exterminated and replaced by African slaves. England seized the island in 1655 and established a plantation economy based on sugar, cocoa, and coffee. The abolition of slavery in 1834 freed a quarter million slaves, many of whom became small farmers. Jamaica gradually obtained increasing independence from Britain. In 1958 it joined other British Caribbean colonies in forming the Federation of the West Indies. Jamaica gained full independence when it withdrew from the Federation in 1962. Deteriorating economic conditions during the 1970s led to recurrent violence as rival gangs affiliated with the major political parties evolved into powerful organized crime networks involved in international drug smuggling and money laundering. Violent crime, drug trafficking, and poverty pose significant challenges to the government today. Nonetheless, many rural and resort areas remain relatively safe and contribute substantially to the economy.

ECONOMY

Economy—overview: The Jamaican economy is heavily dependent on services, which now account for more than 60% of GDP. The country continues to derive most of its foreign exchange from tourism, remittances, and bauxite/alumina. Remittances account for nearly 15% of GDP and exports of bauxite and alumina make up about 10%. The bauxite/alumina sector was most affected by the global downturn while the tourism industry was resilient, experiencing an increase of 4% in tourist arrivals. Tourism revenues account for roughly 10% of GDP, and both arrivals and revenues grew in 2010, up 4% and 6% respectively. The Economic growth faces many challenges: high crime and corruption, large-scale unemployment and under-

employment, and a debt-to-GDP ratio of more than 120%. Jamaica's onerous public debt burden—the fourth highest in the world on a per capita basis—is the result of government bailouts to ailing sectors of the economy, most notably to the financial sector in the mid-to-late 1990s. In early 2010, the Jamaican government created the Jamaica Debt Exchange (JDX) in order to retire high-priced domestic bonds and significantly reduce annual debt servicing. The Government of Jamaica signed a \$1.27 billion, 27-month Standby Agreement with the International Monetary Fund for balance of payment support in February 2010. Other multilaterals have also provided millions of dollars in loans and grants. Despite the improvement, debt servicing costs still hinder the government's ability to spend on infrastructure and social programs, particularly as job losses rise in a shrinking economy. The GOLDING administration faces the difficult prospect of having to achieve fiscal discipline in order to maintain debt payments, while simultaneously attacking a serious crime problem that is hampering economic growth. High unemployment exacerbates the crime problem, including gang violence that is fueled by the drug trade.

JAN MAYEN

(TERRITORY OF NORWAY)

INTRODUCTION

Background: This desolate, arctic, mountainous island was named after a Dutch whaling captain who indisputably discovered it in 1614 (earlier claims are inconclusive). Visited only occasionally by seal hunters and trappers over the following centuries, the island came under Norwegian sovereignty in 1929. The long dormant Beerenberg volcano resumed activity in 1970; the most recent eruption occurred in 1985. It is the northernmost active volcano on earth.

JAPAN

INTRODUCTION

Background: In 1603, after decades of civil warfare, the Tokugawa shogunate (a mili-

tary-led, dynastic government) ushered in a long period of relative political stability and isolation from foreign influence. For more than two centuries this policy enabled Japan to enjoy a flowering of its indigenous culture. Japan opened its ports after signing the Treaty of Kanagawa with the US in 1854 and began to intensively modernize and industrialize. During the late 19th and early 20th centuries, Japan became a regional power that was able to defeat the forces of both China and Russia. It occupied Korea, Formosa (Taiwan), and southern Sakhalin Island. In 1931-32 Japan occupied Manchuria, and in 1937 it launched a full-scale invasion of China. Japan attacked US forces in 1941—triggering America's entry into World War II—and soon occupied much of East and Southeast Asia. After its defeat in World War II, Japan recovered to become an economic power and an ally of the US.

While the emperor retains his throne as a symbol of national unity, elected politicians hold actual decision-making power. Following three decades of unprecedented growth, Japan's economy experienced a major slowdown starting in the 1990s, but the country remains a major economic power. In March 2011, Japan's strongest-ever earthquake, and an accompanying tsunami, devastated the northeast part of Honshu island, killing thousands and damaging several nuclear power plants. The catastrophe hobbled the country's economy and its energy infrastructure, and severely strained its capacity to deal with the humanitarian disaster.

ECONOMY

Economy—overview: In the years following World War II, government-industry cooperation, a strong work ethic, mastery of high technology, and a comparatively small defense allocation (1% of GDP) helped Japan develop a technologically advanced economy. Two notable characteristics of the post-war economy were the close interlocking structures of manufacturers, suppliers, and distributors, known as keiretsu, and the guarantee of lifetime employment for a substantial portion of the urban labor force. Both features are now eroding under the dual pressures of global competition and domestic demographic change. Japan's industrial sector is heavily dependent on imported raw materials and fuels. A tiny agricultural sector is highly subsidized and protected, with crop yields among the highest in the world. Usually self sufficient in rice, Japan imports about 60% of its food on a caloric basis. Japan maintains one of the world's largest fishing fleets and accounts for nearly 15% of the global catch. For three decades, overall real economic growth had been spectacular—a 10% average in the 1960s, a 5% average in

the 1970s, and a 4% average in the 1980s. Growth slowed markedly in the 1990s, averaging just 1.7%, largely because of the after effects of inefficient investment and an asset price bubble in the late 1980s that required a protracted period of time for firms to reduce excess debt, capital, and labor. Measured on a purchasing power parity (PPP) basis that adjusts for price differences, Japan in 2010 stood as the third-largest economy in the world after China, which surpassed Japan in 2001. The Japanese financial sector was not heavily exposed to sub-prime mortgages or their derivative instruments and weathered the initial effect of the recent global credit crunch, but a sharp downturn in business investment and global demand for Japan's exports in late 2008 pushed Japan further into recession. Government stimulus spending helped the economy recover in late 2009 and 2010. Prime Minister KAN's government has proposed opening the agricultural and services sectors to greater foreign competition and boosting exports through free-trade agreements, but debate continues on restructuring the economy and funding new stimulus programs in the face of a tight fiscal situation. Japan's huge government debt, which exceeds 200% of GDP, persistent deflation, reliance on exports to drive growth, and an aging and shrinking population are major long-term challenges for the economy. A 9.0-magnitude earthquake and an ensuing tsunami devastated the northeast coast of Honshu Island on 11 March 2011, washing away buildings and infrastructure as much as 6 miles inland, killing thousands, severely damaging several nuclear power plants, displacing and leaving homeless more than 320,000 people, and leaving a million households without running water. Radiation leaks at the Fukushima Daiichi nuclear power plant prompted mass evacuations and the declaration of a no-fly zone—initially for people and planes within 12.5 miles of the plant but later expanded to 19 miles. Radioactive iodine-131 has been found as far as 100 miles from the plant in samples of water, milk, fish, beef, and certain vegetables, at levels that make these foods unfit for consumption and create uncertainty regarding possible long-term contamination of the area. Energy-cutting efforts by electric companies and train lines slowed the pace of business throughout Honshu Island, and the stock market gyrated, dropping as much as 10% in a single day. In order to stabilize financial markets and retard appreciation of the yen, the Bank of Japan injected more than \$325 billion in yen into the economy. Estimates of the direct costs of the damage—rebuilding homes and factories—range from \$235 billion to \$310 billion. Some economic forecasters, who previously had anticipated slower growth for Japan in 2011, now believe GDP may decline as much as 1% for the year.

TRANSNATIONAL ISSUES

Disputes—international: the sovereignty dispute over the islands of Etorofu, Kuna-shiri, and Shikotan, and the Habomai group, known in Japan as the “Northern Territories” and in Russia as the “Southern Kuril Islands,” occupied by the Soviet Union in 1945, now administered by Russia and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Japan and South Korea claim Liancourt Rocks (Take-shima/Tok-do) occupied by South Korea since 1954; China and Taiwan dispute both Japan’s claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan’s unilaterally declared exclusive economic zone in the East China Sea, the site of intensive hydrocarbon prospecting

JERSEY

(BRITISH CROWN DEPENDENCY)

INTRODUCTION

Background: Jersey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy that held sway in both France and England. These islands were the only British soil occupied by German troops in World War II. Jersey is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government is constitutionally responsible for its defense and international representation.

Diplomatic representation from the US: none (British crown dependency)

Flag description: white with a diagonal red cross extending to the corners of the flag; in the upper quadrant, surmounted by a yellow crown, a red shield with three lions in yellow; according to tradition, the ships of Jersey—in an attempt to differentiate themselves from English ships flying the horizontal cross of St. George—rotated the cross to the "X" (saltire) configuration; because this arrangement still resembled the Irish cross of St. Patrick, the yellow Plantagenet crown and Jersey coat of arms were added

National anthem: *name:* "Isle de Siez Nous" (Island Home)

lyrics/music: Gerard LE FEUVRE

note: adopted 2008; serves as a local anthem; as a British crown dependency, "God Save the Queen" is official (see United Kingdom)

ECONOMY

Economy—overview: Jersey's economy is based on international financial services, agriculture, and tourism. In 2005 the finance sector accounted for about 50% of the island's output. Potatoes, cauliflower, tomatoes, and especially flowers are important export crops, shipped mostly to the UK. The Jersey breed of dairy cattle is known worldwide and represents an important export income earner. Milk products go to the UK and other EU countries. Tourism accounts for one-quarter of GDP. In recent years, the government has encouraged light industry to locate in Jersey with the result that an electronics industry has developed, displacing more traditional industries. All raw material and energy requirements are imported as well as a large share of Jersey's food needs. Light taxes and death duties make the island a popular tax haven. Living standards come close to those of the UK.

JORDAN

INTRODUCTION

Background: Following World War I and the dissolution of the Ottoman Empire, the UK received a mandate to govern much of the Middle East. Britain separated out a semi-autonomous region of Transjordan from Palestine in the early 1920s, and the area gained its independence in 1946; it adopted the name of Jordan in 1950. The country's long-time ruler was King HUSSEIN (1953-99). A pragmatic leader, he successfully navigated competing pressures from the major powers (US, USSR, and UK), various Arab states, Israel, and a large internal Palestinian population. Jordan lost the West Bank to Israel in the 1967 war and barely managed to defeat Palestinian rebels who attempted to overthrow the monarchy in 1970. King HUSSEIN in 1988 permanently relinquished Jordanian claims to the West Bank. In 1989, he reinstituted parliamentary elections and initiated a gradual political liberalization; political parties were legalized in 1992. In 1994, he signed a peace treaty with Israel. King ABDALLAH II, the son of King HUSSEIN, assumed the throne following his father's death in February 1999. Since then, he has consolidated his power and undertaken an aggressive economic reform program. Jordan acceded to the World Trade Organization in 2000, and began to participate in the European Free Trade Association in 2001. In 2003, Jordan staunchly supported the Coalition ouster of SADDAM in Iraq and, following the outbreak of insurgent violence in Iraq, absorbed thousands of displaced Iraqis. Municipal elections were held in July 2007 under a system in which 20% of seats in

all municipal councils were reserved by quota for women. Parliamentary elections were held in November 2010 and saw independent pro-government candidates win the vast majority of seats. Beginning in January 2011 in the wake of unrest in Tunisia and Egypt, several thousand Jordanians staged weekly demonstrations and marches in Amman and other cities throughout Jordan to protest government corruption, rising prices, rampant poverty, and high unemployment. In response, King Abdallah replaced his prime minister and formed a National Dialogue Commission with a reform mandate. Some opposition groups also called for sweeping political and constitutional reforms, particularly on a controversial election law.

ECONOMY

Economy—overview: Jordan's economy is among the smallest in the Middle East, with insufficient supplies of water, oil, and other natural resources, underlying the government's heavy reliance on foreign assistance. Other economic challenges for the government include chronic high rates of poverty, unemployment, inflation, and a large budget deficit. Since assuming the throne in 1999, King ABDALLAH has implemented significant economic reforms, such as opening the trade regime, privatizing state-owned companies, and eliminating most fuel subsidies, which in the past few years have spurred economic growth by attracting foreign investment and creating some jobs. The global economic slowdown, however, has depressed Jordan's GDP growth. Export-oriented sectors such as manufacturing, mining, and the transport of re-exports have been hit the hardest. The Government approved two supplementary budgets in 2010, but sweeping tax cuts planned for 2010 did not materialize because of Amman's need for additional revenue to cover excess spending. The budget deficit is likely to remain high, at 5-6% of GDP, and Amman likely will continue to depend heavily on foreign assistance to finance the deficit in 2011. Jordan's financial sector has been relatively isolated from the international financial crisis because of its limited exposure to overseas capital markets. Jordan is currently exploring nuclear power generation to forestall energy shortfalls.

Telephone system: general assessment: service has improved recently with increased use of digital switching equipment; microwave radio relay transmission and coaxial and fiber-optic cable are employed on trunk lines; growing mobile cellular usage in both urban and rural areas is reducing use of fixed-line services; Internet penetration remains modest and slow-growing

domestic: 1995 telecommunications law opened all non-fixed-line services to

private competition; in 2005, monopoly over fixed-line services terminated and the entire telecommunications sector was opened to competition; currently multiple mobile-cellular providers with subscribership rapidly approaching 100 per 100 persons

international: country code—962; landing point for the Fiber-Optic Link Around the Globe (FLAG) FEA and FLAG Falcon submarine cable networks; satellite earth stations—33 (3 Intelsat, 1 Arabsat, and 29 land and maritime Inmarsat terminals); fiber-optic cable to Saudi Arabia and microwave radio relay link with Egypt and Syria; participant in Medarabtel (2010)

Broadcast media: radio and TV dominated by the government-owned Jordan Radio and Television Corporation (JRTV) that operates a main network, a sports network, a film network, and a satellite channel; first independent TV broadcaster aired in 2007; international satellite TV and Israeli and Syrian TV broadcasts are available; roughly 30 radio stations operational with JRTV operating the main government-owned station; transmissions of multiple international radio broadcasters are available (2007)

KAZAKHSTAN

INTRODUCTION

Background: Ethnic Kazakhs, a mix of Turkic and Mongol nomadic tribes who migrated into the region in the 13th century, were rarely united as a single nation. The area was conquered by Russia in the 18th century, and Kazakhstan became a Soviet Republic in 1936. During the 1950s and 1960s agricultural "Virgin Lands" program, Soviet citizens were encouraged to help cultivate Kazakhstan's northern pastures. This influx of immigrants (mostly Russians, but also some other deported nationalities) skewed the ethnic mixture and enabled non-ethnic Kazakhs to outnumber natives. Independence in 1991 drove many of these newcomers to emigrate. Kazakhstan's economy is larger than those of all the other Central Asian states largely due to the country's vast natural resources. Current issues include: developing a cohesive national identity; expanding the development of the country's vast energy resources and exporting them to world markets; diversifying the economy outside the oil, gas, and mining sectors; enhancing Kazakhstan's economic competitiveness; developing a multiparty parliament and advancing political and social reform; and strengthening relations with neighboring states and other foreign powers.

GEOGRAPHY

Location: Central Asia, northwest of China; a small portion west of the Ural (Zhayyq) River in eastern-most Europe
Geographic coordinates: 48 00 N, 68 00 E
Map references: Asia
Area: total: 2,724,900 sq km
country comparison to the world: 9
 land: 2,699,700 sq km
 water: 25,200 sq km
Area—comparative: slightly less than four times the size of Texas
Land boundaries: total: 12,185 km
border countries: China 1,533 km, Kyrgyzstan 1,224 km, Russia 6,846 km, Turkmenistan 379 km, Uzbekistan 2,203 km
Coastline: 0 km (landlocked); note—Kazakhstan borders the Aral Sea, now split into two bodies of water (1,070 km), and the Caspian Sea (1,894 km)
Maritime claims: none (landlocked)

Climate: continental, cold winters and hot summers, arid and semiarid

Terrain: vast flat steppe extending from the Volga in the west to the Altai Mountains in the east and from the plains of western Siberia in the north to oases and deserts of Central Asia in the south

Elevation extremes: lowest point: Vpadina Kaundy -132 m

highest point: Khan Tangiri Shyngy (Pik Khan-Tengri) 6,995 m

Natural resources: major deposits of petroleum, natural gas, coal, iron ore, manganese, chrome ore, nickel, cobalt, copper, molybdenum, lead, zinc, bauxite, gold, uranium

Land use: arable land: 8.28%

permanent crops: 0.05%

other: 91.67% (2005)

Irrigated land: 35,560 sq km (2003)

Total renewable water resources: 109.6 cu km (1997)

Freshwater withdrawal (domestic/industrial/agricultural): total: 35 cu km/yr (2%/17%/82%)

per capita: 2,360 cu m/yr (2000)

Natural hazards: earthquakes in the south; mudslides around Almaty

Environment—current issues: radioactive or toxic chemical sites associated with former defense industries and test ranges scattered throughout the country pose health risks for humans and animals; industrial pollution is severe in some cities; because the two main rivers that flowed into the Aral Sea have been diverted for irrigation, it is drying up and leaving behind a harmful layer of chemical pesticides and natural salts; these substances are then picked up by the wind and blown into noxious dust storms; pollution in the Caspian Sea; soil pollution from overuse of agricultural chemicals and salination from poor infrastructure and wasteful irrigation practices

Environment—international agreements: party to: Air Pollution, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Ozone Layer Protection, Ship Pollution, Wetlands signed, but not ratified: Climate Change-Kyoto Protocol

Geography—note: landlocked; Russia leases approximately 6,000 sq km of territory enclosing the Baykonur Cosmodrome; in January 2004, Kazakhstan and Russia extended the lease to 2050

Flag description: a gold sun with 32 rays above a soaring golden steppe eagle, both centered on a sky blue background; the hoist side displays a national ornamental pattern "koshkar-muiz" (the horns of the ram) in gold; the blue color is of religious significance to the Turkic peoples of the country, and so symbolizes cultural and ethnic unity; it also represents the endless sky as well as water; the sun, a source of life and energy, exemplifies wealth and plenitude; the sun's rays are shaped like grain, which is the basis of abundance and prosperity; the eagle has appeared on the flags of Kazakh tribes for centuries and represents freedom, power, and the flight to the future

National anthem: name: "Menin Qazaqstanım" (My Kazakhstan)
lyrics/music: Zhumeiken NAZHIMEDENOV and Nursultan NAZARBAYEV/Shamshi KALDAYAKOV
note: adopted 2006; President Nursultan NAZARBAYEV played a role in revising the lyrics

ECONOMY

Economy—overview: Kazakhstan, geographically the largest of the former Soviet republics, excluding Russia, possesses enormous fossil fuel reserves and plentiful supplies of other minerals and metals, such as uranium, copper, and zinc. It also has a large agricultural sector featuring livestock and grain. In 2002 Kazakhstan became the first country in the former Soviet Union to receive an investment-grade credit rating, and from 2000 through 2007, Kazakhstan's economy grew more than 9% per year. Extractive industries, particularly hydrocarbons and mining, have been the engines of this growth. However, geographic limitations and decaying infrastructure present serious obstacles. Landlocked, with restricted access to the high seas, Kazakhstan relies on its neighbors to export its products, especially oil and gas. Although its Caspian Sea ports and rail lines carrying oil have been upgraded, civil aviation has been neglected. Telecoms are improving, but require considerable investment, as does the information technology base. Supply and distribution of electricity can be erratic. At the end of 2007, global financial markets froze up and the loss of capital inflows to Kazakhstani banks caused a credit crunch. The subsequent

and sharp fall of oil and commodity prices in 2008 aggravated the economic situation, and Kazakhstan plunged into recession. While the global financial crisis took a significant toll on Kazakhstan's economy, it has rebounded well. In response to the crisis, Kazakhstan's government devalued the tenge (Kazakhstan's currency) to stabilize market pressures and injected \$19 billion in economic stimulus. Rising commodity prices have helped revive Kazakhstan's economy, which registered 7% growth in 2010. Barring a dramatic decline in oil prices, strong growth is expected to continue in 2011. Despite solid macroeconomic indicators, the government realizes that its economy suffers from an overreliance on oil and extractive industries, the so-called "Dutch disease." In response, Kazakhstan has embarked on an ambitious diversification program, aimed at developing targeted sectors like transport, pharmaceuticals, telecommunications, petrochemicals and food processing.

KENYA

INTRODUCTION

Background: Founding president and liberation struggle icon Jomo KENYATTA led Kenya from independence in 1963 until his death in 1978, when President Daniel Toroitich arap MOI took power in a constitutional succession. The country was a de facto one-party state from 1969 until 1982 when the ruling Kenya African National Union (KANU) made itself the

sole legal party in Kenya. MOI acceded to internal and external pressure for political liberalization in late 1991. The ethnically fractured opposition failed to dislodge KANU from power in elections in 1992 and 1997, which were marred by violence and fraud, but were viewed as having generally reflected the will of the Kenyan people. President MOI stepped down in December 2002 following fair and peaceful elections. Mwai KIBAKI, running

as the candidate of the multiethnic, united opposition group, the National Rainbow Coalition (NARC), defeated KANU candidate Uhuru KENYATTA and assumed the presidency following a campaign centered on an anticorruption platform. KIBAKI's NARC coalition splintered in 2005 over a constitutional review process. Government defectors joined with KANU to form a new opposition coalition, the Orange Democratic Movement, which defeated

the government's draft constitution in a popular referendum in November 2005. KIBAKI's reelection in December 2007 brought charges of vote rigging from ODM candidate Raila ODINGA and unleashed two months of violence in which as many as 1,500 people died. UN-sponsored talks in late February produced a powersharing accord bringing ODINGA into the government in the restored position of prime minister. Kenya in August 2010 adopted a new constitution that eliminates the role of prime minister after the next presidential election.

note: adopted 1963; the anthem is based on a traditional Kenyan folk song

ECONOMY

Economy—overview: Although the regional hub for trade and finance in East Africa, Kenya has been hampered by corruption and by reliance upon several primary goods whose prices have remained low. In 1997, the IMF suspended Kenya's Enhanced Structural Adjustment Program due to the government's failure to maintain reforms and curb corruption. The IMF, which had resumed loans in 2000 to help Kenya through a drought, again halted lending in 2001 when the government failed to institute several anticorruption measures. In the key December 2002 elections, Daniel Arap MOI's 24-year-old reign ended, and a new opposition government took on the formidable economic problems facing the nation. After some early progress in rooting out corruption and encouraging donor support, the KIBAKI government was rocked by high-level graft scandals in 2005 and 2006. In 2006, the World Bank and IMF delayed loans pending action by the government on corruption. The international financial institutions and donors have since resumed lending, despite little action on the government's part to deal

with corruption. Post-election violence in early 2008, coupled with the effects of the global financial crisis on remittance and exports, reduced GDP growth to 1.7 in 2008, but the economy rebounded in 2009-10.

Transnational Issues

Disputes—international: Kenya served as an important mediator in brokering Sudan's north-south separation in February 2005;

Kenya provides shelter to almost a quarter of a million refugees, including Ugandans who flee across the border periodically to seek protection from Lord's Resistance Army (LRA) rebels; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading across the border, which has long been open to nomadic pastoralists; the boundary that separates Kenya's and Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times

Refugees and internally displaced persons: refugees (country of origin): 173,702 (Somalia); 73,004 (Sudan); 16,428 (Ethiopia)

IDPs: 250,000-400,000 (2007 post-election violence; KANU attacks on opposition tribal groups in 1990s) (2007)

Illicit drugs: widespread harvesting of small plots of marijuana; transit country for South Asian heroin destined for Europe and North America; Indian methaqualone also transits on way to South Africa; significant potential for money-laundering activity given the country's status as a regional financial center; massive corruption, and relatively high levels of narcotics-associated activities

KIRIBATI

INTRODUCTION

Background: The Gilbert Islands became a British protectorate in 1892 and a colony in 1915; they were captured by the Japanese in the Pacific War in 1941. The islands of Makin and Tarawa were the sites of major US amphibious victories over entrenched Japanese garrisons in 1943. The Gilbert Islands were granted self-rule by the UK in 1971 and complete independence in 1979 under the new name of Kiribati. The US relinquished all claims to the sparsely inhabited Phoenix and Line Island groups in a 1979 treaty of friendship with Kiribati.

GEOGRAPHY

Location: Oceania, group of 33 coral atolls in the Pacific Ocean, straddling the Equator, as well as the International Date Line; the capital Tarawa is about half way between Hawaii and Australia

Geographic coordinates: 1 25 N, 173 00 E

Map references: Oceania

Area: total: 811 sq km

country comparison to the world: 186

land: 811 sq km

water: 0 sq km

note: includes three island groups—Gilbert Islands, Line Islands, Phoenix Islands

Area—comparative: four times the size of Washington, DC

Land boundaries: 0 km

Coastline: 1,143 km

Maritime claims: territorial sea: 12 nm

exclusive economic zone: 200 nm

Climate: tropical; marine, hot and humid, moderated by trade winds

Terrain: mostly low-lying coral atolls surrounded by extensive reefs

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: unnamed elevation on Banaba 81 m

Natural resources: phosphate (production discontinued in 1979)

Land use: arable land: 2.74%

permanent crops: 47.95%

other: 49.31% (2005)

Irrigated land: NA

Natural hazards: typhoons can occur any time, but usually November to March; occasional tornadoes; low level of some of the islands make them sensitive to changes in sea level

Environment—current issues: heavy pollution in lagoon of south Tarawa atoll due to heavy migration mixed with traditional practices such as lagoon latrines and open-pit dumping; ground water at risk

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: 21 of the 33 islands are inhabited; Banaba (Ocean Island) in Kiribati is one of the three great phosphate rock islands in the Pacific Ocean—the others are Makatea in French Polynesia, and Nauru; Kiribati is the only country in the world to fall into all four hemispheres (northern, southern, eastern, and western)

ECONOMY

Economy—overview: A remote country of 33 scattered coral atolls, Kiribati has few natural resources and is one of the least developed Pacific Islands. Commercially viable phosphate deposits were exhausted at the time of independence from the UK in 1979. Copra and fish now represent the bulk of production and exports. The economy has fluctuated widely in recent years. Economic development is constrained by a shortage of skilled workers, weak infrastructure, and remoteness from international markets. Tourism provides more than one-fifth of GDP. Private sector initiatives and a financial sector are in the early stages of development. Foreign financial aid from the EU, UK, US, Japan, Australia, New Zealand, Canada, UN agencies, and Taiwan

accounts for 20-25% of GDP. Remittances from seamen on merchant ships abroad account for more than \$5 million each year. Kiribati receives around \$15 million annually for the government budget from an Australian trust fund.

KOREA, NORTH

INTRODUCTION

Background: An independent kingdom for much of its long history, Korea was occupied by Japan beginning in 1905 following the Russo-Japanese War. Five years later, Japan formally annexed the entire peninsula. Following World War II, Korea was split with the northern half coming under Soviet-sponsored Communist control. After failing in the Korean War (1950-53)

to conquer the US-backed Republic of Korea (ROK) in the southern portion by force, North Korea (DPRK), under its founder President KIM Il Sung, adopted a policy of ostensible diplomatic and economic "self-reliance" as a check against outside influence. The DPRK demonized the US as the ultimate threat to its social system through state-funded propaganda, and molded political, economic, and mili-

tary policies around the core ideological objective of eventual unification of Korea under Pyongyang's control. KIM Il Sung's son, the current ruler KIM Jong Il, was officially designated as his father's successor in 1980, assuming a growing political and managerial role until the elder KIM's death in 1994. In 2010, KIM Jong Il began the process of preparing the way for his youngest son, KIM Jong Un, to succeed

him in power. After decades of economic mismanagement and resource misallocation, the DPRK since the mid-1990s has relied heavily on international aid to feed its population. North Korea's history of regional military provocations, proliferation of military-related items, long-range missile development, WMD programs including tests of nuclear devices in 2006 and 2009, and massive conventional armed forces are of major concern to the international community. The regime has marked 2012, the centenary of KIM Il Sung's birth, a banner year; to that end, the country has been focused on development of the economy.

ECONOMY

Economy—overview: North Korea, one of the world's most centrally directed and least open economies, faces chronic economic problems. Industrial capital stock is nearly beyond repair as a result of years of underinvestment, shortages of spare parts, and poor maintenance. Large-scale military spending draws off resources needed for investment and civilian consumption. Industrial and power output have stagnated for years at a fraction of pre-1990 levels. Frequent weather-related crop failures aggravated chronic food shortages caused by on-going systemic problems, including a lack of arable land, collective farming practices, poor soil quality, insufficient fertilization, and persistent shortages of tractors and fuel. Large-scale international food aid deliveries have allowed the people of North Korea to escape widespread starvation since famine threatened in 1995, but the population continues to suffer from prolonged malnutrition and poor living conditions. Since 2002, the government has allowed private "farmers' markets" to begin selling a wider range of goods. It also permitted some private farming—on an experimental basis—in an effort to boost agricultural output. In October 2005, the government tried to reverse some of these policies by forbidding private sales of grains and reinstituting a centralized food rationing system. By December 2005, the government terminated most international humanitarian assistance operations in North Korea (calling instead for developmental assistance only) and restricted the activities of remaining international and non-governmental aid organizations. In mid-2008, North Korea began receiving food aid under a US program to deliver 500,000 metric tons of food via the World Food Program and US nongovernmental organizations; but Pyongyang stopped accepting the aid in March 2009. In December 2009, North Korea carried out a redenomination of its currency, capping the amount of North Korean won that could be exchanged for the new notes, and limiting the exchange to a one-week

window. A concurrent crackdown on markets and foreign currency use yielded severe shortages and inflation, forcing Pyongyang to ease the restrictions by February 2010. In response to the sinking of the South Korean destroyer Cheonan and the shelling of Yeonpyong Island, South Korea's government cut off most aid, trade, and bilateral cooperation activities, with the exception of operations at the Kaesong Industrial Complex. The year 2012 will be the 100th anniversary of Kim Il-sung's birthday. The North Korean government often highlights its 2012 goal of becoming a "strong and prosperous" nation. Attracting foreign investment, especially from neighboring China, will be a key factor for improving the overall standard of living. Nevertheless, firm political control remains the government's overriding concern, which likely will inhibit changes to North Korea's current economic system.

TRANSNATIONAL ISSUES

Disputes—international: risking arrest, imprisonment, and deportation, tens of thousands of North Koreans cross into China to escape famine, economic privation, and political oppression; North Korea and China dispute the sovereignty of certain islands in Yalu and Tumen rivers; Military Demarcation Line within the 4-km wide Demilitarized Zone has separated North from South Korea since 1953; periodic incidents in the Yellow Sea with South Korea which claims the Northern Limiting Line as a maritime boundary; North Korea supports South Korea in rejecting Japan's claim to Liancourt Rocks (Tok-do/Take-shima)

Refugees and internally displaced persons: **IDPs:** undetermined (flooding in mid-2007 and famine during mid-1990s) (2007)

Trafficking in persons: current situation: North Korea is a source country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; the most common form of trafficking involves North Korean women and girls who cross the border into China voluntarily; additionally, North Korean women and girls are lured out of North Korea to escape poor social and economic conditions by the promise of food, jobs, and freedom, only to be forced into prostitution, marriage, or exploitative labor arrangements once in China

tier rating: Tier 3—North Korea does not fully comply with minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government does not acknowledge the existence of human rights abuses in the country or recognize trafficking, either within the country or transnationally; North Korea has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs: for years, from the 1970s into the 2000s, citizens of the Democratic People's Republic of (North) Korea (DPRK), many of them diplomatic employees of the government, were apprehended abroad while trafficking in narcotics, including two in Turkey in December 2004; police investigations in Taiwan and Japan in recent years have linked North Korea to large illicit shipments of heroin and methamphetamine, including an attempt by the North Korean merchant ship Pong Su to deliver 150 kg of heroin to Australia in April 2003

KOREA, SOUTH

INTRODUCTION

Background: An independent Korean state or collection of states has existed almost continuously for several millennia. Between its initial unification in the 7th century—from three predecessor Korean states—until the 20th century, Korea existed as a single independent country. In 1905, following the Russo-Japanese War, Korea became a protectorate of imperial Japan, and in 1910 it was annexed as a colony. Korea regained its independence following Japan's surrender to the United States in 1945. After World War II, a Republic of Korea (ROK) was set up in the southern half of the Korean Peninsula while a Communist-style government was installed in the north (the DPRK). During the Korean War (1950-53), US troops and UN forces fought alongside soldiers from the ROK to defend South Korea from DPRK attacks supported by China and the Soviet Union. An armistice was signed in 1953, splitting the peninsula along a demilitarized zone at about the 38th parallel. Thereafter, South Korea achieved rapid economic growth with per capita income rising to roughly 17 times the level of North Korea. In 1993, KIM Young-sam became South Korea's first civilian president following 32 years of military rule. South Korea today is a fully functioning modern democracy. President LEE Myung-bak has pursued a policy of global engagement since taking office in February 2008, highlighted by Seoul's hosting of the G-20 summit in November 2010. Serious tensions with North Korea have punctuated inter-Korean relations in recent years, including the North's sinking of the South Korean warship Cheonan in March 2010 and its artillery attack on South Korean soldiers and citizens in November 2010.

ECONOMY

Economy—overview: Since the 1960s, South Korea has achieved an incredible record of growth and global integration to become a high-tech industrialized economy. Four decades ago, GDP per capita was comparable with levels in the poorer countries of Africa and Asia. In 2004, South Korea joined the trillion dollar club of world economies, and currently is among the world's 20 largest economies. Initially, a system of close government and business ties, including directed credit and import restrictions, made this success possible. The government promoted the import of raw materials and technology at the expense of consumer goods, and encouraged savings and investment over consumption. The Asian financial crisis of 1997-98 exposed longstanding weaknesses in South Korea's development model including high debt/equity ratios and massive short-term foreign borrowing. GDP plunged by 6.9% in 1998, and then recovered by 9% in 1999-2000. Korea adopted numerous economic reforms following the crisis, including greater openness to foreign investment and imports. Growth moderated to about 4.5% annually between 2003 and 2007. With the global economic downturn in late 2008, South Korean GDP growth slowed to 0.2% in 2009. In the third quarter of 2009, the economy began to recover, in large part due to export growth, low interest rates, and an expansionary fiscal policy, and growth exceeded 6% in 2010. The South Korean economy's long term challenges include a rapidly aging population, inflexible labor market, and overdependence on manufacturing exports to drive economic growth.

KOSOVO

INTRODUCTION

Background: The central Balkans were part of the Roman and Byzantine Empires before ethnic Serbs migrated to the territories of modern Kosovo in the 7th century. During the medieval period, Kosovo became the center of a Serbian Empire and saw the construction of many important Serb religious sites, including many architecturally significant Serbian Orthodox monasteries. The defeat of Serbian forces at the Battle of Kosovo in 1389 led to five centuries of Ottoman rule during which large numbers of Turks and Albanians moved to Kosovo. By the end of the 19th century, Albanians replaced the Serbs as the dominant ethnic group in Kosovo. Serbia reacquired control over Kosovo from the Ottoman Empire during the First Balkan War of 1912. After World War II, Kosovo became an autonomous province of Serbia in the Socialist Federal Republic of Yugoslavia (S.F.R.Y.) with status almost equivalent to that of a republic under the 1974 S.F.R.Y. constitution. Despite legislative concessions, Albanian nationalism increased in the 1980s, which led to riots and calls for Kosovo's independence. At the same time, Serb nationalist leaders, such as Slobodan MILOSEVIC, exploited Kosovo Serb claims of maltreatment to secure votes from supporters, many of whom viewed Kosovo as their cultural heartland. Under MILOSEVIC's leadership, Serbia instituted a new constitution in 1989 that

revoked Kosovo's status as an autonomous province of Serbia. Kosovo Albanian leaders responded in 1991 by organizing a referendum that declared Kosovo independent. Under MILOSEVIC, Serbia carried out repressive measures against the Albanians in the early 1990s as the unofficial Kosovo government, led by Ibrahim RUGOVA, used passive resistance in an attempt to try to gain international assistance and recognition of an independent Kosovo. Albanians dissatisfied with RUGOVA's passive strategy in the 1990s created the Kosovo Liberation Army and launched an insurgency. Starting in 1998, Serbian military, police, and paramilitary forces under MILOSEVIC conducted a brutal counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians. Approximately 800,000 Albanians were forced from their homes in Kosovo during this time. International attempts to mediate the conflict failed, and MILOSEVIC's rejection of a proposed settlement led to a three-month NATO military operation against Serbia beginning in March 1999 that forced Serbia to agree to withdraw its military and police forces from Kosovo. UN Security Council Resolution 1244 (1999) placed Kosovo under a transitional administration, the UN Interim Administration Mission in Kosovo (UNMIK), pending a determination of Kosovo's future status. A UN-led process began in late 2005 to determine Kosovo's final status. The negotiations ran in stages between 2006 and 2007, but ended without agreement between Belgrade and Pristina. On 17 February 2008, the Kosovo Assembly declared Kosovo independent. Since then, over 70 countries have recognized Kosovo, and it has joined the International Monetary Fund and World Bank. Serbia continues to reject Kosovo's independence and in October 2008, it sought an advisory opinion from the International Court of Justice (ICJ) on the legality under international law of Kosovo's declaration of independence. The ICJ released the advisory opinion in July 2010 affirming that Kosovo's declaration of independence did not violate general principles of international law, UN

Security Council Resolution 1244, or the Constitutive Framework. The opinion was closely tailored to Kosovo's unique history and circumstances.

ECONOMY

Economy—overview: Over the past few years Kosovo's economy has shown significant progress in transitioning to a market-based system and maintaining macroeconomic stability, but it is still highly dependent on the international community and the diaspora for financial and technical assistance. Remittances from the diaspora—located mainly in Germany, Switzerland, and the Nordic countries—are estimated to account for about 13-15% of GDP, and donor-financed activities and aid for another 7.5%. Kosovo's citizens are the poorest in Europe with an average annual per capita income of only \$2,800. Unemployment, around 40% of the population, is a significant problem that encourages outward migration and black market activity. Most of Kosovo's population lives in rural towns outside of the capital, Pristina. Inefficient, near-subsistence farming is common—the result of small plots, limited mechanization, and lack of technical expertise. With international assistance, Kosovo has been able to privatize 50% of its state-owned enterprises (SOEs) by number, and over 90% of SOEs by value. Minerals and metals—including lignite, lead, zinc, nickel, chrome, aluminum, magnesium, and a wide variety of construction materials—once formed the backbone of industry, but output has declined because of ageing equipment and insufficient investment. A limited and unreliable electricity supply due to technical and financial problems is a major impediment to economic development, but Kosovo has received technical assistance to help improve accounting and controls. The US Government is cooperating with the Ministry for Energy and Mines and the World Bank to prepare a commercial tender for a project to include construction of a new power plant and the development of a coal mine to supply the new power plant as well as two existing plants. Privatization of the distribution and supply divisions of Kosovo Energy Corporation is also planned. The official currency of Kosovo is the euro, but the Serbian dinar is also used in Serb enclaves. Kosovo's tie to the euro has helped keep core inflation low. Kosovo has one of the most open economies in the region, and continues to work with the international community on measures to improve the business environment and attract foreign investment. Kosovo has maintained a budget surplus as a result of efficient value added tax (VAT) collection at the borders and inefficient budget execution. In order to help integrate Kosovo into regional economic structures, UNMIK signed (on behalf of Kosovo) its accession to the Central Europe Free Trade Area (CEFTA) in 2006. However, Serbia and Bosnia have refused to recognize Kosovo's customs stamp or extend reduced tariff privileges for Kosovo products under CEFTA. In July 2008, Kosovo received pledges of \$1.9 billion from 37 countries in support of its reform priorities. In June 2009, Kosovo joined the World Bank and International

Monetary Fund, and Kosovo began servicing its share of the former Yugoslavia's debt.

KUWAIT

INTRODUCTION

Background: Britain oversaw foreign relations and defense for the ruling Kuwaiti AL-SABAH dynasty from 1899 until independence in 1961. Kuwait was attacked and overrun by Iraq on 2 August 1990. Following several weeks of aerial bombardment, a US-led, UN coalition began a ground assault on 23 February 1991 that liberated Kuwait in four days. Kuwait spent more than \$5 billion to repair oil infrastructure damaged during 1990-91. The AL-SABAH family has ruled since returning to power in 1991 and reestablished an elected legislature that in recent years has become increasingly assertive. The country witnessed the historic election in May 2009 of four women to its National Assembly. Amid the 2010-11 uprisings and protests across the Arab world, stateless Arabs, known as bidoon, staged small protests in February and March 2011 demanding citizenship, jobs, and other benefits available to Kuwaiti nationals. Youth activist groups—supported by opposition legislators and the prime minister's rivals within the ruling family—in March of 2011 rallied for an end to corruption and the prime minister's ouster.

ECONOMY

Economy—overview: Kuwait has a geographically small, but wealthy, relatively open economy with self-reported crude oil reserves of about 102 billion barrels—about 9% of world reserves. Petroleum accounts for nearly half of GDP, 95% of export revenues, and 95% of government income. Kuwaiti officials have committed to increasing oil production to 4 million barrels per day by 2020. The rise in global oil prices throughout 2010 is reviving government consumption and economic growth as Kuwait experiences a 20% increase in government budget revenue. Kuwait has done little to diversify its economy, in part, because of this positive fiscal situation, and, in part, due to the poor business climate and the acrimonious relationship between the National Assembly and the executive branch, which has stymied most movement on economic reforms. Nonetheless, the government in May 2010 passed a privatization bill that allows the government to sell assets to private investors, and in January passed an economic development plan that pledges to spend up to \$130 billion in five years to diversify the economy away from oil, attract more investment, and boost private sector participation in the economy. Increasing government expenditures by so large an amount during the planned time frame may be difficult to accomplish.

Transnational Issues

Disputes—international: Kuwait and Saudi Arabia continue negotiating a joint maritime boundary with Iran; no maritime boundary exists with Iraq in the Persian Gulf

Trafficking in persons: current situation:

Kuwait is a destination country for men and women who migrate legally from South and Southeast Asia for domestic or low-skilled labor, but are subjected to conditions of involuntary servitude by employers in Kuwait including conditions of physical and sexual abuse, non-payment of wages, confinement to the home, and withholding of passports to restrict their freedom of movement; Kuwait is reportedly a transit point for South and East Asian workers recruited for low-skilled work in Iraq; some of these workers are deceived as to the true location and nature of this work, and others are subjected to conditions of involuntary servitude in Iraq

tier rating: Tier 3—Kuwaiti government has shown an inability to define trafficking and has demonstrated insufficient political will to address human trafficking adequately; much of the human trafficking found in Kuwait involves domestic workers in private residences and the government is reluctant to prosecute Kuwaiti citizens; the government has not enacted legislation targeting human trafficking nor established a permanent shelter for victims of trafficking (2009)

KYRGYZSTAN

INTRODUCTION

Background: A Central Asian country of incredible natural beauty and proud nomadic traditions, most of Kyrgyzstan was formally annexed to Russia in 1876. The Kyrgyz staged a major revolt against the Tsarist Empire in 1916 in which almost one-sixth of the Kyrgyz population was killed. Kyrgyzstan became a Soviet republic in 1936 and achieved independence in 1991 when the USSR dissolved. Nationwide demonstrations in the spring of 2005 resulted in the ouster of President Askar AKAIEV, who had run the country since 1990. Subsequent presidential elections in July 2005 were won overwhelmingly by former prime minister Kurmanbek BAKIEV. Over the next few years, the new president manipulated the parliament to accrue new powers for himself. In July 2009, after months of harassment against his opponents and media critics, BAKIEV won re-election in a presidential campaign that the international community deemed flawed. In April 2010, nationwide protests led to the resignation and expulsion of BAKIEV. He was replaced by President Roza OTUNBAEVA who will serve as president until 31 December 2011 according to a presidential decree issued 19 May 2010. Presidential elections are scheduled to be held in October 2011. Continuing concerns include: endemic corruption, poor interethnic relations, and terrorism.

ECONOMY

Economy—overview: Kyrgyzstan is a poor, mountainous country with a dominant agricultural sector. Cotton, tobacco, wool, and meat are the main agricultural products, although only tobacco and cotton are exported in any quantity. Industrial exports include gold, mercury, uranium, natural gas, and electricity. The economy depends heavily on gold exports—mainly from output at the Kumtor gold mine. Following independence, Kyrgyzstan was progressive in carrying out market reforms, such as an improved regulatory system and land reform. Kyrgyzstan was the first Commonwealth of Independent States (CIS) country to be accepted into the World Trade Organization. Much of the government's stock in enterprises has been sold. Drops in production had been severe after the breakup of the Soviet Union in December 1991, but by mid-1995, production began to recover and exports began to increase. In 2005, the BAKIEV government and international financial institutions initiated a comprehensive medium-term poverty reduction and economic growth strategy. Bishkek agreed to pursue much needed tax reform and, in 2006, became eligible for the heavily indebted poor countries (HIPC) initiative. The government made steady strides in controlling its substantial fiscal deficit, nearly closing the gap between revenues and expenditures in 2006, before boosting expenditures more than 20% in 2007-08. GDP grew about 8% annually in 2007-08, partly due to higher gold prices internationally, but slowed to 2.3% in 2009. The overthrow of President BAKIEV in April, 2010 and subsequent ethnic clashes left hundreds dead and damaged infrastructure. Shrinking trade and agricultural production, as well as political instability, caused GDP to contract about 3.5% in 2010. The fiscal deficit widened to 11% of GDP, reflecting significant increases in crisis-related spending, including both rehabilitation of damaged infrastructure and bank

recapitalization. Progress in reconstruction, fighting corruption, restructuring domestic industry, and attracting foreign aid and investment are key to future growth.

LAOS

INTRODUCTION

Background: Modern-day Laos has its roots in the ancient Lao kingdom of Lan Xang, established in the 14th Century under King FA NGUM. For 300 years Lan Xang had influence reaching into present-day Cambodia and Thailand, as well as over all of what is now Laos. After centuries of gradual decline, Laos came under the domination of Siam (Thailand) from the late 18th century until the late 19th century when it became part of French Indochina. The Franco-Siamese Treaty of 1907 defined the current Lao border with Thailand. In 1975, the Communist Pathet Lao took control of the government ending a six-century-old monarchy and instituting a strict socialist regime closely aligned to Vietnam. A gradual, limited return to private enterprise and the liberalization of foreign investment laws began in 1988. Laos became a member of ASEAN in 1997.

ECONOMY

Economy—overview: The government of Laos, one of the few remaining one-party Communist states, began decentralizing control and encouraging private enterprise in 1986. The results, starting from an extremely low base, were striking—growth averaged 6% per year from 1988-2008 except during the short-lived drop caused by the Asian financial crisis that began in 1997. Despite this high growth rate, Laos remains a country with an underdeveloped infrastructure, particularly in rural areas. It has a rudimentary, but improving, road system, and limited external and internal telecommunications. China has signed a deal with the Lao to build a high speed rail system in the country. Construction on the \$7 billion project is slated to begin in April 2011 and will take five years. Electricity is available in urban areas and in many rural districts. Subsistence agriculture, dominated by rice cultivation in lowland areas, accounts for about 30% of GDP and 75% of total employment. The government in FY09/10 received \$586 million from international donors. Economic growth has reduced official poverty rates from 46% in 1992 to 26% in 2010. The economy has benefited from high foreign investment in hydropower, mining, and construction. Laos gained Normal Trade Relations status with the US in 2004, and is taking steps required to join the World Trade

Organization, such as reforming import licensing. Related trade policy reforms will improve the business environment. On the fiscal side, Laos initiated a VAT tax system in 2010. Simplified investment procedures and expanded bank credits for small farmers and small entrepreneurs will improve Lao's economic prospects. The government appears committed to raising the country's profile among investors. The World Bank has declared that Laos's goal of graduating from the UN Development Program's list of least-developed countries by 2020 is achievable. According to Laotian officials, the 7th Socio-Economic Development Plan for 2011-15 will outline efforts to achieve Millennium Development Goals.

female: 73,038 (2010 est.)

Military expenditures: 0.5% of GDP (2006)

country comparison to the world: 163

Military—note: serving one of the world's least developed countries, the Lao People's Armed Forces (LPAF) is small, poorly funded, and ineffectively resourced; its mission focus is border and internal security, primarily in countering ethnic Hmong insurgent groups; together with the Lao People's Revolutionary Party and the government, the Lao People's Army (LPA) is the third pillar of state machinery, and as such is expected to suppress political and civil unrest and similar national emergencies, but the LPA also has upgraded skills to respond to avian influenza outbreaks; there is no perceived external threat to the state and the LPA maintains strong ties with the neighboring Vietnamese military (2008)

TRANSNATIONAL ISSUES

Disputes—international: Southeast Asian states have enhanced border surveillance to check the spread of avian flu; talks continue on completion of demarcation with Thailand but disputes remain over islands in the Mekong River; concern among Mekong Commission members that China's construction of dams on the Mekong River will affect water levels; Cambodia is concerned about Laos' extensive upstream dam construction

Illicit drugs: estimated opium poppy cultivation in 2008 was 1,900 hectares, about a 73% increase from 2007; estimated potential opium production in 2008 more than tripled to 17 metric tons; unsubstantiated reports of domestic methamphetamine production; growing domestic methamphetamine problem (2007)

LATVIA

INTRODUCTION

Background: The name "Latvia" originates from the ancient Latgilians, one of four eastern Baltic tribes that formed the ethnic core of the Latvian people (ca. 8th-12th centuries A.D.). The region subsequently came under the control of Germans, Poles, Swedes, and finally, Russians. A Latvian republic emerged following World War I, but it was annexed by the USSR in 1940—an action never recognized by the US and many other countries. Latvia reestablished its independence in 1991 following the breakup of the Soviet Union. Although the last Russian troops left in 1994, the status of the Russian minority (some 30% of the population) remains of concern to Moscow. Latvia joined both NATO and the EU in the spring of 2004.

ECONOMY

Economy—overview: Latvia is a small, open economy with exports contributing significantly to its GDP. Due to its geographical location, transit services are highly-developed, along with timber and wood-processing, agriculture and food products, and manufacturing of machinery and electronic devices. The bulk of the country's economic activity, however, is in the services sector. Corruption continues to be an impediment to attracting FDI flows and Latvia's low birth rate and decreasing population are major challenges to its long-term economic vitality. Latvia's economy experienced GDP growth of more than 10% per year during 2006-07, but entered a severe recession in 2008 as a result of an unsustainable current account deficit and large debt exposure amid the softening world economy. GDP plunged 18% in 2009—the three Baltic states had the world's worst declines that year. Thanks to strong export growth in 2009 and 2010, the economy experienced its first real quarterly GDP growth in over two years (2.9%) in the third quarter of 2010. The IMF, EU, and other international donors provided substantial financial assistance to Latvia as part of an agreement to defend the currency's peg to the euro. This agreement calls for reduction of Latvia's fiscal deficit to below 3% of GDP by 2012, in order to meet the Maastricht Treaty criteria for euro adoption. DOMBROVSKIS' government enacted major spending cuts to reduce the fiscal deficit to a maximum of 8.5% of GDP in 2010, and Latvia has approved a 2011 budget

with a projected deficit of 5.4% of GDP. The majority of companies, banks, and real estate have been privatized, although the state still holds sizable stakes in a few large enterprises. Latvia officially joined the World Trade Organization in February, 1999. EU membership, a top foreign policy goal, came in May 2004. Latvia's current major financial policy goal, entrance into the euro zone, is targeted for 2014.

TRANSNATIONAL ISSUES

Disputes—international: Russia demands better Latvian treatment of ethnic Russians in Latvia; boundary demarcated with Latvia and Lithuania; the Latvian parliament has not ratified its 1998 maritime boundary treaty with Lithuania, primarily due to concerns over oil exploration rights; as a member state that forms part of the EU's external border, Latvia has implemented the strict Schengen border rules with Russia
Illicit drugs: transshipment and destination point for cocaine, synthetic drugs, opiates, and cannabis from Southwest Asia, Western Europe, Latin America, and neighboring Balkan countries; despite improved legislation, vulnerable to money laundering due to nascent enforcement capabilities and comparatively weak regulation of offshore companies and the gaming industry; CIS organized crime (including counterfeiting, corruption, extortion, stolen cars, and prostitution) accounts for most laundered proceeds

LEBANON

INTRODUCTION

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French separated out the region of Lebanon in 1920, and granted this area independence in 1943. A lengthy civil war (1975-90) devastated the country, but Lebanon has since made progress toward rebuilding its political institutions. Under the Ta'if Accord—the blueprint for national reconciliation—the Lebanese established a more equitable political system, particularly by giving Muslims a greater voice in the political process while institutionalizing sectarian divisions in the government. Since the end of the war, Lebanon has conducted several successful elections. Most militias have been reduced or disbanded, with the exception of Hizballah, designated by the US State Department as a Foreign Terrorist Organization, and Palestinian militant groups. During Lebanon's civil war, the Arab League legitimized in the Ta'if Accord Syria's troop deployment,

numbering about 16,000 based mainly east of Beirut and in the Bekaa Valley. Israel's withdrawal from southern Lebanon in May 2000 and the passage in September 2004 of UNSCR 1559—a resolution calling for Syria to withdraw from Lebanon and end its interference in Lebanese affairs—encouraged some Lebanese groups to demand that Syria withdraw its forces as well. The assassination of former Prime Minister Rafiq HARIRI and 22 others in February 2005 led to massive demonstrations in Beirut against the Syrian presence (“the Cedar Revolution”), and Syria withdrew the remainder of its military forces in April 2005. In May-June 2005, Lebanon held its first legislative elections since the end of the civil war free of foreign interference, handing a majority to the bloc led by Sa'ad HARIRI, the slain prime minister's son. In July 2006, Hizballah kidnapped two Israeli soldiers leading to a 34-day conflict with Israel in which approximately 1,200 Lebanese civilians were killed. UNSCR 1701 ended the war in August 2006, and Lebanese Armed Forces (LAF) deployed throughout the country for the first time in decades, charged with securing Lebanon's borders against weapons smuggling and maintaining a weapons-free zone in south Lebanon with the help of the UN Interim Force in Lebanon (UNIFIL). The LAF in May-September 2007 battled Sunni extremist group Fatah al-Islam in the Nahr al-Barid Palestinian refugee camp, winning a decisive victory, but destroying the camp and displacing 30,000 Palestinian residents. Lebanese politicians in November 2007 were unable to agree on a successor to Emile LAHUD when he stepped down as president, creating a political vacuum until the election of LAF Commander Gen. Michel SULAYMAN in May 2008 and the formation of a new unity government in

July 2008. Legislative elections in June 2009 again produced victory for the bloc led by Sa'ad HARIRI, but a period of prolonged negotiation over the composition of the cabinet ensued. A national unity government was finally formed in November 2009 and approved by the National Assembly the following month. In January 2010, Lebanon assumed a nonpermanent seat on the UN Security Council for the 2010-11 term. Inspired by the popular revolts that began in late 2010 against dictatorships across the Middle East and North Africa, marches and demonstrations in Lebanon were directed instead against sectarian politics. Protesters saw the country's religious sectarian politics as the primary cause of Lebanon's anemic government. The first protests in late February 2011, although limited in size, gained some traction.

ECONOMY

Economy—overview: Lebanon has a free-market economy and a strong laissez-faire commercial tradition. The government does not restrict foreign investment; however, the investment climate suffers from red tape, corruption, arbitrary licensing decisions, high taxes, tariffs, and fees, archaic legislation, and weak intellectual property rights. The Lebanese economy is service-oriented; main growth sectors include banking and tourism. The 1975-90 civil war seriously damaged Lebanon's economic infrastructure, cut national output by half, and all but ended Lebanon's position as a Middle Eastern entrepot and banking hub. In the years since, Lebanon has rebuilt much of its war-torn physical and financial infrastructure by borrowing heavily—mostly from domestic banks. In an attempt to reduce the ballooning national debt, the Rafiq HARIRI government in 2000 began an austerity program, reining in government expenditures, increasing revenue collection, and passing legislation to privatize state enterprises, but economic and financial reform initiatives stalled and public debt continued to grow despite receipt of more than \$2 billion in bilateral assistance at the 2002 Paris II Donors Conference. The Israeli-Hizballah conflict in July-August 2006 caused an estimated \$3.6 billion in infrastructure damage, and prompted international donors to pledge nearly \$1 billion in recovery and reconstruction assistance. Donors met again in January 2007 at the Paris III Donor Conference and pledged more than \$7.5 billion to Lebanon for development projects and budget support, conditioned on progress on Beirut's fiscal reform and privatization program. An 18-month political stalemate and sporadic sectarian and political violence hampered economic activity, particularly tourism, retail sales, and investment, until the new government was formed in July 2008. Political stability following the Doha Accord of May 2008 helped boost tourism and, together with a strong banking sector, enabled real GDP growth of 7% per year in 2009-10 despite a slowdown in the region.

TRANSNATIONAL ISSUES

Disputes—international: lacking a treaty or other documentation describing the boundary, portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms area in the Israeli-occupied Golan Heights; the roughly 2,000-strong UN Interim Force in Lebanon (UNIFIL) has been in place since 1978

Illicit drugs: cannabis cultivation dramatically reduced to 2,500 hectares in 2002 despite continued significant cannabis consumption; opium poppy cultivation minimal; small amounts of Latin American cocaine and Southwest Asian heroin transit country on way to European markets and for Middle Eastern consumption; money laundering of drug proceeds fuels concern that extremists are benefiting from drug trafficking

LESOTHO

INTRODUCTION

Background: Basutoland was renamed the Kingdom of Lesotho upon independence from the UK in 1966. The Basuto National Party ruled for the first two decades. King MOSHOESHOE was exiled in 1990, but returned to Lesotho in 1992 and was rein-

stated in 1995 and subsequently succeeded by his son, King LETSIE III, in 1996. Constitutional government was restored in 1993 after seven years of military rule. In 1998, violent protests and a military mutiny following a contentious election prompted a brief but bloody intervention by South African and Botswana military

forces under the aegis of the Southern African Development Community. Subsequent constitutional reforms restored relative political stability. Peaceful parliamentary elections were held in 2002, but the National Assembly elections of February 2007 were hotly contested and aggrieved parties continue to dispute how the

lative powers; under traditional law the college of chiefs has the power to depose the monarch, determine who is next in the line of succession, or who shall serve as regent in the event that the successor is not of mature age

Legislative branch: bicameral Parliament consists of the Senate (33 members—22 principal chiefs and 11 other members appointed by the ruling party) and the Assembly (120 seats, 80 by popular vote and 40 by proportional vote; members elected by popular vote to serve five-year terms)

elections: last held on 17 February 2007 (next to be held in 2012)

election results: percent of vote by party—NA; seats by party—LCD 61, NIP 21, ABC 17, LWP 10, ACP 4, BNP 3, other 4

Judicial branch: High Court (chief justice appointed by the monarch acting on the advice of the prime minister); Court of Appeal; Magistrate Courts; customary or traditional court

Political parties and leaders: Alliance of Congress Parties or ACP (including the Lesotho People's Congress or LCP [Khebone MAOPE], the Basotholand African Congress or BAC [Khaueho RALL-APOLE], and a faction of the Basotho Congress Party or BCP [Ntsukanyane MPHANYA]); All Basotho Convention or ABC [Thomas THABANE]; Basotho Batho Democratic Party or BBDP; Basotho Congress Party or BCP; Basotho Democratic National Party or BDNP [Thabang NYEOE]; Basotho National Party or BNP [vacant]; Basotholand African National Congress or BANC; Christian Democratic Party or CDP [Enerst RAMOKOENA]; Lesotho Congress for Democracy or LCD [Pakalitha MOSISILI] (the governing party); Lesotho Workers Party or LWP [Macaefa BILLY]; National Independent Party or NIP [Anthony MANYELI]

proportions of 3:4:3; the colors represent rain, peace, and prosperity respectively; centered in the white stripe is a black Basotho hat representing the indigenous people; the flag was unfurled in October 2006 to celebrate 40 years of independence

National anthem: *name:* "Lesotho fatse la bo nnt'a rona" (Lesotho, Land of Our Fathers)

lyrics/music: Francois COILLARD/Ferdinand-Samuel LAUR

note: adopted 1967; the anthem's music derives from an 1823 Swiss songbook

ECONOMY

Economy—overview: Small, landlocked, and mountainous, Lesotho relies on remittances from Basotho employed in South Africa, customs duties from the Southern Africa Customs Union (SACU), and export revenue for the majority of government revenue. However, the government has recently strengthened its tax system to reduce dependency on customs duties. Completion of a major hydropower facility in January 1998 permitted the sale of water to South Africa and generated royalties for Lesotho. Lesotho produces about 90% of its own electrical power needs. As the number of mineworkers has declined steadily over the past several years, a small manufacturing base has developed based on farm products that support the milling, canning, leather, and jute industries, as well as an apparel-assembly sector. Despite Lesotho's market-based economy being heavily tied to its neighbor South Africa, the US is an important trade partner because of the export sector's heavy dependence on apparel exports. Exports have grown significantly because of the trade benefits contained in the Africa Growth and Opportunity Act. Most of the labor force is engaged in subsistence agriculture, especially livestock herding, although drought has decreased agricultural activity. The extreme inequality in the distribution of income remains a major drawback. Lesotho has signed an Interim Poverty Reduction and Growth Facility with the IMF. In July 2007, Lesotho signed a Millennium Challenge Account Compact with the US worth \$362.5 million. Economic growth dropped in 2009, due mainly to the effects of the global economic crisis as demand for the country's exports declined and SACU revenue fell precipitously when South Africa—the primary contributor to the SACU revenue pool—went into recession, but growth returned to 3.5% in 2010.

Military—note: Lesotho's declared policy is maintenance of its independent sovereignty and preservation of internal security; in practice, external security is guaranteed by South Africa; restructuring of the Lesotho Defense Force (LDF) and Ministry of Defense and Public Service over the past five years has focused on subordinating the defense apparatus to civilian control and restoring the LDF's cohesion; the restructuring has considerably improved capabilities and professionalism, but the LDF is disproportionately large for a small, poor country; the government has outlined a reduction to a planned 1,500-man strength, but these plans have met with vociferous resistance from the political opposition and from inside the LDF (2008)

LIBERIA

INTRODUCTION

Background: Settlement of freed slaves from the US in what is today Liberia began in 1822; by 1847, the Americo-Liberians were able to establish a republic. William TUBMAN, president from 1944-71, did much to promote foreign investment and to bridge the economic, social, and political gaps between the descendants of the original settlers and the inhabitants of the interior. In 1980, a military coup led by Samuel DOE ushered in a decade of authoritarian rule. In December 1989, Charles TAYLOR launched a rebellion against DOE's regime that led to a prolonged civil war in which DOE himself was killed. A period of relative peace in 1997 allowed for elections that brought TAYLOR to power, but major fighting

resumed in 2000. An August 2003 peace agreement ended the war and prompted the resignation of former president Charles TAYLOR, who faces war crimes charges in The Hague related to his involvement in Sierra Leone's civil war. After two years of rule by a transitional government, democratic elections in late 2005 brought President Ellen JOHNSON SIRLEAF to power. The UN Mission in Liberia (UNMIL) maintains a strong presence throughout the country, but the security situation is still fragile and the process of rebuilding the social and economic structure of this war-torn country continues.

assistance for revenue. Civil war and government mismanagement destroyed much of Liberia's economy, especially the infrastructure in and around the capital, Monrovia. Many businesses fled the country, taking capital and expertise with them, but with the conclusion of fighting and the installation of a democratically-elected government in 2006, several have returned. Liberia has the distinction of having the highest ratio of direct foreign investment to GDP in the world. Richly endowed with water, mineral resources, forests, and a climate favorable to agriculture, Liberia had been a producer and exporter of basic products, primarily raw timber and rubber and is reviving those sectors. Local manufacturing, mainly foreign owned, had been small in scope. President JOHNSON SIRLEAF, a Harvard-trained banker and administrator, has taken steps to reduce corruption, build support from international donors, and encourage private investment. Embargos on timber and diamond exports have been lifted, opening new sources of revenue for the government and Liberia shipped its first major timber exports to Europe in 2010. The country reached its Heavily Indebted Poor Countries initiative completion point in 2010 and nearly \$5 billion of international debt was permanently eliminated. This new status will enable Liberia to establish a sovereign credit rating and issue bonds. Liberia's Paris Club creditors agreed to cancel Liberia's debt as well. Rebuilding infrastructure and raising incomes will depend on generous financial and technical assistance from donor countries and foreign investment in key sectors, such as infrastructure and power generation.

TRANSNATIONAL ISSUES

Disputes—international: although civil unrest continues to abate with the assistance of 18,000 UN Mission in Liberia (UNMIL) peacekeepers, as of January 2007, Liberian refugees still remain in Guinea, Cote d'Ivoire, Sierra Leone, and Ghana; Liberia, in turn, shelters refugees fleeing turmoil in Cote d'Ivoire; despite the presence of over 9,000 UN forces (UNOCI) in Cote d'Ivoire since 2004, ethnic conflict continues to spread into neighboring states who can no longer send their migrant workers to Ivorian cocoa plantations; UN sanctions ban Liberia from exporting diamonds and timber

Refugees and internally displaced persons: refugees (country of origin): 12,600 (Cote d'Ivoire)

IDPs: 13,000 (civil war from 1990-2004; IDP resettlement began in November 2004) (2007)

Illicit drugs: transshipment point for Southeast and Southwest Asian heroin and South American cocaine for the European and US markets; corruption, criminal activity, arms-dealing, and diamond trade provide significant potential for money laundering, but the lack of well-developed financial system limits the country's utility as a major money-laundering center.

LIBYA

INTRODUCTION

Background: The Italians supplanted the Ottoman Turks in the area around

Tripoli in 1911 and did not relinquish their hold until 1943 when defeated in World War II. Libya then passed to UN administration and achieved independence in 1951. Following a 1969 military coup, Col. Muammar Abu Minyar al-QADHAFI began to espouse his own political system, the Third Universal Theory. The system is a combination of socialism and Islam derived in part from tribal practices and is supposed to be implemented by the Libyan people themselves in a unique form of "direct democracy." QADHAFI has always seen himself as a revolutionary and visionary leader. He used oil funds during the 1970s and 1980s to promote his ideology outside Libya, supporting subversives and terrorists abroad to hasten the end of Marxism and capitalism. In addition, beginning in 1973, he engaged in military operations

in northern Chad's Aozou Strip—to gain access to minerals and to use as a base of influence in Chadian politics—but was forced to retreat in 1987. UN sanctions in 1992 isolated QADHAFI politically following the downing of Pan AM Flight 103 over Lockerbie, Scotland. During the 1990s, QADHAFI began to rebuild his relationships with Europe. UN sanctions were suspended in April 1999 and finally lifted in September 2003 after Libya accepted responsibility for the Lockerbie bombing. In December 2003, Libya announced that it had agreed to reveal and end its programs to develop weapons of mass destruction and to renounce terrorism. QADHAFI subsequently made significant strides in normalizing relations with Western nations. He hosted various Western European leaders as well as many working-level and commercial delegations,

and made his first trip to Western Europe in 15 years when he traveled to Brussels in April 2004. The US rescinded Libya's designation as a state sponsor of terrorism in June 2006. In August 2008, the US and Libya signed a bilateral comprehensive claims settlement agreement to compensate claimants in both countries who allege injury or death at the hands of the other country, including the Lockerbie bombing, the LaBelle disco bombing, and the UTA 772 bombing. In October 2008, the US Government received \$1.5 billion pursuant to the agreement to distribute to US national claimants, and as a result effectively normalized its bilateral relationship with Libya. The two countries then exchanged ambassadors for the first time since 1973 in January 2009. Libya in May 2010 was elected to its first three-year seat on the UN Human Rights Council, prompting protests from international non-governmental organizations and human rights campaigners. Unrest that began in several Near Eastern and North African countries in late December 2010 spread to several Libyan cities in February 2011. In response to QADHAFF's harsh military crackdown on protesters, the UN Security Council adopted Resolution 1973, which demanded an immediate ceasefire and authorized the international community to establish a no-fly zone over Libya.

ECONOMY

Economy—overview: The Libyan economy depends primarily upon revenues from the oil sector, which contribute about 95% of export earnings, 25% of GDP, and 80%

of government revenue. The weakness in world hydrocarbon prices in 2009 reduced Libyan government tax income and constrained economic growth. Substantial revenues from the energy sector coupled with a small population give Libya one of the highest per capita GDPs in Africa, but little of this income flows down to the lower orders of society. Libyan officials in the past five years have made progress on economic reforms as part of a broader campaign to reintegrate the country into the international fold. This effort picked up steam after UN sanctions were lifted in September 2003 and as Libya announced in December 2003 that it would abandon programs to build weapons of mass destruction. The process of lifting US unilateral sanctions began in the spring of 2004; all sanctions were removed by June 2006, helping Libya attract greater foreign direct investment, especially in the energy sector. Libyan oil and gas licensing rounds continue to draw high international interest; the National Oil Corporation (NOC) set a goal of nearly doubling oil production to 3 million bbl/day by 2012. In November 2009, the NOC announced that that target may slip to as late as 2017. Libya faces a long road ahead in liberalizing the socialist-oriented economy, but initial steps—including applying for WTO membership, reducing some subsidies, and announcing plans for privatization—are laying the groundwork for a transition to a more market-based economy. The non-oil manufacturing and construction sectors, which account for more than 20% of GDP, have expanded from processing mostly agricultural products to include the production of petrochemicals, iron, steel, and aluminum. Climatic conditions and poor soils severely limit agricultural output, and Libya imports about 75% of its food. Libya's primary agricultural water source remains the Great Manmade River Project, but significant resources are being invested in desalinization research to meet growing water demands.

LIECHTENSTEIN

INTRODUCTION

Background: The Principality of Liechtenstein was established within the Holy Roman Empire in 1719. Occupied by both French and Russian troops during the Napoleonic wars, it became a sovereign state in 1806 and joined the Germanic

Confederation in 1815. Liechtenstein became fully independent in 1866 when the Confederation dissolved. Until the end of World War I, it was closely tied to Austria, but the economic devastation caused by that conflict forced Liechtenstein to enter into a customs and monetary

union with Switzerland. Since World War II (in which Liechtenstein remained neutral), the country's low taxes have spurred outstanding economic growth. In 2000, shortcomings in banking regulatory oversight resulted in concerns about the use of financial institutions for money

laundering. However, Liechtenstein implemented anti-money-laundering legislation and a Mutual Legal Assistance Treaty with the US that went into effect in 2003.

ECONOMY

Economy—overview: Despite its small size and limited natural resources, Liechtenstein has developed into a prosperous, highly industrialized, free-enterprise economy with a vital financial service sector and likely the second highest per capita income in the world. The Liechtenstein economy is widely diversified with a large number of small businesses. Low business taxes—the maximum tax rate is 20%—and easy incorporation rules have induced many holding companies to establish nominal offices in Liechtenstein providing 30% of state revenues. The country participates in a customs union with Switzerland and uses the Swiss franc as its national currency. It imports more than 90% of its energy requirements. Liechtenstein has been a member of the European Economic Area (an organization serving as a bridge between the European Free Trade Association (EFTA) and the EU) since May 1995. The government is working to harmonize its economic policies with those of an integrated Europe. In 2008, Liechtenstein came under renewed international pressure—particularly from Germany—to improve transparency in its banking and tax systems. In December 2008, Liechtenstein signed a Tax Information Exchange Agreement with the US. Upon Liechtenstein's conclusion of 12 bilateral information-sharing agreements, the OECD in October 2009 removed the principality from its "grey list" of countries that had yet to implement the organization's Model Tax Convention. By the end of 2010, Liechtenstein had signed 25 Tax Information Exchange Agreements or Double Tax Agreements.

LITHUANIA

INTRODUCTION

Background: Lithuanian lands were united under MINDAUGAS in 1236; over the next century, through alliances and conquest, Lithuania extended its territory to include most of present-day Belarus and Ukraine. By the end of the 14th century Lithuania was the largest state in Europe. An alliance with Poland in 1386 led the two countries into a union through the person of a common ruler. In 1569, Lithuania and Poland formally united into a single dual state, the Polish-Lithuanian Commonwealth. This entity survived until 1795 when its remnants were partitioned by surrounding countries. Lithuania regained its independence following World War I but was annexed by the USSR in 1940—an action never recognized by the US and many other countries. On 11 March 1990, Lithuania became the first of the Soviet republics to declare its independence, but Moscow did not recognize this proclamation until September of 1991 (following the abortive coup in Moscow). The last Russian troops withdrew in 1993. Lithuania subsequently restructured its economy for integration into Western European institutions; it joined both NATO and the EU in the spring of 2004.

ECONOMY

Economy—overview: Lithuania gained membership in the World Trade Organization and joined the EU in May 2004. Despite Lithuania's EU accession, Lithuania's trade with its Central and Eastern European neighbors, and Russia in particular, accounts for a growing percentage of total trade. Privatization of the large, state-owned utilities is nearly complete. Foreign government and business support have helped in the transition from the old

command economy to a market economy. Lithuania's economy grew on average 8% per year for the four years prior to 2008 driven by exports and domestic demand. However, GDP plunged nearly 15% in 2009—during the 2008-09 crisis the three former Soviet Baltic republics had the world's worst economic declines. In 2009, the government launched a high-profile campaign, led by Prime Minister KUBILIUS, to attract foreign investment and to develop export markets. The current account deficit, which had risen to roughly 15% of GDP in 2007-08, recovered to a surplus of 4% 2009 and 3.4% in 2010 in the wake of a cutback in imports to almost half the 2008 level. Nevertheless, economic growth was flat and unemployment continued upward to 17.9% in 2010.

TRANSNATIONAL ISSUES

Disputes—international: Lithuania and Russia committed to demarcating their boundary in 2006 in accordance with the land and maritime treaty ratified by Russia in May 2003 and by Lithuania in 1999; Lithuania operates a simplified transit regime for Russian nationals traveling from the Kaliningrad coastal exclave into Russia, while still conforming,

as a EU member state having an external border with a non-EU member, to strict Schengen border rules; boundary demarcated with Latvia and Lithuania; as of January 2007, ground demarcation of the boundary with Belarus was complete and

mapped with final ratification documents in preparation

Illicit drugs: transshipment and destination point for cannabis, cocaine, ecstasy, and opiates from Southwest Asia, Latin America, Western Europe, and neighboring

Baltic countries; growing production of high-quality amphetamines, but limited production of cannabis, methamphetamines; susceptible to money laundering despite changes to banking legislation

LUXEMBOURG

INTRODUCTION

Background: Founded in 963, Luxembourg became a grand duchy in 1815 and an independent state under the Netherlands. It lost more than half of its territory to Belgium in 1839 but gained a larger measure of autonomy. Full independence was attained in 1867. Overrun by Germany in both world wars, it ended its neutrality in 1948 when it entered into the Benelux Customs Union and when it joined NATO the following year. In 1957, Luxembourg became one of the six founding countries of the European Economic Community (later the European Union), and in 1999 it joined the euro currency area.

ECONOMY

Economy—overview: This small, stable, high-income economy—benefiting from its

proximity to France, Belgium, and Germany—has historically featured solid growth, low inflation, and low unemployment. The industrial sector, initially dominated by steel, has become increasingly diversified to include chemicals, rubber, and other products. Growth in the financial sector, which now accounts for about 28% of GDP, has more than compensated for the decline in steel. Most banks are foreign owned and have extensive foreign dealings, but Luxembourg has lost some of its advantages as a tax haven because of OECD and EU pressure. The economy depends on foreign and cross-border workers for about 60% of its labor force. Luxembourg, like all EU members, suffered from the global economic crisis that began in late 2008, but unemployment has trended below the EU average. Following strong expansion from 2004 to 2007, Luxembourg's economy contracted and 3.7% in 2009, but rebounded 3.2% in 2010. The country continues to enjoy an extraordinarily high standard of living—GDP per capita ranks third in the world, after Liechtenstein and Qatar, and is the highest in the EU. Turmoil in the world financial markets and lower global demand during 2008-09 prompted the government to inject capital into the banking sector and implement stimulus measures to boost the economy. Government stimulus measures and support for the banking sector, however, led to a 5% government budget deficit in 2009. Nevertheless, the deficit was cut below 3% in 2010.

INTRODUCTION

Background: Colonized by the Portuguese in the 16th century, Macau was the first European settlement in the Far East. Pursuant to an agreement signed by China and Portugal on 13 April 1987, Macau became the Macau Special Administrative Region (SAR) of the People's Republic of China on 20 December 1999. In this agreement, China promised that, under its "one country, two systems" formula, China's socialist economic system would not be practiced in Macau, and that Macau would enjoy a high degree of autonomy in all matters except foreign and defense affairs for the next 50 years.

ECONOMY

Economy—overview: Macau's economy slowed dramatically in 2009 as a result of the global economic slowdown, but strong growth resumed in 2010, largely on the back of strong tourism and gaming sectors. After opening up its locally-controlled casino industry to foreign competition in 2001, the territory attracted tens of billions of dollars in foreign investment, transforming Macau into one of the world's largest gaming center. Macau's gaming and tourism businesses were fueled by China's decision to relax travel restrictions on Chinese citizens wishing to visit Macau. By 2006, Macau's gaming revenue surpassed that of the Las Vegas strip, and gaming-related taxes accounted for more than 70% of total government revenue. In 2008, Macau

introduced measures to cool the rapidly developing sector. This city of nearly 552,300 hosted nearly 25 million visitors in 2010. Almost 53% came from mainland China. Macau's traditional manufacturing industry has virtually disappeared since the termination of the Multi-Fiber Agreement in 2005. In 2010, total exports were less than US\$900 million, while gaming receipts were almost US\$24 billion, a 58% increase over 2009. The Macau government plans to tighten control over the opening of new casinos and strengthen supervision of local casino operations in 2011 and has introduced measures to diversify the economy. The Closer Economic Partnership Agreement (CEPA) between Macau and mainland China that came into effect on 1 January 2004 offers Macau-made products tariff-free access to the mainland; nevertheless, China is Macau's second largest goods export market, behind Hong Kong, and followed by the United States. Macau's currency, the pataca, is closely tied to the Hong Kong dollar, which is also freely accepted in the territory.

MACEDONIA

INTRODUCTION

Background: Macedonia gained its independence peacefully from Yugoslavia in 1991. Greece's objection to the new state's use of what it considered a Hellenic name and symbols delayed international recognition, which occurred under the provisional designation of "the Former Yugoslav Republic of Macedonia." In 1995, Greece lifted a 20-month trade embargo and the two countries agreed to normalize relations. The United States began referring to Macedonia by its constitutional name, Republic of Macedonia, in 2004 and negotiations continue between Greece and Macedonia to resolve the name issue. Some ethnic Albanians, angered by perceived political and economic inequities, launched an insurgency in 2001 that eventually won

the support of the majority of Macedonia's Albanian population and led to the internationally-brokered Ohrid Framework Agreement, which ended the fighting by establishing a set of new laws enhancing the rights of minorities. Fully implementing the Framework Agreement and stimulating economic growth and development continue to be challenges for Macedonia, although progress has been made on both fronts over the past several years.

ECONOMY

Economy—overview: Having a small, open economy makes Macedonia vulnerable to economic developments in Europe and dependent on regional integration and progress toward EU membership for continued economic growth. At independence in September 1991, Macedonia was the least developed of the Yugoslav republics, producing a mere 5% of the

total federal output of goods and services. The collapse of Yugoslavia ended transfer payments from the central government and eliminated advantages from inclusion in a de facto free trade area. An absence of infrastructure, UN sanctions on the downsized Yugoslavia, and a Greek economic embargo over a dispute about the country's constitutional name and flag hindered economic growth until 1996. Since then, Macedonia has maintained macroeconomic stability with low inflation, but it has so far lagged the region in attracting foreign investment and creating jobs, despite making extensive fiscal and business sector reforms. Official unemployment remains high at 31.7%, but may be overstated based on the existence of an extensive gray market, estimated to be more than 20% of GDP, that is not captured by official statistics. In the wake of the global economic downturn, Macedonia has experienced decreased foreign direct investment, lowered credit, and a large trade deficit. However, as a result of conservative fiscal policies and a sound financial system, in 2010, the country received slightly improved credit ratings. Macroeconomic stability also was maintained by a prudent monetary policy, which kept the domestic currency at the pegged level against the euro, while interest rates were falling. As a result, GDP growth was modest, but positive, in 2010.

MADAGASCAR

INTRODUCTION

Background: Formerly an independent kingdom, Madagascar became a French colony in 1896 but regained independence in 1960. During 1992-93, free presidential and National Assembly elections were held ending 17 years of single-party rule. In 1997, in the second presidential race, Didier RATSIRAKA, the leader during the 1970s and 1980s, was returned to the presidency. The 2001 presidential election was contested between the followers of Didier RATSIRAKA and Marc RAVALOMANANA, nearly causing secession of half of the country. In April 2002, the High Constitutional Court announced RAVALOMANANA the winner. RAVALOMANANA achieved a

second term following a landslide victory in the generally free and fair presidential elections of 2006. In early 2009, protests over increasing restrictions on opposition press and activities resulted in RAVALOMANANA stepping down and the presidency was conferred to the mayor of Antananarivo, Andry RAJOELINA. Following negotiations in July and August of 2009, a power-sharing agreement with a 15-month transitional period was established, but has not yet been implemented.

ECONOMY

Economy—overview: After discarding socialist economic policies in the mid-1990s, Madagascar followed a World Bank- and IMF-led policy of privatization and liberalization that has been undermined since the start of the political crisis. This strategy placed the country on a slow and steady growth path from an extremely low level. Agriculture, including fishing and forestry, is a mainstay of the economy, accounting for more than one-fourth of GDP and employing 80% of the population. Exports of apparel have boomed in recent years primarily due to duty-free access to the US. However, Madagascar's failure to comply with the requirements of the African Growth and Opportunity Act (AGOA) led to the termination of the country's duty-free access in January 2010. Deforestation and erosion, aggravated by the use of firewood as the primary source of fuel, are serious concerns. Former President RAVALOMANANA worked aggressively to revive the economy following the 2002 political crisis, which triggered a 12% drop in GDP that year. The current political crisis which began in early 2009 has dealt additional blows to the economy. Tourism dropped more than 50% in 2009, compared with the previous year, and many investors are wary of entering the uncertain investment environment.

MALAWI

INTRODUCTION

Background: Established in 1891, the British protectorate of Nyasaland became the independent nation of Malawi in 1964. After three decades of one-party rule under President Hastings Kamuzu BANDA the country held multiparty elections in 1994, under a provisional constitution that came into full effect the following year. Current President Bingu wa MUTHARIKA, elected in May 2004 after a failed attempt by the

previous president to amend the constitution to permit another term, struggled to assert his authority against his predecessor and subsequently started his own party, the Democratic Progressive Party (DPP) in 2005. As president, MUTHARIKA has overseen some economic improvement. Population growth, increasing pressure on agricultural lands, corruption, and the spread of HIV/AIDS pose major problems for Malawi. MUTHARIKA was reelected to a second term in May 2009.

ECONOMY

Economy—overview: Landlocked Malawi ranks among the world's most densely populated and least developed countries. The economy is predominately agricultural with about 80% of the population living in rural areas. Agriculture, which has benefited from fertilizer subsidies since 2006, accounts for more than one-third of GDP and 90% of export revenues. The performance of the tobacco sector is key to short-term growth as tobacco accounts for more than half of exports. The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. In 2006, Malawi was approved for relief under the Heavily Indebted Poor Countries (HIPC) program. In December 2007, the US granted Malawi eligibility status to receive financial support within the Millennium Challenge Corporation (MCC) initiative. The government faces many challenges including developing a market economy, improving educational facilities, facing up to environmental problems, dealing with the rapidly growing problem of HIV/AIDS, and satisfying foreign donors that fiscal discipline is being tightened. Since 2005 President MUTHARIKA'S government has exhibited improved financial discipline under the guidance of Finance Minister Goodall GONDWE and signed a three year Poverty Reduction and Growth Facility worth \$56 million with the IMF. Improved relations

with the IMF lead other international donors to resume aid as well. The government has announced infrastructure projects that could yield improvements, such as a new oil pipeline, for better fuel access, and the potential for a waterway link through Mozambican rivers to the ocean, for better transportation options. Since 2009, however, Malawi has experienced some setbacks, including a general shortage of foreign exchange, which has damaged its ability to pay for imports, and fuel shortages that hinder transportation and productivity. Investment fell 23% in 2009, and continued to decline in 2010. The government has failed to address barriers to investment such as unreliable power, water shortages, poor telecommunications infrastructure, and the high costs of services.

MALAYSIA

INTRODUCTION

Background: During the late 18th and 19th centuries, Great Britain established colonies and protectorates in the area of current Malaysia; these were occupied by Japan from 1942 to 1945. In 1948, the British-ruled territories on the Malay

Peninsula formed the Federation of Malaya, which became independent in 1957. Malaysia was formed in 1963 when the former British colonies of Singapore and the East Malaysian states of Sabah and Sarawak on the northern coast of Borneo joined the Federation. The first

several years of the country's history were marred by a Communist insurgency, Indonesian confrontation with Malaysia, Philippine claims to Sabah, and Singapore's secession from the Federation in 1965. During the 22-year term of Prime Minister MAHATHIR bin Mohamad (1981-2003),

Malaysia was successful in diversifying its economy from dependence on exports of raw materials to expansion in manufacturing, services, and tourism. Current Prime Minister Mohamed NAJIB bin Abdul Razak (in office since April 2009) has continued these pro-business policies.

ECONOMY

Economy—overview: Malaysia, a middle-income country, has transformed itself since the 1970s from a producer of raw materials into an emerging multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move farther up the value-added production chain by attracting investments in Islamic finance, high technology industries, biotechnology, and services. The NAJIB administration also is continuing efforts to boost domestic demand and reduce the economy's dependence on exports. Nevertheless, exports—particularly of electronics, oil and gas, palm oil and rubber—remain a significant driver of the economy. As an oil and gas exporter, Malaysia has profited from higher world energy prices, although the rising cost of domestic gasoline and diesel fuel, combined with strained government finances, has forced Kuala Lumpur begin to reduce government subsidies. The government is also trying to lessen its dependence on state oil producer Petronas, which supplies more than 40% of government revenue. The central bank maintains healthy foreign exchange reserves and its well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments and the global financial crisis. Nevertheless, decreasing worldwide demand for consumer goods hurt Malaysia's exports and economic growth in 2009, although both showed signs of recovery in 2010. In order to attract increased investment, NAJIB has raised possible revisions to the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but he has encountered significant opposition, especially from Malay nationalists and other vested interests.

TRANSNATIONAL ISSUES

Disputes—international: while the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions over the Spratly Islands, it is not the legally binding “code of conduct” sought by some parties; Malaysia was not party to the March 2005 joint accord among the national oil companies of China, the Philippines, and Vietnam on conducting marine seismic activities in the Spratly Islands; disputes

continue over deliveries of fresh water to Singapore, Singapore’s land reclamation, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awards sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but does not rule on maritime regimes, boundaries, or disposition of South Ledge; ICJ awarded Ligitan and Sipadan islands, also claimed by Indonesia and Philippines, to Malaysia but left maritime boundary and sovereignty of Unarang rock in the hydrocarbon-rich Celebes Sea in dispute; separatist violence in Thailand’s predominantly Muslim southern provinces prompts measures to close and monitor border with Malaysia to stem terrorist activities; Philippines retains a dormant claim to Malaysia’s Sabah State in northern Borneo; Per Letters of Exchange signed in 2009, Malaysia in 2010 ceded two hydrocarbon concession blocks to Brunei in exchange for Brunei’s sultan dropping claims to the Limbang corridor, which divides Brunei; piracy remains a problem in the Malacca Strait

Refugees and internally displaced persons: refugees (country of origin): 15,174 (Indonesia); 21,544 (Burma) (2007)

Trafficking in persons: current situation: Malaysia is a destination and, to a lesser extent, a source and transit country for women and children trafficked for the purpose of commercial sexual exploitation, and men, women, and children for forced labor; Malaysia is mainly a destination country for men, women, and children who migrate willingly from South and Southeast Asia to work, some of whom are subjected to conditions of involuntary servitude by Malaysian employers in the domestic, agricultural, construction, plantation, and industrial sectors; to a lesser extent, some Malaysian women, primarily of Chinese ethnicity, are trafficked abroad for commercial sexual exploitation

tier rating: Tier 2 Watch List—the Government of Malaysia does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so, despite some progress in enforcing the 2007 comprehensive anti-trafficking law; it has yet to fully address labor trafficking in Malaysia; there are credible allegations of involvement of Malaysian immigration officials in trafficking and extorting Burmese refugees; the government did not develop mechanisms to effectively screen victims of trafficking in vulnerable groups and condones the confiscation of passports of migrant workers by employers (2009)

Illicit drugs: drug trafficking prosecuted vigorously and carries severe penalties; heroin still primary drug of abuse, but synthetic drug demand remains strong; continued ecstasy and methamphetamine producer for domestic users and, to a lesser extent, the regional drug market

MALDIVES

INTRODUCTION

Background: Maldives was long a sultanate, first under Dutch and then under British protection. It became a republic in 1968, three years after independence. President Maumoon Abdul GAYOOM dominated the islands' political scene for 30 years, elected to six successive terms by single-party referendums. Following riots in the capital Male in August 2004, the president and his government pledged to embark upon democratic reforms including a more representative political system and expanded political freedoms. Progress was sluggish, however, and many promised reforms were slow to be realized. Nonetheless, political parties were legalized in 2005. In June 2008, a political activist who had been jailed several years earlier by the former regime. Challenges facing President NASHEED include strengthening democracy and combating poverty and drug abuse. Maldives officials have played a prominent role in the international climate change discussion (due to the islands' low elevation and the threat from sea-level rise) and on the United Nations Human Rights Council.

ECONOMY

Economy—overview: Tourism, Maldives' largest economic activity, accounts for 28% of GDP and more than 60% of foreign exchange receipts. Over 90% of government tax revenue comes from import duties and tourism-related taxes. Fishing is the second leading sector, but the fish catch has dropped sharply in recent years. Agriculture and manufacturing continue to play a lesser role in the economy, constrained by the limited availability of cultivable land and the shortage of domestic labor. Most staple foods must be imported. In the last decade, real GDP growth averaged around 6% per year except for 2005, when GDP declined following the Indian Ocean tsunami, and in 2009, when GDP shrank by 3% as tourist arrivals declined and capital flows plunged in the wake of

the global financial crisis. Falling tourist arrivals and fish exports, combined with high government spending on social needs, subsidies, and civil servant salaries contributed to a balance of payments crisis, which was eased with a December 2009, \$79.3 million dollar IMF standby agreement. However, after the first two disbursements, the IMF withheld subsequent disbursements due to concerns over Maldives' growing budget deficit. Maldives has had chronic budget deficits in recent years and the government's plans to cut expenditures have not progressed well. A new Goods and Services Tax on Tourism (GST) was introduced in January 2011 and a new Business Profit Tax is to be introduced during the year. These taxes are expected to increase government revenue by about 25%. The government has privatized the main airport and is partially privatizing the energy sector. Tourism will remain the engine of the economy. The Government of the Maldives has aggressively promoted building new island resorts. Due to increasing tourist arrivals, the government expects GDP growth around 4.0% in 2011. Diversifying the economy beyond tourism and fishing, reforming public finance, and increasing employment opportunities are major challenges facing the government. Over the longer term Maldivian authorities worry about the impact of erosion and possible global warming on their low-lying country; 80% of the area is 1 meter or less above sea level.

MALI

INTRODUCTION

Background: The Sudanese Republic and Senegal became independent of France in 1960 as the Mali Federation. When Senegal withdrew after only a few months, what formerly made up the Sudanese Republic was renamed Mali. Rule

by dictatorship was brought to a close in 1991 by a military coup—led by the current president Amadou TOURE—enabling Mali's emergence as one of the strongest democracies on the continent. President Alpha KONARE won Mali's first democratic presidential election in 1992 and

was reelected in 1997. In keeping with Mali's two-term constitutional limit, KONARE stepped down in 2002 and was succeeded by Amadou TOURE, who was subsequently elected to a second term in 2007. The elections were widely judged to be free and fair.

ECONOMY

Economy—overview: Among the 25 poorest countries in the world, Mali is a landlocked country highly dependent on gold mining and agricultural exports for revenue. The country's fiscal status fluctuates with gold and agricultural commodity prices and the harvest. Mali remains dependent on foreign aid. Economic activity is largely confined to the riverine area irrigated by the Niger River and about 65% of its land area is desert or semidesert. About 10% of the population is nomadic and some 80% of the labor force is engaged in farming and fishing. Industrial activity is concentrated on processing farm commodities. The government has continued an IMF-recommended structural adjustment program that has helped the economy grow, diversify, and attract foreign investment. Mali is developing its cotton and iron ore extraction industries to diversify its revenue sources because gold production has started to fall. Mali has invested in tourism but security issues are hurting the industry. Mali's adherence to economic reform and the 50% devaluation of the CFA franc in January 1994 have pushed up economic growth to a 5% average in 1996-2010. Worker remittances and external trade routes for the landlocked country have been jeopardized by continued unrest in neighboring Cote d'Ivoire. However, Mali is building a road network that will connect it to all adjacent countries and it has a railway line to Senegal. In 2010, Mali experienced a regional drought that hurt livestock and livelihoods.

**INTRODUCTION**

Background: Great Britain formally acquired possession of Malta in 1814.

The island staunchly supported the UK through both world wars and remained in the Commonwealth when it became independent in 1964. A decade later Malta became a republic. Since about the mid-1980s, the island has transformed itself into a freight transshipment point, a financial center, and a tourist destination. Malta became an EU member in May 2004 and began using the euro as currency in 2008.

Flag description: two equal vertical bands of white (hoist side) and red; in the upper hoist-side corner is a representation of the George Cross, edged in red; according to legend, the colors are taken from the red and white checkered banner of Count Roger of Sicily who removed a bi-colored corner and granted it to Malta in 1091; an uncontested explanation is that the colors are those of the Knights of Saint John who ruled Malta from 1530 to 1798; in 1942, King George VI of the United Kingdom awarded the George Cross to the islanders for their exceptional bravery and gallantry in World War II; since independence in 1964, the George Cross bordered in red has appeared directly on the white field

ECONOMY

Economy—overview: Malta produces only about 20% of its food needs, has limited fresh water supplies, and has few domestic energy sources. Malta's geographic position between the EU and Africa makes it a target for illegal immigration, which has strained Malta's political and economic resources. Malta adopted the euro on 1 January 2008. Malta's financial services industry has grown in recent years and in 2008-09 it escaped significant damage from the international financial crisis, largely because the sector is centered on the indigenous real estate market and is not highly leveraged. Locally, the restricted damage from the financial crisis has been attributed to the stability of the Maltese banking system and to its prudent risk-management practices. The global economic downturn and high electricity and water prices hurt Malta's real economy, which is dependent on foreign trade, manufacturing—especially elec-

tronics and pharmaceuticals—and tourism, but growth bounced back as the global economy recovered in 2010. Following a 1.2% contraction in 2009, GDP grew 2% in 2010. In early 2011, the EU ended excessive deficit procedures against Malta, after Malta had taken measures to correct an excessive deficit in 2010 and appeared likely to reach its deficit target of 2.8% of GDP in 2011.

MARSHALL ISLANDS

INTRODUCTION

Background: After almost four decades under US administration as the eastern-most part of the UN Trust Territory of the Pacific Islands, the Marshall Islands attained independence in 1986 under a Compact of Free Association. Compen-

sation claims continue as a result of US nuclear testing on some of the atolls between 1947 and 1962. The Marshall Islands hosts the US Army Kwajalein Atoll (USAKA) Reagan Missile Test Site, a key installation in the US missile defense network.

GEOGRAPHY

Location: Oceania, two archipelagic island chains of 29 atolls, each made up of many small islets, and five single islands in the North Pacific Ocean, about half way between Hawaii and Australia

Geographic coordinates: 9 00 N, 168 00 E

Map references: Oceania

ECONOMY

Economy—overview: US Government assistance is the mainstay of this tiny island economy. The Marshall Islands received more than \$1 billion in aid from the US from 1986-2002. Agricultural production, primarily subsistence, is concentrated on small farms; the most important commercial crops are coconuts and breadfruit. Small-scale industry is limited to handicrafts, tuna processing, and copra. The tourist industry, now a small source of foreign exchange employing less than 10% of the labor force, remains the best hope for future added income. The islands have few natural resources, and imports far exceed exports. Under the terms of the Amended Compact of Free Association, the US will provide millions of dollars per year to the Marshall Islands (RMI) through 2023, at which time a Trust Fund made up of US and RMI contributions will begin perpetual annual payouts. Government downsizing, drought, a drop in construction, the decline in tourism, and less income from the renewal of fishing vessel licenses have held GDP growth to an average of 1% over the past decade.

MAURITANIA

INTRODUCTION

Background: Independent from France in 1960, Mauritania annexed the southern third of the former Spanish Sahara (now Western Sahara) in 1976 but relinquished it after three years of raids by the Polisario guerrilla front seeking independence for the territory. Maaouya Ould Sid Ahmed TAYA seized power in a coup in 1984 and ruled Mauritania with a heavy hand for more than two decades. A series of presidential elections that he held were widely seen as flawed. A bloodless coup in August 2005 deposed President TAYA and ushered in a military council that oversaw a transition to democratic rule. Independent candidate Sidi Ould Cheikh ABDALLAHI was inaugurated in April 2007 as Mauritania's first freely and fairly elected president. His term ended prematurely in August 2008 when a military junta led by General Mohamed Ould Abdel AZIZ deposed him and ushered in a military council government. AZIZ was subsequently elected president in July 2009 and sworn in the following month. The country continues to experience ethnic tensions among its black population (Afro-Mauritanians) and white and black Moor (Arab-Berber) communities, and is having to confront a growing terrorism threat by al-Qa'ida in the Islamic Maghreb (AQIM).

ECONOMY

Economy—overview: Half the population still depends on agriculture and livestock for a livelihood, even though many of the nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania has extensive deposits of iron ore, which account for nearly 40% of total exports. The nation's coastal waters are among the richest fishing areas in the world but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986. Before 2000, drought and economic mismanagement resulted in a buildup of foreign debt. In February 2000, Mauritania qualified for debt relief under the Heavily Indebted Poor Countries (HIPC) initiative and nearly all of its foreign debt has since been forgiven. A new investment code approved in December 2001 improved the opportunities for direct foreign investment. Mauritania and the IMF agreed to a three-year Poverty Reduction and Growth Facility (PRGF) arrangement in 2006. Mauritania made satisfactory progress, but the IMF, World Bank, and other international actors suspended assistance and investment in Mauritania after the August 2008 coup. Since the presidential election in July 2009, donors have resumed assistance. Oil prospects, while initially promising, have largely failed to materialize, and the government has placed a priority on attracting private investment to spur economic growth. The

Government also emphasizes reduction of poverty, improvement of health and education, and privatization of the economy.

TRANSNATIONAL ISSUES

Disputes—international: Mauritanian claims to Western Sahara remain dormant

Trafficking in persons: current situation: Mauritania is a source and destination country for children trafficked for forced labor and sexual exploitation; slavery-related practices, rooted in ancestral master-slave relationships, continue to exist in isolated parts of the country;

Mauritanian boys called talibe are trafficked within the country by religious teachers for forced begging; children are also trafficked by street gangs within the country that force them to steal, beg, and sell drugs; girls are trafficked internally for domestic servitude and sexual exploitation; women and children from neighboring states are trafficked into Mauritania for purposes of forced

begging, domestic servitude, and sexual exploitation

tier rating: Tier 3—the Government of Mauritania does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government did not show evidence of overall progress in prosecuting and punishing trafficking offenders, protecting trafficking victims,

or preventing new incidents of trafficking during the past year; progress that the previous government demonstrated in 2007 through enactment of strengthened anti-slavery legislation and deepened political will to eliminate slavery and trafficking has stalled; law enforcement efforts to address human trafficking including traditional slavery practices decreased (2009)

MAURITIUS

INTRODUCTION

Background: Although known to Arab and Malay sailors as early as the 10th century, Mauritius was first explored by the Portuguese in the 16th century and subsequently settled by the Dutch—who named it in honor of Prince Maurits van NASSAU—in the 17th century. The French assumed control in 1715, developing the island into an important naval base overseeing Indian Ocean trade, and establishing a plantation economy of sugar cane. The British captured the island in 1810, during the Napoleonic Wars. Mauritius remained a strategically important British naval base, and later an air station, playing an important role during World War II for anti-submarine and convoy operations, as well as the collection of signals intelligence. Independence from the UK was attained in 1968. A stable democracy with regular free elections and a positive human rights record, the country has attracted considerable foreign investment and has earned one of Africa's highest per capita incomes. Recent poor weather, declining sugar prices, and declining textile and apparel production, have slowed economic growth, leading to some protests over standards of living in the Creole community.

ECONOMY

Economy—overview: Since independence in 1968, Mauritius has developed from a low-income, agriculturally based economy to a middle-income diversified economy with growing industrial, financial, and tourist sectors. For most of the period, annual growth has been in the order of 5% to 6%. This remarkable achievement has been reflected in more equitable income distribution, increased life expectancy, lowered infant mortality, and a much-improved infrastructure. The economy rests on sugar, tourism, textiles and apparel, and financial services, and is expanding into fish processing, information and communications technology, and hospitality and property development. Sugarcane is grown on about 90% of the cultivated land area and accounts for 15% of export earnings. The government's development strategy centers on creating vertical and horizontal clusters of development in these sectors. Mauritius has attracted more than 32,000 offshore entities, many aimed at commerce in India, South Africa, and China. Investment in the banking sector alone has reached over \$1 billion. Mauritius, with its strong textile sector, has been well poised to take advantage of the Africa Growth and Opportunity Act (AGOA). Mauritius' sound economic policies and prudent banking practices helped to mitigate negative effects from the global financial crisis in 2008-09. GDP grew 3.6% in 2010 and the country continues to expand its trade and investment outreach around the globe.

TRANSNATIONAL ISSUES

Disputes—international: Mauritius and Seychelles claim the Chagos Islands; claims French-administered Tromelin Island
Illicit drugs: consumer and transshipment point for heroin from South Asia;

small amounts of cannabis produced and consumed locally; significant offshore financial industry creates potential for money laundering, but corruption levels are relatively low and the government appears generally to be committed to regulating its banking industry

MEXICO

INTRODUCTION

Background: The site of advanced Amerindian civilizations, Mexico came under Spanish rule for three centuries before achieving independence early in the 19th century. A devaluation of the peso in late 1994 threw Mexico into economic turmoil, triggering the worst recession in over half a century. The global financial crisis beginning in late 2008 caused another massive economic downturn the following year. As the economy recovers, ongoing economic and social concerns include low real wages, underemployment for a large segment of the population, inequitable income distribution, and few advancement opportunities for the largely Amerindian population in the impoverished southern states. The elections held in 2000 marked the first time since the 1910 Mexican Revolution that an opposition candidate—Vicente FOX of the National Action Party (PAN)—defeated the party in government, the Institutional Revolutionary Party (PRI). He was succeeded in 2006 by another PAN candidate Felipe CALDERON. National elections, including the presidential election, are scheduled for July 2012. Since 2007, Mexico's powerful drug-trafficking organizations have engaged in bloody feuding, resulting in tens of thousands of drug-related homicides.

Natural hazards: tsunamis along the Pacific coast, volcanoes and destructive earthquakes in the center and south, and hurricanes on the Pacific, Gulf of Mexico, and Caribbean coasts

volcanism: Mexico experiences volcanic activity in the central-southern part of the country; the volcanoes in Baja California are mostly dormant; Colima (elev. 3,850 m), which erupted in 2010, is Mexico's most active volcano and is responsible for

causing periodic evacuations of nearby villagers; it has been deemed a "Decade Volcano" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to its explosive history and close proximity to human populations; Popocatepetl (elev. 5,426 m) poses a threat to Mexico City; other historically active volcanoes include Barcena, Ceboruco, El Chichon, Michoacan-Guanajuato, Pico de Orizaba, San Martin, Socorro, and Tacana

Environment—current issues: scarcity of hazardous waste disposal facilities; rural to urban migration; natural freshwater resources scarce and polluted in north, inaccessible and poor quality in center and extreme southeast; raw sewage and industrial effluents polluting rivers in urban areas; deforestation; widespread erosion; desertification; deteriorating agricultural lands; serious air and water pollution in the national capital and urban centers along US-Mexico border; land subsidence in Valley of Mexico caused by groundwater depletion

Flag description: three equal vertical bands of green (hoist side), white, and red; Mexico's coat of arms (an eagle with a snake in its beak perched on a cactus) is centered in the white band; green signifies hope, joy, and love; white represents peace and honesty; red stands for hardiness, bravery, strength, and valor; the coat of arms is derived from a legend that the wandering Aztec people were to settle at a location where they would see an eagle on a cactus eating a snake; the city they founded, Tenochtitlan, is now Mexico City

note: similar to the flag of Italy, which is shorter, uses lighter shades of red and green, and does not have anything in its white band

National anthem: name: "Himno Nacional Mexicano" (National Anthem of Mexico)

lyrics/music: Francisco Gonzalez BOCANEGRA/Jaime Nuno ROCA

note: adopted 1943, in use since 1854; the anthem is also known as "Mexicanos, al grito de Guerra" (Mexicans, to the War Cry); according to tradition, Francisco Gonzalez BOCANEGRA, an accomplished poet, was uninterested in submitting lyrics to a national anthem contest; his fiancée locked him in a room and refused to release him until the lyrics were completed

ECONOMY

Economy—overview: Mexico has a free market economy in the trillion dollar class. It contains a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. Recent administrations have expanded competition in seaports, railroads, telecommunications, electricity generation, natural gas distribution, and airports. Per capita income is roughly one-third that of the US; income distribution remains highly unequal. Since the implementation of the North American Free Trade Agreement (NAFTA) in 1994, Mexico's share of US imports has increased from 7% to 12%, and its share of Canadian imports has doubled to 5%. Mexico has free trade agreements with over 50 countries including, Guatemala, Honduras, El Salvador, the European Free Trade Area, and Japan, putting more than 90% of trade under free trade agreements. In 2007, during its first year in office, the Felipe CALDERON administration was able to garner support from the opposition to successfully pass pension and fiscal reforms. The administration passed an energy reform measure in 2008 and another fiscal reform in 2009. Mexico's GDP declined 6.5% in 2009 as world demand for exports dropped, asset prices tumbled, and remittances and investment declined. GDP posted positive growth of 5% in 2010, with exports—particularly to the United States—leading the way, while domestic consumption and investment lagged. The administration continues to face many economic challenges, including improving the public education system, upgrading infrastructure, modernizing labor laws, and fostering private investment

in the energy sector. CALDERON has stated that his top economic priorities remain reducing poverty and creating jobs.

TRANSNATIONAL ISSUES

Disputes—international: abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; the US has intensified security

measures to monitor and control legal and illegal personnel, transport, and commodities across its border with Mexico; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States; Belize and Mexico are working to solve minor border demarcation discrepancies arising from inaccuracies in the 1898 border treaty

Refugees and internally displaced persons: IDPs: 5,500–10,000 (government's quashing of Zapatista uprising in 1994 in eastern Chiapas Region) (2007)

Illicit drugs: major drug-producing nation; cultivation of opium poppy in 2007 rose to 6,900 hectares yielding a potential production of 18 metric tons of pure heroin, or

50 metric tons of "black tar" heroin, the dominant form of Mexican heroin in the western United States; marijuana cultivation increased to 8,900 hectares in 2007 and yielded a potential production of 15,800 metric tons; government conducts the largest independent illicit-crop eradication program in the world; continues as the primary transshipment country for US-bound cocaine from South America, with an estimated 90% of annual cocaine movements toward the US stopping in Mexico; major drug syndicates control the majority of drug trafficking throughout the country; producer and distributor of ecstasy; significant money-laundering center; major supplier of heroin and largest foreign supplier of marijuana and methamphetamine to the US market (2007)

MICRONESIA, FEDERATED STATES OF**INTRODUCTION**

Background: In 1979 the Federated States of Micronesia, a UN Trust Territory under US administration, adopted a constitution. In 1986 independence was attained under a Compact of Free Association with the US, which was amended and renewed in 2004. Present concerns include large-scale unemployment, overfishing, and overdependence on US aid.

ECONOMY

Economy—overview: Economic activity consists primarily of subsistence farming and fishing. The islands have few mineral deposits worth exploiting, except for high-grade phosphate. The potential for a tourist industry exists, but the remote location, a lack of adequate facilities, and limited air connections hinder development. Under the original terms of the Compact of Free Association, the US provided \$1.3 billion in grant aid during the period 1986-2001; the level of aid has been subsequently reduced. The Amended Compact of Free Association with the US guarantees the Federated States of Micronesia (FSM) millions of dollars in annual aid through 2023, and establishes a Trust Fund into which the US and the FSM make annual contributions in order to provide annual payouts to the FSM in perpetuity after 2023. The country's medium-term economic outlook appears fragile due not only to the reduction in US assistance but also to the current slow growth of the private sector.

MOLDOVA

INTRODUCTION

Background: Part of Romania during the
 interwar period, Moldova was incorpo-
 rated into the Soviet Union at the close of
 World War II. Although the country has
 been independent from the USSR since
 1991, Russian forces have remained on
 Moldovan territory east of the Dniester
 River supporting the Slavic majority
 population, mostly Ukrainians and
 Russians, who have proclaimed a “Trans-
 nistria” republic. One of the poorest
 nations in Europe, Moldova became
 the first former Soviet state to elect a
 Communist, Vladimir VORONIN, as its
 president in 2001. VORONIN served as
 Moldova’s president until he resigned in
 September 2009, following the opposi-
 tion’s gain of a narrow majority in July
 parliamentary elections and the Commu-
 nist Party’s (PCRM) subsequent inability
 to attract the three-fifths of parliamen-
 tary votes required to elect a president.
 Moldova’s four opposition parties
 formed a new coalition, the Alliance for
 European Integration (AIE), which acted
 as Moldova’s governing coalition until
 December 2010. Moldova experienced
 significant political uncertainty in 2009
 and 2010, holding three general elections
 (in April 2009, July 2009, and November

2010) and four presidential ballots in
 parliament, all of which failed to secure a
 president. Following the November 2010
 parliamentary elections, a reconstituted
 AIE-coalition of three parties formed a
 government, but remains two votes short
 of the three-fifths majority required to
 elect a president.

ECONOMY

Economy—overview: Moldova remains one of the poorest countries in Europe despite recent progress from its small economic base. It enjoys a favorable climate and good farmland but has no major mineral deposits. As a result, the economy depends heavily on agriculture, featuring fruits, vegetables, wine, and tobacco. Moldova must import almost all of its energy supplies. Moldova's dependence on Russian energy was underscored at the end of 2005, when a Russian-owned electrical station in Moldova's separatist Transnistria region cut off power to Moldova and Russia's Gazprom cut off natural gas in disputes over pricing. In January 2009, gas supplies were cut during a dispute between Russia and Ukraine. Russia's decision to ban Moldovan wine and agricultural products, coupled with its decision to double the price Moldova paid for Russian natural gas, have hurt growth. The onset of the global financial crisis and poor economic conditions in Moldova's main foreign markets caused GDP to fall 6% in 2009. Unemployment almost doubled and inflation disappeared—at -0.1%, a record low. Moldova's IMF agreement expired in May 2009. In fall 2009, the IMF allocated \$186 million to Moldova to cover its immediate budgetary needs, and the government

signed a new agreement with the IMF in January 2010 for a program worth \$574 million. In 2010, an upturn in the world economy boosted GDP growth to 6.5% and inflation to 7.3%. Economic reforms have been slow because of corruption and strong political forces backing government controls. Nevertheless, the government's primary goal of EU integration has resulted in some market-oriented progress. The granting of EU trade preferences and increased exports to Russia will encourage higher growth rates, but the agreements are unlikely to serve as a panacea, given the extent to which export success depends on higher quality standards and other factors. The economy has made a modest recovery, but remains vulnerable to political uncertainty, weak administrative capacity, vested bureaucratic interests, higher fuel prices, poor agricultural weather, and the skepticism of foreign investors as well as the presence of an illegal separatist regime in Moldova's Transnistria region.

TRANSNATIONAL ISSUES

Disputes—international: Moldova and Ukraine operate joint customs posts to monitor the transit of people and commodities through Moldova's break-away Transnistria region, which remains under OSCE supervision

Trafficking in persons: current situation: Moldova is a major source and, to a lesser extent, a transit country for women and girls trafficked for the purpose of commercial sexual exploitation; Moldovan women are trafficked to the Middle East, Eastern Europe, and Western Europe; girls and young women are trafficked within the country from rural areas to Chisinau; children are also trafficked to neighboring countries for forced labor and begging; labor trafficking of men to work in the construction, agriculture, and service sectors of Russia is increasingly a problem; according to an ILO report, Moldova's national Bureau of Statistics

estimated that there were likely over 25,000 Moldovan victims of trafficking for forced labor in 2008

tier rating: Tier 2 Watch List—The Government of Moldova does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; despite initial efforts to combat trafficking-related complicity since the government's reassessment on the Tier 2 Watch List in

September 2008, and increased victim assistance, the government did not demonstrate sufficiently meaningful efforts to curb trafficking-related corruption, which is a government-acknowledged problem in Moldova; the government improved victim protection efforts, deployed more law-enforcement officers in the effort and contributed direct financial assistance

toward victim protection and assistance for the first time (2010)

Illicit drugs: limited cultivation of opium poppy and cannabis, mostly for CIS consumption; transshipment point for illicit drugs from Southwest Asia via Central Asia to Russia, Western Europe, and possibly the US; widespread crime and underground economic activity

MONACO

INTRODUCTION

Background: The Genoese built a fortress on the site of present day Monaco in 1215. The current ruling Grimaldi family first seized temporary control in 1297, and again in 1331, but were not able to permanently secure their holding until 1419. Economic development was spurred in the late 19th century with a railroad linkup to France and the opening of a casino. Since then, the principality's mild climate, splendid scenery, and gambling facilities have made Monaco world famous as a tourist and recreation center.

ECONOMY

Economy—overview: Monaco, bordering France on the Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The principality also is a major banking center and has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. Monaco, however, is not a tax-free shelter; it charges nearly 20% value-added tax, collects stamp duties, and companies face a 33% tax on profits unless they can show that three-quarters of profits are generated within the principality. Monaco was formally removed from the OECD's "gray list" of uncooperative tax jurisdictions in late 2009, but continues to face international pressure to abandon its banking secrecy laws and help combat tax evasion. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas.

MONGOLIA

INTRODUCTION

Background: The Mongols gained fame in the 13th century when under Chinggis KHAAN they established a huge Eurasian empire through conquest. After his death the empire was divided into several powerful Mongol states, but these broke apart in the 14th century. The Mongols eventually retired to their original steppe homelands and in the late 17th century came under Chinese rule. Mongolia won its independence in 1921 with Soviet backing and a Communist regime was installed in 1924. The modern country of Mongolia, however, represents only part of the Mongols' historical homeland; more ethnic Mongolians live in the Inner Mongolia Autonomous Region in the People's Republic of China than in Mongolia. Following a peaceful democratic revolution, the ex-Communist Mongolian People's Revolutionary Party (MPRP) won elections in 1990 and 1992, but was defeated by the Democratic Union Coalition (DUC) in the 1996 parliamentary election. The MPRP won an overwhelming majority in the 2000 parliamentary election, but the party lost seats in the 2004 election and shared power with democratic coalition parties from 2004–08. The MPRP regained a solid majority in the 2008 parliamentary elections but nevertheless formed a coalition government with the Democratic Party. In 2010 the MPRP voted to retake the name of the Mongolian People's Party (MPP), a name it used in the early 1920s. The prime minister and most cabinet members are MPP members.

ECONOMY

Economy—overview: Economic activity in Mongolia has traditionally been based on herding and agriculture—Mongolia's extensive mineral deposits, however, have attracted foreign investors. The country holds copper, gold, coal, molybdenum, fluorspar, uranium, tin, and tungsten deposits, which account for a large part of foreign direct investment and government revenues. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990 and 1991 at the time of the dismantlement of the USSR. The following decade saw Mongolia endure both deep recession, because of political inaction and natural disasters, as well as economic growth, because of reform-embracing, free-market economics and extensive privatization of the formerly state-run economy. Severe winters and summer droughts in 2000-02 resulted in massive livestock die-off and zero or negative GDP growth. This was compounded by falling prices for Mongolia's primary sector exports and widespread opposition to privatization. Growth averaged nearly 9% per year in 2004-08 largely because of high copper prices and new gold production. In 2008 Mongolia experienced a soaring inflation rate with year-to-year inflation reaching nearly 30%—the highest inflation rate in over a decade. By late 2008, as the country began to feel the effects of the global financial crisis, falling commodity prices helped lower inflation, but also reduced government revenues and forced cuts in

spending. In early 2009, the International Monetary Fund reached a \$236 million Stand-by Arrangement with Mongolia and the country has started to move out of the crisis. Although the banking sector remains unstable, the government is now enforcing stricter supervision regulations. In October 2009, the government passed long-awaited legislation on an investment agreement to develop Mongolia's Oyu Tolgoi mine, considered to be one of the world's largest untapped copper deposits. The economy grew 6.1% in 2010, largely on the strength of exports to nearby countries, and international reserves reached \$1.6 billion in September, an all time high for Mongolia. Mongolia's economy continues to be heavily influenced by its neighbors. Mongolia purchases 95% of its petroleum products and a substantial amount of electric power from Russia, leaving it vulnerable to price increases. Trade with China represents more than half of Mongolia's total external trade—China receives more than three-fourths of Mongolia's exports. Remittances from Mongolians working abroad are sizable, but have fallen due to the economic crisis; money laundering is a growing concern. Mongolia joined the World Trade Organization in 1997 and seeks to expand its participation in regional economic and trade regimes.

INTRODUCTION

Background: The use of the name Montenegro began in the 15th century when the Crnojevic dynasty began to rule the Serbian principality of Zeta; over subsequent centuries Montenegro was able to maintain its independence from the Ottoman Empire. From the 16th to 19th centuries, Montenegro became a theocracy ruled by a series of bishop princes; in 1852, it was transformed into a secular principality. After World War I, Montenegro was absorbed by the Kingdom of Serbs, Croats, and Slovenes, which became the Kingdom of Yugoslavia in 1929; at the conclusion of World War II, it became a constituent republic of the Socialist Federal Republic of Yugoslavia. When the latter dissolved in 1992, Montenegro federated with Serbia, first as the Federal Republic of Yugoslavia and, after 2003, in a looser union of Serbia and Montenegro. In May 2006, Montenegro invoked its right under the Constitutional Charter of Serbia and Montenegro to hold a referendum on independence from the state union. The vote for severing ties with Serbia exceeded 55%—the threshold set by the EU—allowing Montenegro to formally declare its independence on 3 June 2006.

lyrics/music: Sekula DRLJEVIC/unknown, arranged by Zarko MIKOVIC

note: adopted 2004; the anthem's music is based on a Montenegrin folk song

ECONOMY

Economy—overview: Montenegro severed its economy from federal control and from Serbia during the MILOSEVIC era and maintained its own central bank, adopted the Deutchmark, then the euro—rather than the Yugoslav dinar—as official currency, collected customs tariffs, and managed its own budget. The dissolution of the loose political union between Serbia and Montenegro in 2006 led to separate membership in several international financial institutions, such as the European Bank for Reconstruction and Development. In January 2007, Montenegro joined the World Bank and IMF. Montenegro is pursuing its own membership in the World Trade Organization and signed a Stabilization and Association agreement with the European Union in October 2007. The European Council granted candidate country status to Montenegro at the December 2010 session. Unemployment and regional disparities in development are key political and economic problems. Montenegro has privatized its large aluminum complex—the dominant industry—as well as most of its financial sector, and has begun to attract foreign direct investment in the tourism sector. The global financial crisis has had a significant negative impact on the economy, due to the ongoing credit crunch, a decline in the real estate sector, and a fall in aluminum exports.

MONTSERRAT

OVERSEAS TERRITORY OF THE UK)

INTRODUCTION

Background: English and Irish colonists from St. Kitts first settled on Montserrat in 1632; the first African slaves arrived three decades later. The British and French fought for possession of the island for most of the 18th century, but it finally was confirmed as a British possession

in 1783. The island's sugar plantation economy was converted to small farm landholdings in the mid 19th century. Much of this island was devastated and two-thirds of the population fled abroad because of the eruption of the Soufriere Hills Volcano that began on 18 July 1995. Montserrat has endured volcanic activity

since, with the last eruption occurring in July 2003.

volcanism: Soufriere Hills volcano, at a height of 915 m (3,010 ft), has erupted continuously since 1995; a massive eruption in 1997 destroyed most of the capital, Plymouth, and resulted in approximately half of the island becoming uninhabitable

Environment—current issues: land erosion occurs on slopes that have been cleared for cultivation

Geography—note: the island is entirely volcanic in origin and comprised of three major volcanic centers of differing ages

ECONOMY

Economy—overview: Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airports and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998 but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Prospects for the economy depend largely on developments in relation to the volcanic activity and on public sector construction activity. The UK has launched a three-year \$122.8 million aid program to help reconstruct the economy. Half of the island is expected to remain uninhabitable for another decade.

MOROCCO

INTRODUCTION

Background: In 788, about a century after the Arab conquest of North Africa, succes-

sive Moorish dynasties began to rule in Morocco. In the 16th century, the Sa'adi monarchy, particularly under Ahmad AL-MANSUR (1578-1603), repelled foreign

invaders and inaugurated a golden age. The Alaouite dynasty, to which the current Moroccan royal family belongs, established a sultanate in Morocco beginning in the 17th

century. In 1860, Spain occupied northern Morocco and ushered in a half century of trade rivalry among European powers that saw Morocco's sovereignty steadily erode; in 1912, the French imposed a protectorate over the country. A protracted independence struggle with France ended successfully in 1956. The internationalized city of Tangier and most Spanish possessions were turned over to the new country that same year. Sultan MOHAMMED V, the current monarch's grandfather, organized the new state as a constitutional monarchy and in 1957 assumed the title of king. Morocco annexed Western Sahara during the late 1970s, but final resolution on the status of the territory remains unresolved. Gradual political reforms in the 1990s resulted in the establishment of a bicameral legislature, which first met in 1997. Under King MOHAMMED VI—who in 1999 succeeded his father to the throne—human rights have improved. Morocco enjoys a moderately free press, but the government occasionally takes action against journalists who report on three broad subjects considered to be taboo: the monarchy, Islam, and the status of Western Sahara. Despite the continuing reforms, ultimate authority remains in the hands of the monarch. Influenced by protests elsewhere in the Middle East and North Africa, thousands of Moroccans in February 2011 rallied in Rabat and several other major cities to demand constitutional reform and more democracy and to protest government corruption and high food prices. A number of similar demonstrations and marches continued through March. Police response to most of the protests was subdued compared to the violence noted in protests elsewhere in the region. In early March, in response to demonstrator demands, King MOHAMMED VI announced the formation of a commission to reform the country's constitution. A draft constitution is to be presented by June 2011, followed by a popular referendum.

ECONOMY

Economy—overview: Morocco's market economy benefits from the country's relatively low labor costs and proximity to Europe, which aid key areas of the economy such as agriculture, light manufacturing, tourism, and remittances. Morocco is also the world's largest exporter of phosphate, which has long provided a source of export earnings and economic stability. Economic policies pursued since 2003

by King MOHAMMED VI have brought macroeconomic stability to the country with generally low inflation, improved financial performance, and steady progress in developing the service and industrial sectors. In 2006, Morocco entered a Free Trade Agreement (FTA) with the US, and in 2008 entered into an advanced status in its 2000 Association Agreement with the EU. However, poverty, illiteracy, and unemployment rates remain high. In response to these challenges, King MOHAMMED in 2005 launched a National Initiative for Human Development, a \$2 billion program aimed at alleviating poverty and underdevelopment by expanding electricity to rural areas and replacing urban slums with public and subsidized housing, among other policies. Morocco's trade and budget deficits widened in 2010, and reducing government spending and adapting to sluggish economic growth in Europe will be challenges in 2011. Morocco's long-term challenges include improving education and job prospects for young Moroccans, closing the disparity in wealth between the rich and the poor, confronting corruption, and expanding and diversifying exports beyond phosphates and low-value-added products.

TRANSNATIONAL ISSUES

Disputes—international: claims and administers Western Sahara whose sovereignty remains unresolved; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and Penon de Velez de la Gomera, the islands of Penon de Alhucemas and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); discussions have not progressed on a comprehensive maritime delimitation, setting limits on resource exploration and refugee interdiction, since Morocco's 2002 rejection of Spain's unilateral designation of a median line from the Canary Islands; Morocco serves as one of the primary launching areas of illegal migration into Spain from North Africa; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of harboring militants and arms smuggling; the FLN's assertions of a claim to Chirac Pastures in southeastern Morocco is a dormant dispute

Illicit drugs: one of the world's largest producers of illicit hashish; shipments of hashish mostly directed to Western Europe; transit point for cocaine from South America destined for Western Europe; significant consumer of cannabis

MOZAMBIQUE

INTRODUCTION

Background: Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development until the mid 1990s. The ruling Front for the Liberation of Mozambique (Frelimo) party formally abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement between Frelimo and rebel Mozambique National Resistance (Renamo) forces ended the fighting in 1992. In December 2004, Mozambique underwent a delicate transition as Joaquim CHISSANO stepped down after 18 years in office. His elected successor, Armando Emilio GUEBUZA, promised to continue the sound economic policies that have encouraged foreign investment. President GUEBUZA was reelected to a second term in October 2009. However, the elections were flawed by voter fraud, questionable disqualification of candidates, and Frelimo use of government resources during the campaign. As a result, Freedom House removed Mozambique from its list of electoral democracies.

ECONOMY

Economy—overview: At independence in 1975, Mozambique was one of the world's poorest countries. Socialist mismanagement and a brutal civil war from 1977-92 exacerbated the situation. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with political

stability since the multi-party elections in 1994, have led to dramatic improvements in the country's growth rate. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities. In spite of these gains, Mozambique remains dependent upon foreign assistance for more than half of its annual budget, and the majority of the population remains below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's work force and smallholder agricultural productivity and productivity growth is weak. A substantial trade imbalance persists although the opening of the Mozal aluminum smelter, the country's largest foreign investment project to date, has increased export earnings. At the end of 2007, and after years of negotiations, the government took over Portugal's majority share of the Cahora Bassa Hydroelectricity (HCB) company, a dam that was not transferred to Mozambique at independence because of the ensuing civil war and unpaid debts. More electrical power capacity is needed for additional investment projects in titanium extraction and processing and garment manufacturing that could further close the import/export gap. Mozambique's once substantial foreign debt has been reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives, and is now at a manageable level. In July 2007 the Millennium Challenge Corporation (MCC) signed a compact with Mozambique; the compact entered into force in September 2008 and will continue for five years. Compact projects will focus on improving sanitation, roads, agriculture, and the business regulation environment in an effort to spur economic growth in the four northern provinces of the country. Mozambique grew at an average annual rate of 9% in the decade up to 2007, one of Africa's strongest performances. However, heavy reliance on aluminum, which accounts for about one-third of exports, subjects the economy to volatile international prices. The sharp decline in aluminum prices during the global economic crisis lowered GDP growth by several percentage points. Despite 8.3% GDP growth in 2010, the increasing cost of living prompted citizens to riot in September 2010, after fuel, water, electricity, and bread price increases were announced. In an attempt to contain the cost of living, the government implemented subsidies, decreased taxes and tariffs, and instituted other fiscal measures.

TRANSNATIONAL ISSUES

Disputes—international: none

Illicit drugs: southern African transit point for South Asian hashish and heroin, and South American cocaine probably destined for the European and South African markets; producer of cannabis (for local consumption) and methaqualone (for export to South Africa); corruption and poor regulatory capability make the banking system vulnerable to money laundering, but the lack of a well-developed financial infrastructure limits the country's utility as a money-laundering center

INTRODUCTION

Background: South Africa occupied the German colony of South-West Africa during World War I and administered it as a mandate until after World War II, when it annexed the territory. In 1966 the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that became Namibia, but it was not until 1988 that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Namibia has been governed by SWAPO since the country won independence in 1990. Hifikepunye POHAMBHA was elected president in November 2004 in a landslide victory replacing Sam NUJOMA who led the country during its first 14 years of self rule. POHAMBHA was reelected in November 2009.

ECONOMY

Economy—overview: The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 8% of GDP, but provides more than 50% of foreign exchange earnings. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Namibia is the world's fourth-largest producer of uranium. It also produces large quantities of zinc and is a small producer of gold and other minerals. The mining sector employs only about 3% of the population while about 35-40% of the population depends on subsistence agriculture for its livelihood. Namibia normally imports about 50% of its cereal requirements; in drought years food shortages are a major problem in rural areas. A high per capita GDP, relative to the region, hides one of the world's most unequal income distributions, as shown by Namibia's 70.7 GINI coefficient. The Namibian economy is closely linked to South Africa with the Namibian dollar pegged one-to-one to the South African rand. Until 2010, Namibia drew 40% of its budget revenues from the Southern African Customs Union (SACU). Increased payments from SACU put Namibia's budget into surplus in 2007 for the first time since independence. SACU allotments to Namibia increased in 2009, but will drop for 2010 and 2011 because South Africa went into recession during the global economic crisis, reducing overall SACU income. Increased fish production and mining of zinc, copper, and uranium spurred growth in 2003-08, but growth in recent years was undercut by poor fish catches, a dramatic decline in demand for diamonds, higher costs of producing metals, and the global recession. A rebound in diamond and uranium prices in 2010 provided a significant boost to Namibia's mining sector. Copper mines, which closed in 2008, are slated to reopen in 2011.

TRANSNATIONAL ISSUES

Disputes—international: concerns from international experts and local populations over the Okavango Delta ecology in Botswana and human displacement scuttled Namibian plans to construct a

hydroelectric dam on Popa Falls along the Angola-Namibia border; managed dispute with South Africa over the location of the boundary in the Orange River; Namibia has supported, and in 2004 Zimbabwe dropped

objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

Refugees and internally displaced persons: refugees (country of origin): 4,700 (Angola) (2007)

NAURU

INTRODUCTION

Background: The exact origins of the Nauruans are unclear since their language does not resemble any other in the Pacific. Germany annexed the island in 1888. A German-British consortium began mining the island's phosphate deposits early in the 20th century. Australian forces occupied Nauru in World War I; it subsequently became a League of Nations mandate. After the Second World War—and a brutal occupation by Japan—Nauru became a UN trust territory. It achieved independence in 1968 and joined the UN in 1999 as the world's smallest independent republic.

Natural hazards: periodic droughts

Environment—current issues: limited natural freshwater resources, roof storage tanks collect rainwater but mostly dependent on a single, aging desalination plant; intensive phosphate mining during the past 90 years—mainly by a UK, Australia, and NZ consortium—has left the central 90% of Nauru a wasteland and threatens limited remaining land resources

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Whaling

signed, but not ratified: none of the selected agreements

Geography—note: Nauru is one of the three great phosphate rock islands in the Pacific Ocean—the others are Banaba (Ocean Island) in Kiribati and Makatea in French Polynesia; only 53 km south of Equator

ECONOMY

Economy—overview: Revenues of this tiny island traditionally have come from exports of phosphates. Few other resources exist, with most necessities being imported, mainly from Australia, its former occupier and later major source of support. In 2005 an Australian company entered into an agreement to exploit remaining supplies. Primary reserves of phosphates were exhausted and mining ceased in 2006, but mining of a deeper layer of "secondary phosphate" in the interior of the island began the following year. The secondary phosphate deposits may last another 30 years. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. In anticipation of the exhaustion of Nauru's phosphate deposits, substantial amounts of phosphate income were invested in trust funds to help cushion the transition and provide for Nauru's economic future. As a result of heavy spending from the trust funds, the government faced virtual bankruptcy. To cut costs the government has frozen wages and reduced overstuffed public service departments. Nauru lost further revenue in 2008 with the closure of Australia's refugee processing center, making it almost totally dependent on food imports and foreign aid. Housing, hospitals, and other capital plant are deteriorating. The cost to Australia of keeping the government and economy afloat continues to climb. Few comprehensive statistics on the Nauru economy exist with estimates of Nauru's GDP varying widely.

INTRODUCTION

Background: This uninhabited island was claimed by the US in 1857 for its guano. Mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the Coast Guard to the Department of the Interior. A 1998 scientific expedition to the island described it as a unique preserve of Caribbean biodiversity; the following year it became a National Wildlife Refuge and annual scientific expeditions have continued.

NEPAL**INTRODUCTION**

Background: In 1951, the Nepalese monarch ended the century-old system of rule by hereditary premiers and instituted a cabinet system of government. Reforms in 1990 established a multiparty democracy within the framework of a constitutional monarchy. An insurgency led by Maoist extremists broke out in 1996. The ensuing ten-year civil war between insurgents and government forces witnessed the dissolution of the cabinet and parliament and assumption of absolute power by the king. Several weeks of mass protests in April 2006 were followed by several months of peace negotiations between the Maoists and government officials, and culminated

in a November 2006 peace accord and the promulgation of an interim constitution. Following a nation-wide election in April 2008, the newly formed Constituent Assembly declared Nepal a federal democratic republic and abolished the monarchy at its first meeting the following month. The Constituent Assembly elected the country's first president in July. The Maoists, who received a plurality of votes in the Constituent Assembly election, formed a coalition government in August 2008, but resigned in May 2009 after the president overruled a decision to fire the chief of the army staff. The Communist Party of Nepal-United Marxist-Leninist and the Nepali Congress party then formed a new coalition govern-

ment with several smaller parties. The prime minister's resignation in June 2010 ushered in seven months of political gridlock until Jhala Nath KHANAL was elected as replacement in February 2011. His pressing tasks are to conclude the drafting of a new constitution by the late May 2011 deadline and to determine the future of the former Maoist combatants.

Flag description: red with a blue border around the unique shape of two overlapping right triangles; the smaller, upper triangle bears a white stylized moon and the larger, lower triangle displays a white 12-pointed sun; the color red represents the rhododendron (Nepal's national flower) and is a sign of victory and bravery, the blue border signifies peace and harmony; the two right triangles are a combination of two single pennons (pennants) that originally symbolized the Himalaya Mountains while their

charges represented the families of the king (upper) and the prime minister, but today they are understood to denote Hinduism and Buddhism, the country's two main religions; the moon represents the serenity of the Nepalese people and the shade and cool weather in the Himalayas, while the sun depicts the heat and higher temperatures of the lower parts of Nepal; the moon and the sun are also said to express the hope that the nation will endure as long as these heavenly bodies

note: Nepal is the only country in the world whose flag is not rectangular or square

National anthem: name: "Sayau Thunga Phool Ka" (Hundreds of Flowers)

lyrics/music: Pradeep Kumar RAI/Ambar GURUNG

note: adopted 2007; after the abolition of the monarchy in 2006, a new anthem was required because of the previous anthem's praise for the king

ECONOMY

Economy—overview: Nepal is among the poorest and least developed countries in the world, with almost one-quarter of its population living below the poverty line. Agriculture is the mainstay of the economy, providing a livelihood for three-fourths of the population and accounting for about one-third of GDP. Industrial activity mainly involves the processing of agricultural products, including pulses, jute, sugarcane, tobacco, and grain. Nepal has considerable scope for exploiting its potential in hydropower, with an estimated 42,000 MW of feasible capacity, but political instability hampers foreign investment. Additional challenges to Nepal's growth include its landlocked geographic location, civil strife and labor unrest, and its susceptibility to natural disaster.

TRANSNATIONAL ISSUES

Disputes—international: joint border commission continues to work on contested sections of boundary with India, including the 400 square kilometer dispute over the source of the Kalapani River; India has instituted a stricter border regime to restrict transit of Maoist insurgents and illegal cross-border activities; approximately 106,000 Bhutanese Lhotshampas (Hindus) have been confined in refugee camps in south-eastern Nepal since 1990

Refugees and internally displaced persons: refugees (country of origin): 107,803 (Bhutan); 20,153 (Tibet/China) IDPs: 50,000–70,000 (remaining from ten-year Maoist insurgency that officially ended in 2006; displacement spread across the country) (2007)

Illicit drugs: illicit producer of cannabis and hashish for the domestic and international drug markets; transit point for opiates from Southeast Asia to the West

NETHERLANDS

INTRODUCTION

Background: The Dutch United Provinces declared their independence from Spain in 1579; during the 17th century, they became a leading seafaring and commercial power, with settlements and colonies around the world. After a 20-year French occupation, a Kingdom of the Netherlands was formed in 1815. In 1830 Belgium seceded and formed a separate kingdom. The Netherlands remained neutral in World War I, but suffered invasion and occupation by Germany in World War II. A modern, industrialized nation, the Netherlands is also a large exporter of agricultural products. The country was a founding member of NATO and the EEC (now the EU), and participated in the introduction of the euro in 1999. In October 2010, the former Netherlands Antilles was dissolved and the three smallest islands—Bonaire, Sint Eustatius, and Saba—became special municipalities in the Netherlands administrative structure. The larger islands of Sint Maarten and Curacao joined the Netherlands and Aruba as constituent countries forming the Kingdom of the Netherlands.

Flag description: three equal horizontal bands of red (top), white, and blue; similar to the flag of Luxembourg, which uses a lighter blue and is longer; the colors were those of William I, Prince of Orange, who led the Dutch Revolt against Spanish sovereignty in the latter half of the 16th century; originally the upper band was orange, but because it tended to fade to red over time, the red shade was eventually made the permanent color; the banner is perhaps the oldest tricolor in continuous use **National anthem:** *name:* "Het Wilhelmus" (The William) *lyrics/music:* Philips van Marnix van Sint Aldegonde (presumed)/unknown *note:* adopted 1932, in use since the 17th century, making it the oldest national anthem in the world; also known as "Wilhelmus van Nassouwe" (William of Nassau), it is in the form of an acrostic, where the first letter of each stanza spells the name of the leader of the Dutch Revolt

ECONOMY

Economy—overview: The Netherlands economy is noted for stable industrial relations, moderate unemployment and inflation, a sizable current account surplus, and an important role as a European transportation hub. Industrial activity is predominantly in food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs only 2% of the labor force but provides large surpluses for the food-processing industry and for exports. The Netherlands, along with 11 of its EU partners, began circulating the euro currency on 1 January 2002. The country has been one of the leading European nations for attracting foreign direct investment and is one of the four largest investors in the US. After 26 years of uninterrupted economic growth, the Netherlands' economy—which is highly open and dependent on foreign trade and financial services—was hard-hit by global economic crisis. Dutch GDP contracted 3.9% in 2009, while exports declined nearly 25% due to a sharp contraction in world demand. The Dutch financial sector has also suffered, due in part to the high exposure of some Dutch banks to U.S. mortgage-backed securities. In response to turmoil in financial markets, the government nationalized two

banks and injected billions of dollars into a third, to prevent further systemic risk. The government also sought to boost the domestic economy by accelerating infrastructure programs, offering corporate tax breaks for employers to retain workers, and expanding export credit facilities. The stimulus programs and bank bailouts, however, resulted in a government budget deficit of nearly 4.6% of GDP in 2009 and 5.6% in 2010 that contrasts sharply with a surplus of 0.7% of GDP in 2008. With unemployment weighing on private-sector consumption, the government of Prime Minister Mark RUTTE is likely to come under increased pressure to keep the budget deficit in check while promoting economic recovery.

INTRODUCTION

Background: Settled by both Britain and
France during the first half of the 19th
century, the island was made a French
possession in 1853. It served as a penal
colony for four decades after 1864. Agita-
tion for independence during the 1980s
and early 1990s ended in the 1998 Noumea
Accord, which over a period of 15 to 20
years will transfer an increasing amount
of governing responsibility from France to
New Caledonia. The agreement also
commits France to conduct a referendum
between 2014 and 2019 to decide whether
New Caledonia should assume full sover-
eignty and independence.

ECONOMY

Economy—overview: New Caledonia has about 25% of the world's known nickel resources. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France—equal to more than 15% of GDP—and tourism are keys to the health of the economy. Substantial new investment in the nickel industry, combined with the recovery of global nickel prices, brightens the economic outlook for the next several years.

NEW ZEALAND

INTRODUCTION

Background: The Polynesian Maori reached New Zealand in about A.D. 800. In 1840, their chieftains entered into a compact with Britain, the Treaty of Waitangi, in which they ceded sovereignty to Queen Victoria while retaining territorial rights. In that same year, the British began the first organized colonial settlement. A series of land wars between 1843 and 1872 ended with the defeat of the native peoples. The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both world wars. New Zealand's full participation in a number of defense alliances lapsed by the 1980s. In recent years, the government has sought to address longstanding Maori grievances.

Government—note: while not an official symbol, the Kiwi, a small native flightless bird, represents New Zealand

ECONOMY

Economy—overview: Over the past 20 years the government has transformed New Zealand from an agrarian economy dependent on concessionary British market access to a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes—but left behind some at the bottom of the ladder—and broadened and deepened the technological capabilities of the industrial sector. Per capita income rose for ten consecutive years until 2007 in purchasing power parity terms, but fell in 2008-09. Debt-driven consumer spending drove robust growth in the first half of the decade, helping fuel a large balance of payments deficit that posed a challenge for economic managers. Inflationary pressures caused the central bank to raise its key rate steadily from January 2004 until it was among the highest in the OECD in 2007-08; international capital inflows attracted to the high rates further strengthened the currency and housing market, however, aggravating the current account deficit. The economy fell into recession before the start of the global financial crisis and contracted for five consecutive quarters in 2008-09. In line with global peers, the central bank cut interest rates aggressively and the government developed fiscal stimulus measures. The economy posted a 1.7% decline in 2009, but pulled out of recession late in the year, and achieved 2.1% growth in 2010. Nevertheless, key trade sectors remain vulnerable to weak external demand. The government plans to raise productivity growth and develop infrastructure, while reining in government spending.

NICARAGUA

INTRODUCTION

Background: The Pacific coast of Nicaragua was settled as a Spanish colony from Panama in the early 16th century. Independence from Spain was declared in 1821 and the country became an independent republic in 1838. Britain occupied the Caribbean Coast in the first half of the 19th century, but gradually ceded control of the region in subsequent decades. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas to power in 1979. Nicaraguan aid to

leftist rebels in El Salvador caused the US to sponsor anti-Sandinista contra guerrillas through much of the 1980s. After losing free and fair elections in 1990, 1996, and 2001, former Sandinista President Daniel ORTEGA Saavedra was elected president in 2006. The 2008 municipal elections were marred by widespread irregularities. Nicaragua's infrastructure and economy—hard hit by the earlier civil war and by Hurricane Mitch in 1998—are slowly being rebuilt, but democratic institutions have been weakened under the ORTEGA administration.

Flag description: three equal horizontal bands of blue (top), white, and blue with the national coat of arms centered in the white band; the coat of arms features a triangle encircled by the words REPUBLICA DE NICARAGUA on the top and AMERICA CENTRAL on the bottom; the banner is based on the former blue-white-blue flag of the Federal Republic of Central America; the blue bands symbolize the Pacific Ocean and the Caribbean Sea, while the white band represents the land between the two bodies of water

note: similar to the flag of El Salvador, which features a round emblem encircled by the words REPUBLICA DE EL SALVADOR EN LA AMERICA CENTRAL centered in the white band; also similar to the flag of Honduras, which has five blue stars arranged in an X pattern centered in the white band

National anthem: name: "Salve a ti, Nicaragua" (Hail to Thee, Nicaragua)

lyrics/music: Salomon Ibarra MAYORGA/traditional, arranged by Luis Abraham DELGADILLO

note: although only officially adopted in 1971, the music was approved in 1918 and the lyrics in 1939; the tune, originally from Spain, was used as an anthem for Nicaragua from the 1830's until 1876

ECONOMY

Economy—overview: Nicaragua, the poorest country in Central America and the second poorest in the Hemisphere, has widespread underemployment and poverty. The US-Central America Free Trade Agreement (CAFTA) has been in effect since April 2006 and has expanded export opportunities for many agricultural and manufactured goods. Textiles and apparel account for nearly 60% of Nicaragua's exports, but increases in the minimum wage during the ORTEGA administration will likely erode its comparative advantage in this industry. ORTEGA's promotion of mixed business initiatives, owned by

the Nicaraguan and Venezuelan state oil firms, together with the weak rule of law, could undermine the investment climate for domestic and international private firms in the near-term. Nicaragua relies on international economic assistance to meet internal- and external-debt financing obligations. Foreign donors have curtailed this funding, however, in response to November 2008 electoral fraud. Managua has an IMF extended Credit Facility program, which could help keep the government's fiscal deficit on target during the 2011 election year and encourage transparency in the use of Venezuelan off-budget loans and assistance. In early 2004, Nicaragua secured some \$4.5 billion in foreign debt reduction under the Heavily Indebted Poor Countries (HIPC) initiative, however, Managua still struggles with a high public debt burden. Nicaragua is gradually recovering from the global economic crisis as increased exports drove positive growth in 2010. The economy is expected to grow at a rate of about 3% in 2011.

Illicit drugs: transshipment point for cocaine destined for the US and transshipment point for arms-for-drugs dealing

INTRODUCTION

Background: Niger became independent from France in 1960 and experienced single-party and military rule until 1991, when Gen. Ali SAIBOU was forced by public pressure to allow multiparty elections, which resulted in a democratic government in 1993. Political infighting brought the government to a standstill and in 1996 led to a coup by Col. Ibrahim BARE. In 1999, BARE was killed in a counter coup by military officers who restored democratic rule and held elections that brought Mamadou TANDJA to power in December of that year. TANDJA was reelected in 2004 and in 2009 spearheaded a constitutional amendment that would allow him to extend his term as president. In February 2010, a military coup deposed TANDJA, immediately suspended the constitution and dissolved the Cabinet, and promised that elections would be held following a transitional period of unspecified duration. Niger is one of the poorest countries in the world with minimal government services and insufficient funds to develop its resource base. The largely agrarian and subsistence-based economy is frequently disrupted by extended droughts common to the Sahel region of Africa. A predominately Tuareg ethnic group emerged in February 2007, the Nigerien Movement for Justice, and attacked several military targets in Niger's northern region throughout 2007 and 2008. Successful government offensives in 2009 limited the rebels' operational capabilities.

ECONOMY

Economy—overview: Niger is a landlocked, Sub-Saharan nation, whose economy centers on subsistence crops,

livestock, and some of the world's largest uranium deposits. Drought, desertification, and strong population growth have undercut the economy. Niger shares a common currency, the CFA franc, and a common central bank, the Central Bank of West African States (BCEAO), with seven other members of the West African Monetary Union. In December 2000, Niger qualified for enhanced debt relief under the International Monetary Fund program for Highly Indebted Poor Countries (HIPC) and concluded an agreement with the Fund on a Poverty Reduction and Growth Facility (PRGF). Debt relief provided under the enhanced HIPC initiative significantly reduces Niger's annual debt service obligations, freeing funds for expenditures on basic health care, primary education, HIV/AIDS prevention, rural infrastructure, and other programs geared at poverty reduction. In December 2005, Niger received 100% multilateral debt relief from the IMF, which translates into the forgiveness of approximately US \$86 million in debts to the IMF, excluding the remaining assistance under HIPC. In 2010, the Niger economy was recovering from the effects of a 2009 drought that reduced grain and cowpea production and decimated livestock herds. The economy was also hurt when the international community cut off non-humanitarian aid in response to TANDJA's moves to extend his term as president. Nearly half of the government's budget is derived from foreign donor resources. Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources.

TRANSNATIONAL ISSUES

Disputes—international: Libya claims about 25,000 sq km in a currently dormant dispute in the Tommo region; location of Benin-Niger-Nigeria tripoint is unresolved; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty that also includes the Chad-Niger and Niger-Nigeria boundaries; the dispute with Burkina Faso was referred to the ICJ in 2010

Trafficking in persons: current situation: Niger is a source, transit, and destination country for children and women trafficked for forced labor and sexual exploitation; caste-based slavery practices, rooted in ancestral master-slave relationships, continue in isolated areas of the country—an estimated 8,800 to 43,000 Nigeriens live under conditions of traditional slavery; children are trafficked within Niger for forced begging, forced labor in gold mines, domestic servitude, sexual exploitation, and possibly for forced labor in agriculture and stone quarries; women and children from neighboring states are trafficked to and through Niger for domestic servitude, sexual exploitation, forced labor in mines and on farms, and as mechanics and welders

tier rating: Tier 2 Watch List—the Government of Niger does not fully comply with the minimum standards for the elimination of trafficking and is not making any significant efforts to do so; the government demonstrated marginal efforts to combat human trafficking, including traditional slavery, during the last year (2009)

NIGERIA

INTRODUCTION

Background: British influence and control over what would become Nigeria and Africa's most populous country grew through the 19th century. A series of constitutions after World War II granted Nigeria greater autonomy; independence came in 1960. Following nearly 16 years of military rule, a new constitution was adopted in 1999, and a peaceful transition to civilian government was completed. The government continues to face the daunting task of reforming a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement, and institutionalizing democracy. In addition, Nigeria continues to experience longstanding ethnic and religious tensions. Although both the 2003 and 2007 presidential elections were marred by significant irregularities and violence, Nigeria is currently experiencing its longest period of civilian rule since independence. The general elections of April 2007 marked the first civilian-to-civilian transfer of power in the country's history. In January 2010, Nigeria assumed a nonpermanent seat on the UN Security Council for the 2010-11 term.

ECONOMY

Economy—overview: Oil-rich Nigeria has been hobbled by political instability, corruption, inadequate infrastructure, and poor macroeconomic management but in 2008 began pursuing economic reforms. Nigeria's former military rulers failed to diversify the economy away from its overdependence on the capital-intensive oil sector, which provides 95% of foreign exchange earnings and about 80% of budgetary revenues. Following the signing of an IMF stand-by agreement in August 2000, Nigeria received a debt-restructuring deal from the Paris Club and a \$1 billion credit from the IMF, both contingent on economic reforms. Nigeria pulled out of its IMF program in April 2002, after failing to meet spending and exchange rate targets, making it ineligible for additional debt forgiveness from the Paris Club. In November 2005, Abuja won Paris Club approval for a debt-relief deal that eliminated \$18 billion of debt in exchange for \$12 billion in payments—a total package worth \$30 billion of Nigeria's total \$37 billion external debt. Since 2008 the government has begun to show the political will to implement the market-oriented reforms urged by the IMF, such as modernizing the banking system, curbing inflation by blocking excessive wage demands, and resolving regional disputes over the distribution of earnings from the oil industry. GDP rose strongly in 2007-10 because of increased oil exports and high global crude prices in 2010. President JONATHAN has pledged to continue the economic reforms of his predecessor with emphasis

on infrastructure improvements. Infrastructure is the main impediment to growth and in August 2010 JONATHAN unveiled a power sector blueprint that includes privatization of the state-run electricity generation and distribution facilities. The government also is working toward developing stronger public-private partnerships for roads. Nigeria's financial sector was hurt by the global financial and economic crises and the Central Bank governor has taken measures to strengthen that sector.

INTRODUCTION

Background: Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the rest of the Cook Islands, have caused it to be separately administered. The population of the island continues to drop (from a peak of 5,200 in 1966 to an estimated 1,311 in 2011) with substantial emigration to New Zealand 2,400 km to the southwest.

ECONOMY**Economy—overview:** The economy suffers from the typical Pacific island problems of geographic isolation, few resources, and a small population. Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of emigration to New Zealand. Efforts to increase GDP include the promotion of tourism and financial services, although the International Banking Repeal Act of 2002 resulted in the termination of all offshore banking licenses. Economic aid from New Zealand in FY08/09 was US\$5.7 million. Niue suffered a devastating typhoon in January 2004, which decimated nascent economic programs. While in the process of rebuilding, Niue has been dependent on foreign aid.**GDP (purchasing power parity):**

NORTHERN MARIANA ISLANDS

(COMMONWEALTH IN POLITICAL UNION WITH THE US)

INTRODUCTION

Background: Under US administration as part of the UN Trust Territory of the Pacific, the people of the Northern Mariana Islands decided in the 1970s not

to seek independence but instead to forge closer links with the US. Negotiations for territorial status began in 1972. A covenant to establish a commonwealth in political union with the US was approved in 1975, and came into force on 24 March 1976. A new government and constitution went into effect in 1978.

ECONOMY

Economy—overview: The economy benefits substantially from financial assistance from the US. The rate of funding has declined as locally generated government revenues have grown. The key tourist industry employs about 50% of the work force and accounts for roughly one-fourth of GDP. Japanese tourists predominate. Annual tourist entries have exceeded one-half million in recent years, but financial difficulties in Japan have caused a temporary slowdown. The agricultural sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons. Garment production is by far the most important industry with the employment of 17,500 mostly Chinese workers and sizable shipments to the US under duty and quota exemptions.

NORWAY

INTRODUCTION

Background: Two centuries of Viking raids into Europe tapered off following the adoption of Christianity by King Olav TRYGVASON in 994. Conversion of the Norwegian kingdom occurred over the next several decades. In 1397, Norway was absorbed into a union with Denmark that lasted more than four centuries. In 1814, Norwegians resisted the cession of their country to Sweden and adopted a new constitution. Sweden then invaded Norway but agreed to let Norway keep its constitution in return for accepting the union under a Swedish king. Rising nationalism throughout the 19th century led to a 1905 referendum granting Norway independence. Although Norway remained neutral in World War I, it suffered heavy losses to its shipping. Norway proclaimed its neutrality at the outset of World War II, but was nonetheless occupied for five years by Nazi Germany (1940-45). In 1949, neutrality was abandoned and Norway became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's

economic fortunes. In referenda held in 1972 and 1994, Norway rejected joining the EU. Key domestic issues include immigration and integration of ethnic minorities, maintaining the country's extensive social safety net with an aging population, and preserving economic competitiveness.

ECONOMY

Economy—overview: The Norwegian economy is a prosperous bastion of welfare capitalism, featuring a combination of free market activity and government intervention. The government controls key areas, such as the vital petroleum sector, through large-scale state-majority-owned enterprises. The country is richly endowed with natural resources—petroleum, hydro-power, fish, forests, and minerals—and is highly dependent on the petroleum sector, which accounts for nearly half of exports and over 30% of state revenue. Norway is the world's second-largest gas exporter; its position as an oil exporter has slipped to ninth-largest as production has begun to decline. Norway opted to stay out of the EU during a referendum in November 1994; nonetheless, as a member of the European Economic Area, it contributes sizably to the EU budget. In anticipation of eventual declines in oil and gas production, Norway saves state revenue from the petroleum sector in the world's second largest sovereign wealth fund, valued at over \$500 billion in 2010. After solid GDP growth in 2004-07, the economy slowed in 2008, and contracted in 2009, before returning to positive growth in 2010.

OMAN

INTRODUCTION

Background: The inhabitants of the area of Oman have long prospered on Indian Ocean trade. In the late 18th century, a newly established sultanate in Muscat signed the first in a series of friendship treaties with Britain. Over time, Oman's dependence on British political and military advisors increased, but it never became a British colony. In 1970, QABOOS bin Said Al-Said overthrew the restrictive rule of his father; he has ruled as sultan ever since. His extensive modernization program has opened the country to the outside world while preserving the longstanding close ties with the UK. Oman's moderate, independent foreign policy has sought to maintain good relations with all Middle Eastern countries. Inspired by the popular uprisings that swept the Middle East and North Africa in 2010-11, Omanis began staging marches and demonstrations—a small number of which turned violent in clashes with government security forces—to demand economic benefits, an end to corruption, and greater political rights. In February and March 2011, in response to protester demands, QABOOS reshuffled his cabinet, pledged to create more government jobs, and promised to implement economic and political reforms, such as granting legislative and regulatory powers to the Council of Oman.

lyrics/music: Rashid bin Uzayyiz al KHUSAIDI/James Frederick MILLS, arranged by Bernard EBBINGHAUS

note: adopted 1932; new words were written after QABOOS bin Said al Said gained power in 1970; the anthem was first performed by the band of a British ship as a salute to the Sultan during a 1932 visit to Muscat; the bandmaster of the HMS Hawkins was asked to write a salutation to the Sultan on the occasion of his visiting the ship

ECONOMY

Economy—overview: Oman is a middle-income economy that is heavily dependent on dwindling oil resources. Because of declining reserves, Muscat has actively pursued a development plan that focuses on diversification, industrialization, and privatization, with the objective of reducing the oil sector's contribution to GDP to 9% by 2020. Tourism and gas-based industries are key components of the government's diversification strategy. By using enhanced oil recovery techniques, Oman succeeded in increasing oil production, giving the country more time to diversify, and the increase in global oil prices throughout 2010 provides the government greater financial resources to invest in non-oil sectors. **GDP (purchasing power parity):** \$75.84 billion (2010 est.)

PACIFIC OCEAN

INTRODUCTION

Background: The Pacific Ocean is the largest of the world's five oceans (followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean). Strategically important access waterways include the La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Pacific Ocean south of 60 degrees south.

GEOGRAPHY

Location: body of water between the Southern Ocean, Asia, Australia, and the Western Hemisphere

Geographic coordinates: 0 00 N, 160 00 W

Map references: Political Map of the World

Area: total: 155.557 million sq km

note: includes Bali Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Gulf of Alaska, Gulf of Tonkin, Philippine Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, and other tributary water bodies

Area—comparative: about 15 times the size of the US; covers about 28% of the global surface; almost equal to the total land area of the world

Coastline: 135,663 km

Climate: planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones

(hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal—a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian land-mass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain: surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Elevation extremes: lowest point: Challenger Deep in the Mariana Trench -10,924 m

highest point: sea level 0 m

Natural resources: oil and gas fields, poly-metallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards: surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the "Pacific Ring of Fire"; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); cyclical El Nino/La Nina phenomenon occurs in the equatorial Pacific, influencing weather in the Western Hemisphere and the western Pacific; ships subject to superstructure icing in extreme north from October to May; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment—current issues: endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales;

oil pollution in Philippine Sea and South China Sea

Geography—note: the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

ECONOMY

Economy—overview: The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of the US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has led to fluctuations in new drillings.

TRANSPORTATION

Ports and terminals: Bangkok (Thailand), Hong Kong (China), Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines), Pusan (South Korea), San Francisco (US), Seattle (US), Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

Transportation—note: the Inside Passage offers protected waters from southeast Alaska to Puget Sound (Washington state); the International Maritime Bureau reports the territorial waters of littoral states and offshore waters in the South China Sea as high risk for piracy and armed robbery against ships; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crew and passengers are often held for ransom, murdered, or cast adrift

TRANSNATIONAL ISSUES

Disputes—international: some maritime disputes (see littoral states)

PAKISTAN

INTRODUCTION

Background: The Indus Valley civilization, one of the oldest in the world and dating back at least 5,000 years, spread over much of what is presently Pakistan. During the second millennium B.C., remnants of this culture fused with the migrating Indo-Aryan peoples. The area underwent successive invasions in subsequent centuries from the Persians, Greeks, Scythians, Arabs (who

brought Islam), Afghans, and Turks. The Mughal Empire flourished in the 16th and 17th centuries; the British came to dominate the region in the 18th century. The separation in 1947 of British India into the Muslim state of Pakistan (with West and East sections) and largely Hindu India was never satisfactorily resolved, and India and Pakistan fought two wars—in 1947-48 and 1965—over the disputed Kashmir

territory. A third war between these countries in 1971—in which India capitalized on Islamabad's marginalization of Bengalis in Pakistani politics—resulted in East Pakistan becoming the separate nation of Bangladesh. In response to Indian nuclear weapons testing, Pakistan conducted its own tests in 1998. India-Pakistan relations have been rocky since the November 2008 Mumbai attacks, but both countries are

taking small steps to put relations back on track. In February 2008, Pakistan held parliamentary elections and in September 2008, after the resignation of former President MUSHARRAF, elected Asif Ali ZARDARI to the presidency. Pakistani government and military leaders are struggling to control domestic insurgents, many of whom are located in the tribal areas adjacent to the border with Afghanistan.

ECONOMY

Economy—overview: Pakistan, an impoverished and underdeveloped country, has suffered from decades of internal political disputes and low levels of foreign investment. Between 2001-07, however, poverty levels decreased by 10%, as Islamabad steadily raised development spending. During 2004-07, GDP growth in the 5-8% range was spurred by gains in the industrial and service sectors—despite severe electricity shortfalls—but growth slowed in 2008-09 and unemployment rose. Inflation remains the top concern among the public, climbing from 7.7% in 2007 to more than 13% in 2010. In addition, the Pakistani rupee has depreciated since 2007 as a result of political and economic instability. The government agreed to an International Monetary Fund Standby Arrangement in November 2008 in response to a balance of payments crisis, but during 2009-10 its current account strengthened and foreign exchange reserves stabilized—largely because of lower oil prices and record remittances from workers abroad. Record floods in July-August 2010 lowered agricultural output and contributed to a jump in inflation, and reconstruction costs will strain the limited resources of the government. Textiles account for most of Pakistan's export earnings, but Pakistan's failure to expand a viable export base for other manufactures has left the country vulnerable to shifts in world demand. Other long term challenges include expanding investment in education, healthcare, and electricity production, and reducing dependence on foreign donors.

Telephone system: general assessment: the telecommunications infrastructure is improving dramatically with foreign and domestic investments in fixed-line and mobile-cellular networks; system consists of microwave radio relay, coaxial cable, fiber-optic cable, cellular, and satellite networks;

domestic: mobile-cellular subscribership has skyrocketed, exceeding 100 million in 2009, up from only about 300,000 in 2000; approximately 90 percent of Pakistanis live within areas that have cell phone coverage and more than half of all Pakistanis have access to a cell phone; fiber systems are being constructed throughout the country to aid in network growth; fixed line availability has risen only marginally over the same period and there are still difficulties getting fixed-line service to rural areas
international: country code—92; landing point for the SEA-ME-WE-3 and SEA-ME-WE-4 submarine cable systems that provide links to Asia, the Middle East, and Europe; satellite earth stations—3 Intelsat (1 Atlantic Ocean and 2 Indian Ocean); 3 operational international gateway exchanges (1 at Karachi and 2 at Islamabad); microwave radio relay to neighboring countries (2009)

Broadcast media: media is government regulated; 1 dominant state-owned TV broadcaster, Pakistan Television Corporation (PTV), operates a network consisting of 6 channels; private TV broadcasters are permitted and some foreign satellite channels are carried by cable TV operators; the state-owned radio network operates more than 40 stations; privately-owned radio stations mostly limit programming to music and talk shows (2007)

TRANSNATIONAL ISSUES

Disputes—international: various talks
and confidence-building measures
cautiously have begun to defuse tensions
over Kashmir, particularly since the
October 2005 earthquake in the region;
Kashmir nevertheless remains the site of
the world's largest and most militarized
territorial dispute with portions under the
de facto administration of China (Aksai
Chin), India (Jammu and Kashmir), and
Pakistan (Azad Kashmir and Northern
Areas); UN Military Observer Group
in India and Pakistan (UNMOGIP)
has maintained a small group of peace-
keepers since 1949; India does not recog-
nize Pakistan's ceding historic Kashmir
lands to China in 1964; India and Paki-
stan have maintained their 2004 cease
fire in Kashmir and initiated discussions
on defusing the armed stand-off in the
Siachen glacier region; Pakistan protests
India's fencing the highly militarized
Line of Control and construction of the
Baglihar Dam on the Chenab River in

Jammu and Kashmir, which is part of
the larger dispute on water sharing of
the Indus River and its tributaries; to
defuse tensions and prepare for discus-
sions on a maritime boundary, India and
Pakistan seek technical resolution of the
disputed boundary in Sir Creek estuary
at the mouth of the Rann of Kutch in the
Arabian Sea; Pakistani maps continue
to show the Junagadh claim in India's
Gujarat State; by 2005, Pakistan, with
UN assistance, repatriated 2.3 million
Afghan refugees leaving slightly more
than a million, many of whom remain
at their own choosing; Pakistan has sent
troops across and built fences along some
remote tribal areas of its treaty-defined
Durand Line border with Afghanistan,
which serve as bases for foreign terrorists
and other illegal activities; Afghan, Coalition,
and Pakistan military meet periodically
to clarify the alignment of the
boundary on the ground and on maps

**Refugees and internally displaced
persons:** refugees (country of origin):
1,043,984 (Afghanistan)

IDPs: undetermined (government strikes
on Islamic militants in South Waziristan);
34,000 (October 2005 earthquake; most
of those displaced returned to their home
villages in the spring of 2006) (2007)

Illicit drugs: significant transit area for
Afghan drugs, including heroin, opium,
morphine, and hashish, bound for Iran,
Western markets, the Gulf States, Africa,
and Asia; financial crimes related to drug
trafficking, terrorism, corruption, and
smuggling remain problems; opium poppy
cultivation estimated to be 2,300 hectares
in 2007 with 600 of those hectares eradicated;
federal and provincial authorities
continue to conduct anti-poppy campaigns
that utilizes forced eradication, fines, and
arrests

PALAU

INTRODUCTION

Background: After three decades as part
of the UN Trust Territory of the Pacific
under US administration, this western-
most cluster of the Caroline Islands opted
for independence in 1978 rather than
join the Federated States of Micronesia.

A Compact of Free Association with the
US was approved in 1986 but not ratified
until 1993. It entered into force the
following year when the islands gained
independence.

ECONOMY

Economy—overview: The economy consists primarily of tourism, subsistence

agriculture, and fishing. The government is the major employer of the work force relying heavily on financial assistance from the US. The Compact of Free Association with the US, entered into after the end of the UN trusteeship on 1 October 1994, provided Palau with up to \$700 million in US aid for the following 15 years in return for furnishing military facilities. Business and tourist arrivals numbered 85,000 in 2007. The population enjoys a per capita income roughly 50% higher than that of the Philippines and much of Micronesia. Long-run prospects for the key tourist sector have been greatly bolstered by the expansion of air travel in the Pacific, the rising prosperity of leading East Asian countries, and the willingness of foreigners to finance infrastructure development.

PANAMA

INTRODUCTION

Background: Explored and settled by the Spanish in the 16th century, Panama broke with Spain in 1821 and joined a union of Colombia, Ecuador,

and Venezuela—named the Republic of Gran Colombia. When the latter dissolved in 1830, Panama remained part of Colombia. With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with

the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone). The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. In 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of the century. Certain portions of the Zone and increasing responsibility over the Canal were turned over in the subsequent decades. With US help, dictator Manuel NORIEGA was deposed in 1989. The entire Panama Canal, the area supporting the Canal, and remaining US military bases were transferred to Panama by the end of 1999. In October 2006, Panamanians approved an ambitious plan (estimated to cost \$5.3 billion) to expand the Canal. The project, which began in 2007 and could double the Canal's capacity, is expected to be completed in 2014-15.

ECONOMY

Economy—overview: Panama's dollar-based economy rests primarily on a well-developed services sector that accounts for three-quarters of GDP. Services include operating the Panama Canal, logistics, banking, the Colon Free Zone, insurance, container ports, flagship registry, and tourism. Economic growth will be bolstered by the Panama Canal expansion project that began in 2007 and is scheduled to be completed by 2014 at a cost of \$5.3 billion—about 25% of current GDP. The expansion project will more than double the Canal's capacity, enabling it to accommodate ships that are too large to traverse the existing canal. The United States and China are the top users of the Canal. Panama also plans to construct a metro system in Panama City, valued at \$1.2 billion and scheduled to be completed by 2014. Panama's booming transportation and logistics services sectors, along with aggressive infrastructure development projects, will likely lead the economy to continued growth in 2011. Strong economic performance has not translated into broadly shared prosperity, as Panama has the second worst income distribution in Latin America. About 30% of the population lives in poverty; however, from 2006 to 2010 poverty was reduced by 10 percentage points, while unemployment dropped from 12% to 6% of the labor force. Panama and the United States signed a Trade Promotion Agreement in June 2007, which, when implemented, will help promote the country's economic growth. Seeking removal from the Organization of Economic Development's gray-

list of tax havens, Panama has also recently signed various double taxation treaties with other nations.

Military—note: on 10 February 1990, the government of then President ENDARA abolished Panama's military and reformed the security apparatus by creating the Panamanian Public Forces; in October 1994, Panama's Legislative Assembly approved a constitutional amendment prohibiting the creation of a standing military force but allowing the temporary establishment of special police units to counter acts of "external aggression"

TRANSNATIONAL ISSUES

Disputes—international: organized illegal narcotics operations in Colombia operate within the remote border region with Panama

Illicit drugs: major cocaine transshipment point and primary money-laundering center for narcotics revenue; money-

laundering activity is especially heavy in the Colon Free Zone; offshore financial center; negligible signs of coca cultivation;

monitoring of financial transactions is improving; official corruption remains a major problem

PAPUA NEW GUINEA

INTRODUCTION

Background: The eastern half of the island of New Guinea—second largest in the world—was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997 after claiming some 20,000 lives.

GEOGRAPHY

Location: Oceania, group of islands including the eastern half of the island of New Guinea between the Coral Sea and the South Pacific Ocean, east of Indonesia
Geographic coordinates: 6°00' S, 147°00' E
Map references: Oceania
Area: total: 462,840 sq km
country comparison to the world: 54
 land: 452,860 sq km

Area—comparative: slightly larger than California
Land boundaries: total: 820 km
 border countries: Indonesia 820 km
Coastline: 5,152 km
Maritime claims: measured from claimed archipelagic baselines
territorial sea: 12 nm
continental shelf: 200 m depth or to the depth of exploitation
exclusive fishing zone: 200 nm
Climate: tropical; northwest monsoon (December to March), southeast monsoon (May to October); slight seasonal temperature variation
Terrain: mostly mountains with coastal lowlands and rolling foothills
Elevation extremes: lowest point: Pacific Ocean 0 m
 highest point: Mount Wilhelm 4,509 m
Natural resources: gold, copper, silver, natural gas, timber, oil, fisheries
Land use: arable land: 0.49%
 permanent crops: 1.4%
 other: 98.11% (2005)

Irrigated land: NA

Total renewable water resources: 801 cu km (1987)

Freshwater withdrawal (domestic/industrial/agricultural): total: 0.1 cu km/yr (56%/43%/1%)

per capita: 17 cu m/yr (1987)

Natural hazards: active volcanism; situated along the Pacific "Ring of Fire"; the country is subject to frequent and sometimes severe earthquakes; mud slides; tsunamis
volcanism: Papua New Guinea experiences severe volcanic activity; Ulawun (elev. 2,334 m), one of Papua New Guinea's potentially most dangerous volcanoes, has been deemed a "Decade Volcano" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to its explosive history and close proximity to human populations; Rabaul (elev. 688 m) destroyed the city of Rabaul in 1937 and 1994; Lamington erupted in 1951 killing 3,000 people; Manam's 2004 eruption forced the island's abandonment; other historically active volcanoes include Bam, Bagana, Garbuna, Karkar, Langila, Lolobau, Long Island, Pago, St. Andrew Strait, Victory, and Waiowa

Environment—current issues: rain forest subject to deforestation as a result of growing commercial demand for tropical timber; pollution from mining projects; severe drought

Environment—international agreements: party to: Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands

ECONOMY

Economy—overview: Papua New Guinea (PNG) is richly endowed with natural resources, but exploitation has been hampered by rugged terrain, land tenure issues, and the high cost of developing infrastructure. The economy has a small formal sector, focused mainly on the export of those natural resources, and an informal sector, employing the majority of the population. Agriculture provides a subsistence livelihood for 85% of the people. Mineral deposits, including copper, gold, and oil, account for nearly two-thirds of export earnings. Natural gas reserves amount to an estimated 227 billion cubic meters. A consortium led by a major American oil company is constructing a liquefied natural gas (LNG) production facility that could begin exporting in 2014. As the largest investment project in the country's history, it has the potential to double GDP in the near-term and triple Papua New Guinea's export revenue. An American-owned firm also opened PNG's first oil refinery in 2004 and is building a second LNG production facility. The government faces the challenge of ensuring transparency and accountability for revenues flowing from this and other large LNG projects. The government of Prime Minister SOMARE has expended much of its energy remaining in power. He was the first prime minister ever to serve a full five-year term. The government has brought stability to the national budget, largely through expenditure control; however, it relaxed spending constraints in 2006 and 2007 as elections approached. In recent years, the government has opened up markets in telecommunications and air transport, making both more affordable to the people. Numerous challenges still face the government, including providing physical security for foreign investors, regaining investor confidence, restoring integrity to state institutions, promoting economic efficiency by privatizing moribund state institutions, and balancing relations with Australia, its former colonial ruler. Other socio-cultural challenges could upend the economy including an HIV/AIDS epidemic, with the second highest infection rate in all of East Asia and the Pacific, and chronic law and order and land tenure

issues. The global financial crisis had little impact because of continued foreign demand for PNG's commodities.

TRANSNATIONAL ISSUES

Disputes—international: relies on assistance from Australia to keep out illegal cross-border activities from primarily Indonesia, including goods smuggling, illegal narcotics trafficking, and squatters and secessionists

Refugees and internally displaced persons: refugees (country of origin): 10,177 (Indonesia) (2007)

Trafficking in persons: current situation: Papua New Guinea is a country of destination for women and children from Malaysia, the Philippines, Thailand, and China trafficked for the purpose of

commercial sexual exploitation; internal trafficking of women and children for the purposes of sexual exploitation and involuntary domestic servitude occurs as well
tier rating: Tier 3—Papua New Guinea does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the current legal framework does not contain elements of crimes that characterize trafficking; the government lacks victim protection services or a systematic procedure to identify victims of trafficking; the government did not prosecute anyone in 2007 for trafficking; Papua New Guinea has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs: major consumer of cannabis

PARACEL ISLANDS**INTRODUCTION**

Background: The Paracel Islands are surrounded by productive fishing grounds and by potential oil and gas reserves. In 1932, French Indochina annexed the islands and set up a weather station on Pattle Island; maintenance was continued by its successor, Vietnam. China has occupied the Paracel Islands since 1974, when its troops seized a South Vietnamese garrison occupying the western islands. China built a military installation on Woody Island with an airfield and artificial harbor. The islands also are claimed by Taiwan and Vietnam.

PARAGUAY**INTRODUCTION**

Background: Paraguay achieved its independence from Spain in 1811. In the disastrous War of the Triple Alliance (1865–70)—between Paraguay and Argentina, Brazil, and Uruguay—Paraguay lost two-thirds of all adult males and much of its territory. The country stagnated economically for the next half century. Following the Chaco War of 1932–35 with Bolivia, Paraguay gained a large part of the Chaco lowland region. The 35-year military dictatorship of Alfredo STROESSNER ended in 1989,

and, despite a marked increase in political infighting in recent years, Paraguay has held relatively free and regular presidential elections since then.

Flag description: three equal, horizontal bands of red (top), white, and blue with an emblem centered in the white band; unusual flag in that the emblem is different on each side; the obverse (hoist side at the left) bears the national coat of arms (a yellow five-pointed star within a green wreath capped by the words REPUBLICA DEL PARAGUAY, all within two circles); the reverse (hoist side at the right) bears a circular seal of the treasury (a yellow lion below a red Cap of Liberty and the words PAZ Y JUSTICIA (Peace and Justice)); red symbolizes bravery and patriotism, white represents integrity and peace, and blue denotes liberty and generosity

note: the three color bands resemble those on the flag of the Netherlands; one of only three national flags that differ on their obverse and reverse sides—the others are Moldova and Saudi Arabia

National anthem: name: "Paraguayos, Republica o muerte!" (Paraguayans, The Republic or Death!)

lyrics/music: Francisco Esteban ACUNA de Figueroa/disputed

note: adopted 1934, in use since 1846; the anthem was officially adopted following its re-arrangement in 1934

ECONOMY

Economy—overview: Landlocked Paraguay has a market economy distinguished by a large informal sector, featuring re-export of imported consumer goods to neighboring countries, as well as the activities of thousands of microenterprises and urban street vendors. A large percentage of the population, especially in rural areas, derives its living from agricultural activity, often on a subsistence basis. Because of the importance of the informal sector, accurate economic measures are difficult to obtain. On a per capita basis, real income has stagnated at 1980 levels. The economy grew rapidly between 2003 and 2008 as growing world demand for commodities combined with high prices and favorable weather to support Paraguay's commodity-based export expansion. Paraguay is the sixth largest soy producer in the world. Drought hit in 2008, reducing agricultural exports and slowing the economy even before the onset of the global recession. The economy fell 3.8% in 2009, as lower world demand and commodity prices caused exports to contract. The government reacted by introducing fiscal and monetary stimulus packages. Growth resumed at a 14.5% level in 2010, the highest in South America. Political uncertainty, corruption, limited progress

on structural reform, and deficient infrastructure are the main obstacles to growth.

TRANSNATIONAL ISSUES

Disputes—international: unruly region at convergence of Argentina-Brazil-Paraguay borders is locus of money laundering, smuggling, arms and illegal narcotics trafficking, and fundraising for extremist organizations

Illicit drugs: major illicit producer of cannabis, most or all of which is consumed in Brazil, Argentina, and Chile; transshipment country for Andean cocaine headed for Brazil, other Southern Cone markets, and Europe; weak border controls, extensive corruption and money-laundering activity, especially in the Tri-Border Area; weak anti-money-laundering laws and enforcement

PERU

INTRODUCTION

Background: Ancient Peru was the seat of several prominent Andean civilizations, most notably that of the Incas whose empire was captured by the Spanish conquistadors in 1533. Peruvian independence was

declared in 1821, and remaining Spanish forces were defeated in 1824. After a dozen years of military rule, Peru returned to democratic leadership in 1980, but experienced economic problems and the growth of a violent insurgency. President Alberto

FUJIMORI's election in 1990 ushered in a decade that saw a dramatic turnaround in the economy and significant progress in curtailing guerrilla activity. Nevertheless, the president's increasing reliance on authoritarian measures and an economic

slump in the late 1990s generated mounting dissatisfaction with his regime, which led to his ouster in 2000. A caretaker government oversaw new elections in the spring of 2001, which ushered in Alejandro TOLEDO Manrique as the new head of government—Peru's first democratically elected president of Native American ethnicity. The presidential election of 2006 saw the return of Alan GARCIA Perez who, after a disappointing presidential term from 1985 to 1990, has overseen a robust macroeconomic performance.

ECONOMY

Economy—overview: Peru's economy reflects its varied geography—an arid coastal region, the Andes further inland, and tropical lands bordering Colombia and Brazil. Abundant mineral resources are found in the mountainous areas, and Peru's coastal waters provide excellent fishing grounds. The Peruvian economy grew by almost 6% per year during the period 2002-06, with a stable exchange rate and low inflation. Growth jumped to nearly 9% per year in 2007 and 10% in 2008, driven by private investment and government spending, but then fell to less than 1% in 2009 in the face of the world recession, a sharp fall of private investment, and a substantial increase in counter-cyclical government spending. Growth resumed in 2010 at above 8%, due partly to a leap in private investment and continued high government spending. Peru's rapid expansion coupled with the government's conditional cash transfers and other programs have helped to reduce the national poverty rate by over 19 percentage points since 2002, though underemployment remains high. Inflation in 2010 was within the Central Bank's 1%-3% target range. Despite Peru's strong macroeconomic performance, dependence on minerals and metals exports and imported foodstuffs subjects the economy to fluctuations in world prices. Poor infrastructure hinders the spread of growth to Peru's non-coastal areas. A growing number of Peruvians are sharing in the benefits of growth but despite President GARCIA's pursuit of sound trade and macroeconomic policies, inequality persists. Nevertheless, he remains committed to Peru's free-trade path. Since 2006, Peru has signed trade deals with the United States, Canada, Singapore, China, Korea, and Japan, concluded negotiations with the European Free Trade Association (EFTA) and Chile, and begun trade talks with Central American countries and others. The US-Peru Trade Promotion Agreement (PTPA) entered into force 1 February 2009, opening the way to greater trade and investment between the two economies. Rising world prices of foodstuffs and fuel, coupled with strong domestic demand, are immediate concerns for 2011. Peru has continued to attract foreign investment. However, political disputes may impede development of some projects related to natural resource extraction.

TRANSNATIONAL ISSUES

Disputes—international: Chile and Ecuador rejected Peru's November 2005

unilateral legislation to shift the axis of their joint treaty-defined maritime boundaries along the parallels of latitude to equidistance lines which favor Peru; organized illegal narcotics operations in Colombia have penetrated Peru's shared border; Peru rejects Bolivia's claim to restore maritime access through a sovereign corridor through Chile along the Peruvian border

Refugees and internally displaced persons:

IDPs: 60,000-150,000 (civil war from 1980-2000; most IDPs are indigenous peasants in Andean and Amazonian regions) (2007)

Illicit drugs: until 1996 the world's largest coca leaf producer, Peru is now the world's second largest producer of coca leaf, though it lags far behind Colombia; cultivation of coca in Peru declined to 36,000 hectares in 2007; second largest producer of cocaine, estimated at 210 metric tons of potential pure cocaine in 2007; finished cocaine is shipped out from Pacific ports to the international drug market; increasing amounts of base and finished cocaine, however, are being moved to Brazil, Chile, Argentina, and Bolivia for use in the Southern Cone or transshipment to Europe and Africa; increasing domestic drug consumption

PHILIPPINES

INTRODUCTION

Background: The Philippine Islands became a Spanish colony during the 16th century; they were ceded to the US in 1898 following the Spanish-American

War. In 1935 the Philippines became a self-governing commonwealth. Manuel QUEZON was elected president and was tasked with preparing the country for independence after a 10-year transition. In 1942 the islands fell under Japanese occupation during World War II, and US forces and Filipinos fought together during 1944-45 to regain control. On 4 July 1946 the Republic of the Philippines attained its independence. A 20-year rule by Ferdinand MARCOS ended in 1986, when a "people power" movement in Manila ("EDSA 1") forced him into exile and installed Corazon AQUINO as president. Her presidency was hampered by several coup attempts that prevented a return to full political stability and economic development. Fidel RAMOS was elected president in 1992. His administration was marked by increased stability and by progress on economic reforms. In 1992, the US closed its last military bases on the islands. Joseph ESTRADA was elected president in 1998. He was succeeded by his vice-president, Gloria MACAPAGAL-ARROYO, in January 2001 after ESTRADA's stormy impeachment trial on corruption charges broke down and another "people power" movement ("EDSA 2") demanded his resignation. MACAPAGAL-ARROYO was elected to a six-year term as president in May 2004. Her presidency was marred by several corruption allegations but the Philippine economy was one of the few to avoid contraction following the 2008 global financial crisis, expanding each year of her administration. Benigno AQUINO III was elected to a six-year term as president in May 2010. The Philippine Government faces threats from several groups on the US

Government's Foreign Terrorist Organization list. Manila has waged a decades-long struggle against ethnic Moro insurgencies in the southern Philippines, which has led to a peace accord with the Moro National Liberation Front and on-again/off-again peace talks with the Moro Islamic Liberation Front. The decades-long Maoist-inspired New People's Army insurgency also operates through much of the country.

GEOGRAPHY

Location: Southeastern Asia, archipelago between the Philippine Sea and the South China Sea, east of Vietnam

Geographic coordinates: 13°00'N, 122°00'E

Map references: Southeast Asia

Area: total: 300,000 sq km

country comparison to the world: 72

land: 298,170 sq km

water: 1,830 sq km

Area—comparative: slightly larger than Arizona

Land boundaries: 0 km

Coastline: 36,289 km

Maritime claims: territorial sea: irregular polygon extending up to 100 nm from coastline as defined by 1898 treaty; since late 1970s has also claimed polygonal-shaped area in South China Sea up to 285 nm in breadth

exclusive economic zone: 200 nm

continental shelf: to depth of exploitation

Climate: tropical marine; northeast monsoon (November to April); southwest monsoon (May to October)

Terrain: mostly mountains with narrow to extensive coastal lowlands

Elevation extremes:

lowest point: Philippine Sea 0 m

highest point: Mount Apo 2,954 m

Natural resources: timber, petroleum, nickel, cobalt, silver, gold, salt, copper

Land use: arable land: 19%

permanent crops: 16.67%

other: 64.33% (2005)

Flag description: two equal horizontal bands of blue (top) and red; a white equilateral triangle is based on the hoist side; the center of the triangle displays a yellow sun with eight primary rays; each corner of the triangle contains a small, yellow, five-pointed star; blue stands for peace and justice, red symbolizes courage, the white equal-sided triangle represents equality; the rays recall the first eight provinces that sought independence from Spain, while the stars represent the three major geographical divisions of the country: Luzon, Visayas, and Mindanao; the design of the flag dates to 1897

note: in wartime the flag is flown upside down with the red band at the top

National anthem: *name:* "Lupang Hinirang" (Chosen Land)

lyrics/music: Jose PALMA (revised by Felipe PADILLA de Leon)/Julian FELIPE

note: music adopted 1898, original Spanish lyrics adopted 1899, Filipino (Tagalog) lyrics adopted 1956; although the original lyrics were written in Spanish, later English and Filipino versions were created; today, only the Filipino version is used

ECONOMY

Economy—overview: Philippine GDP grew 7.3% in 2010, spurred by consumer demand, a rebound in exports and investments, and election-related spending. The economy weathered the 2008-09 global recession better than its regional peers due to minimal exposure to troubled international securities, lower dependence on exports, relatively resilient domestic consumption, large remittances from four to five-million overseas Filipino workers, and a growing business process outsourcing industry. Economic growth in the Philippines averaged 4.5% during the MACAPAGAL-ARROYO administration. Despite this growth, poverty worsened, because of a high population growth rate and inequitable distribution of income. The AQUINO administration is working to reduce the government deficit from

3.9% of GDP, when it took office, to 2% of GDP by 2013. The government has had little difficulty issuing debt both locally and internationally to finance the deficits. AQUINO's first budget emphasizes education, health, conditional cash transfers for the poor, and other social spending programs, relying on the private sector to finance important infrastructure projects. Weak tax collection, exacerbated by new tax breaks and incentives, has limited the government's ability to address major challenges. The AQUINO administration has vowed to focus on improving tax collection efficiency—rather than imposing new taxes—as a part of its good governance platform.

TRANSNATIONAL ISSUES

Disputes—international: Philippines
 claims sovereignty over Scarborough Reef
 (also claimed by China together with
 Taiwan) and over certain of the Spratly
 Islands, known locally as the Kalayaan
 (Freedom) Islands, also claimed by China,
 Malaysia, Taiwan, and Vietnam; the 2002
 "Declaration on the Conduct of Parties in
 the South China Sea," has eased tensions
 in the Spratly Islands but falls short of a
 legally binding "code of conduct" desired
 by several of the disputants; in March 2005,
 the national oil companies of China, the
 Philippines, and Vietnam signed a joint
 accord to conduct marine seismic activities
 in the Spratly Islands; Philippines retains a
 dormant claim to Malaysia's Sabah State in
 northern Borneo based on the Sultanate
 of Sulu's granting the Philippines Govern-
 ment power of attorney to pursue a sover-
 eignty claim on his behalf; maritime delimi-
 tation negotiations continue with Palau
**Refugees and internally displaced
 persons:** IDPs: 300,000 (fighting between
 government troops and MILF and Abu
 Sayyaf groups) (2007)

Illicit drugs: domestic methamphetamine
 production has been a growing problem
 in recent years despite government crack-
 downs; major consumer of amphetamines;
 longstanding marijuana producer mainly
 in rural areas where Manila's control is
 limited

INTRODUCTION

Background: Pitcairn Island was discovered
 in 1767 by the British and settled in
 1790 by the Bounty mutineers and their
 Tahitian companions. Pitcairn was the
 first Pacific island to become a British
 colony (in 1838) and today remains the last
 vestige of that empire in the South Pacific.
 Outmigration, primarily to New Zealand,
 has thinned the population from a peak of
 233 in 1937 to less than 50 today.

ECONOMY

Economy—overview: The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important

part of the economy. The major sources of revenue are the sale of postage stamps to collectors and the sale of handicrafts to passing ships. In October 2004, more than one-quarter of Pitcairn's small labor force was arrested, putting the economy in a bind, since their services were required as lighter crew to load or unload passing ships.

POLAND

INTRODUCTION

Background: Poland is an ancient nation that was conceived near the middle of the 10th century. Its golden age

occurred in the 16th century. During the following century, the strengthening of the gentry and internal disorders weakened the nation. In a series of agree-

ments between 1772 and 1795, Russia, Prussia, and Austria partitioned Poland among themselves. Poland regained its independence

in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite state following the war, but its government was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union "Solidarity" that over time became a political force and by 1990 had swept parliamentary elections and the presidency. A "shock therapy" program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe, but Poland still faces the lingering challenges of high unemployment, underdeveloped and dilapidated infrastructure, and a poor rural underclass. Poland joined NATO in 1999 and the European Union in 2004. With its transformation to a democratic, market-oriented country largely completed, Poland is an increasingly active member of Euro-Atlantic organizations.

Natural hazards: flooding

Environment—current issues: situation has improved since 1989 due to decline in heavy industry and increased environmental concern by post-Communist governments; air pollution nonetheless remains serious because of sulfur dioxide emissions from coal-fired power plants, and the resulting acid rain has caused forest damage; water pollution from industrial and municipal sources is also a problem, as is disposal of hazardous wastes; pollution levels should continue to decrease as industrial establishments bring their facilities up to EU code, but at substantial cost to business and the government

Environment—international agreements: *party to:* Air Pollution, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Kyoto Protocol, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands

signed, but not ratified: Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulfur 94
Geography—note: historically, an area of conflict because of flat terrain and the lack of natural barriers on the North European Plain

Flag description: two equal horizontal bands of white (top) and red; colors derive from the Polish emblem—a white eagle on a red field

note: similar to the flags of Indonesia and Monaco which are red (top) and white

National anthem: name: "Mazurek Dabrowskiego" (Dabrowski's Mazurka)

lyrics/music: Jozef WYBICKI/traditional

note: adopted 1927; the anthem, commonly known as "Jeszcze Polska nie zginela" (Poland Has Not Yet Perished), was written in 1797; the lyrics resonate strongly with Poles because they reflect the numerous occasions in which the nation's lands have been occupied

ECONOMY

Economy—overview: Poland has pursued a policy of economic liberalization since 1990 and today stands out as a success story among transition economies. It is the only country in the European Union to maintain positive GDP growth through the 2008-2009 economic downturn. GDP per capita is still much below the EU average, but is similar to that of the three Baltic states. Since 2004, EU membership and access to EU structural funds have provided a major boost to the economy. Unemployment fell rapidly to 6.4% in October 2008, but climbed back to 11.8% for the year 2010, exceeding the EU average by more than 2%. Inflation reached a low of about 2.6% in 2010 due to the global economic slowdown but has since climbed and is expected to remain around 3%, and close to the upper limit of the National Bank of Poland's target rate. Poland's economic performance could improve over the longer term if the country addresses some of the remaining deficiencies in its road and rail infrastructure and its business environment. An inefficient commercial court system, a rigid labor code, bureaucratic red tape, burdensome tax system, and persistent

low-level corruption keep the private sector from performing up to its full potential. Rising demands to fund health care, education, and the state pension system caused the public sector budget deficit to rise to 7.9% of GDP in 2010. The PO/PSL coalition government, which came to power in November 2007, has planned to reduce the budget deficit in 2011 and has also announced its intention to enact business-friendly reforms, increase workforce participation, reduce public sector spending growth, lower taxes, and accelerate privatization. The government has moved slowly on most major reforms, but has sped up privatization.

TRANSNATIONAL ISSUES

Disputes—international: as a member state that forms part of the EU's external border, Poland has implemented the strict Schengen* border rules to restrict illegal immigration and trade along its eastern borders with Belarus and Ukraine

Illicit drugs: despite diligent counternarcotics measures and international information sharing on cross-border crimes, a major illicit producer of synthetic drugs for the international market; minor transshipment point for Southwest Asian heroin and Latin American cocaine to Western Europe

PORTUGAL

INTRODUCTION

Background: Following its heyday as a global maritime power during the 15th and 16th centuries, Portugal lost much of its wealth and status with the destruction of Lisbon in a 1755 earthquake, occupation during the Napoleonic Wars, and the independence of its wealthiest colony of Brazil in 1822. A 1910 revolution deposed the monarchy; for most of the next six decades, repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year, Portugal granted independence to all of its African colonies. Portugal is a founding member of NATO and entered the EC (now the EU) in 1986. In January 2011, Portugal assumed a nonpermanent seat on the UN Security Council for the 2011-12 term.

consulate(s): Ponta Delgada (Azores)

Flag description: two vertical bands of green (hoist side, two-fifths) and red (three-fifths) with the national coat of arms (armillary sphere and Portuguese shield) centered on the dividing line; explanations for the color meanings are ambiguous, but a popular interpretation has green symbolizing hope and red the blood of those defending the nation

National anthem: name: "A Portuguesa" (The Song of the Portuguese)

lyrics/music: Henrique LOPES DE MENDOÇA/Alfredo KEIL

note: adopted 1910; "A Portuguesa" was originally written to protest the Portuguese monarchy's acquiescence to the 1890 British ultimatum forcing Portugal to give up areas of Africa; the lyrics refer to the "insult" that resulted from the event

ECONOMY

Economy—overview: Portugal has become a diversified and increasingly service-based economy since joining the European Community—the EU's predecessor—in 1986. Over the past two decades, successive governments have privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country qualified for the Economic and Monetary Union (EMU) in 1998 and

began circulating the euro on 1 January 2002 along with 11 other EU members. The economy had grown by more than the EU average for much of the 1990s, but fell back in 2001-08, and contracted 2.6% in 2009, before growing 1% in 2010. GDP per capita stands at roughly two-thirds of the EU-27 average. A poor educational system and a rigid labor market have been obstacles to greater productivity and growth. Portugal also has been increasingly overshadowed by lower-cost producers in Central Europe and Asia as a destination for foreign direct investment. Portugal's low competitiveness, low growth prospects, and high levels of public debt have made it vulnerable to bond market turbulence. The government is implementing austerity measures, including a 5% public salary cut which went into effect on January 1, 2011 and a 2% increase in the value-added tax, to reduce the budget deficit from 9.3% of GDP in 2009 to 4.6% in 2011, but some investors have expressed concern about the government's ability to achieve these targets and cover its sovereign debt. Without the option for stimulus measures, the government is focusing instead on boosting exports and implementing labor market reforms to try to raise GDP growth and increase Portugal's competitiveness—which, over time, may help mitigate investor concerns.

PUERTO RICO

(TERRITORY OF THE US WITH COMMONWEALTH STATUS)

INTRODUCTION

Background: Populated for centuries by aboriginal peoples, the island was claimed by the Spanish Crown in 1493 following

COLUMBUS' second voyage to the Americas. In 1898, after 400 years of colonial rule that saw the indigenous population nearly exterminated and African slave

labor introduced, Puerto Rico was ceded to the US as a result of the Spanish-American War. Puerto Ricans were granted US citizenship in 1917. Popularly-elected

governors have served since 1948. In 1952, a constitution was enacted providing for internal self government. In plebiscites held in 1967, 1993, and 1998, voters chose not to alter the existing political status.

note: design initially influenced by the US flag, but similar to the Cuban flag, with the colors of the bands and triangle reversed

National anthem: name: "La Borinquena" (The Puerto Rican)

lyrics/music: Manuel Fernandez JUNCOS/Felix Astol ATERES

note: music adopted 1952, lyrics adopted 1977; the local anthem's name is a reference to the indigenous name of the island, Borinquen; the music was originally composed as a dance in 1867 and gained popularity in the early 20th century; there is some evidence that the music was written by Francisco RAMIREZ; as a commonwealth of the United States, "The Star-Spangled Banner" is official (see United States)

ECONOMY

Economy—overview: Puerto Rico has one of the most dynamic economies in the Caribbean region. A diverse industrial sector has far surpassed agriculture as the primary locus of economic activity and income. Encouraged by duty-free access to the US and by tax incentives, US firms have invested heavily in Puerto Rico since the 1950s. US minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income with estimated arrivals of more than 3.6 million tourists in 2008.

QATAR

INTRODUCTION

Background: Ruled by the Al Thani family since the mid-1800s, Qatar transformed itself from a poor British protectorate noted mainly for pearling into an independent state with significant oil and natural gas revenues. During the late 1980s and early 1990s, the Qatari economy was crippled by a continuous siphoning off of petroleum revenues by the Amir, who had ruled the country since 1972. His son, the current Amir HAMAD bin Khalifa Al Thani, overthrew him in a bloodless coup in 1995. In 2001, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia. As of 2007, oil and natural gas revenues had enabled Qatar to attain the second-highest per capita income in the world.

Flag description: maroon with a broad white serrated band (nine white points) on the hoist side; maroon represents the blood shed in Qatari wars, white stands for peace; the nine-pointed serrated edge signifies Qatar as the ninth member of the "reconciled emirates" in the wake of the Qatari-British treaty of 1916

note: the other eight emirates are the seven that compose the UAE and Bahrain; according to some sources, the dominant color was formerly red, but this darkened to maroon upon exposure to the sun and the new shade was eventually adopted

National anthem: *name:* "Al-Salam Al-Amiri" (The Peace for the Anthem)

lyrics/music: Sheikh MUBARAK bin Saif al-Thani/Abdul Aziz Nasser OBAIDAN

note: adopted 1996; the anthem was first performed that year at a meeting of the Gulf Cooperative Council hosted by Qatar

ECONOMY

Economy—overview: Despite the global financial crisis, Qatar has prospered in the last several years—in 2010 Qatar had the world's highest growth rate. Qatari authorities throughout the crisis sought to protect the local banking sector with direct investments into domestic banks. GDP rebounded in 2010 largely due to the increase in oil prices. Economic policy is focused on developing Qatar's nonassociated natural gas reserves and increasing private and foreign investment in non-energy sectors, but oil and gas still account for more than 50% of GDP, roughly 85% of export earnings, and 70% of government revenues. Oil and gas likely have made Qatar the highest per-capita income country—ahead of Liechtenstein—and the country with the lowest unemployment. Proved oil reserves of 25 billion barrels should enable continued output at current levels for 57 years. Qatar's proved reserves of natural gas exceed 25 trillion cubic meters, about 14% of the world total and third largest in the world. Qatar's successful 2022 world cup bid will likely accelerate large-scale infrastructure projects such as Qatar's metro system and the Qatar-Bahrain causeway.

TRANSNATIONAL ISSUES

Disputes—international: none

Trafficking in persons: current situation: Qatar is a destination country for men and women from South and Southeast Asia who migrate willingly, but are subsequently trafficked into involuntary servitude as domestic workers and laborers, and, to a lesser extent, commercial sexual exploitation; the most common offense was forcing workers to accept worse contract terms than those under which they were recruited; other conditions include bonded labor, withholding of pay, restrictions on movement, arbitrary detention, and physical, mental, and sexual abuse tier rating: Tier 2 Watch List—the Government of Qatar does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in February 2009, Qatar enacted a new migrant worker sponsorship law that criminalizes some practices commonly used by trafficking offenders, and it announced plans to use that law effectively to prevent human trafficking; punishment for offenses related to trafficking in persons remains lower than that for crimes such as rape and kidnapping, and the Qatari government has yet to take significant action to investigate, prosecute, and punish trafficking offenses; the government continues to lack formal victim identification procedures and, as a result, victims of trafficking are likely punished for acts committed as a direct result of being trafficked (2009)

INTRODUCTION

Background: The principalities of Wallachia and Moldavia—for centuries under the suzerainty of the Turkish Ottoman Empire—secured their autonomy in 1856; they were de facto linked in 1859 and formally united in 1862 under the new name of Romania. The country gained recognition of its independence in 1878. It joined the Allied Powers in World War I and acquired new territories—most notably Transylvania—following the conflict. In 1940, Romania allied with the Axis powers and participated in the 1941 German invasion of the USSR. Three years later, overrun by the Soviets, Romania signed an armistice. The post-war Soviet occupation led to the formation of a Communist “people’s republic” in 1947 and the abdication of the king. The decades-long rule of dictator Nicolae CEAUSESCU, who took power in 1965, and his Securitate police state became increasingly oppressive and draconian through the 1980s. CEAUSESCU was overthrown and executed in late 1989. Former Communists dominated the government until 1996 when they were swept from power. Romania joined NATO in 2004 and the EU in 2007.

ECONOMY

Economy—overview: Romania, which joined the European Union on 1 January 2007, began the transition from Communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country's needs. The country emerged in 2000 from a punishing three-year recession thanks to strong demand in EU export markets. Domestic consumption and investment have fueled strong GDP growth in recent years, but have led to large current account imbalances. Romania's macroeconomic gains have only recently started to spur creation of a middle class and address Romania's widespread poverty. Corruption and red tape continue to handicap its business environment. Inflation rose in 2007-08, driven in part by strong consumer demand and high wage growth, rising energy costs, a nationwide drought affecting food prices, and a relaxation of fiscal discipline. Romania's GDP contracted markedly in the last quarter of 2008 as the country began to feel the effects of a global downturn in financial markets and trade, and GDP fell more than 7% in 2009, prompting Bucharest to seek a \$26 billion emergency assistance package from the IMF, the EU, and other international lenders. Drastic austerity measures, as part of Romania's IMF-led agreement led to a further 1.9% GDP contraction in 2010. The economy is expected to return to positive growth in 2011.

TRANSNATIONAL ISSUES

Disputes—international: the ICJ gave Ukraine until December 2006 to reply, and Romania until June 2007 to issue a rejoinder, in their dispute submitted in 2004 over Ukrainian-administered Zmiynyy/Serpilor (Snake) Island and Black Sea maritime boundary delimitation; Romania also opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Illicit drugs: major transshipment point for Southwest Asian heroin transiting the Balkan route and small amounts of Latin American cocaine bound for Western Europe; although not a significant financial center, role as a narcotics conduit leaves it vulnerable to laundering, which occurs via the banking system, currency exchange houses, and casinos

RUSSIA

INTRODUCTION

Background: Founded in the 12th century, the Principality of Muscovy, was able to emerge from over 200 years of Mongol domination (13th-15th centuries) and to gradually conquer and absorb surrounding principalities. In the early 17th century, a new Romanov Dynasty continued this policy of expansion across Siberia to the Pacific. Under PETER I (ruled 1682-1725), hegemony was extended to the Baltic Sea and the country was renamed the Russian Empire. During the 19th century, more territorial acquisitions were made in Europe and Asia. Defeat in the Russo-Japanese War of 1904-05 contributed to the Revolution of 1905, which resulted in the formation of a parliament and other reforms. Repeated devastating defeats of the Russian army in World War I led to widespread rioting in the major cities of the Russian Empire and to the overthrow in 1917 of the imperial household. The Communists under Vladimir LENIN seized power soon after and formed the USSR. The brutal rule of Iosif STALIN (1928-53) strengthened Communist rule and Russian dominance of the Soviet Union at a cost of tens of millions of

lives. The Soviet economy and society stagnated in the following decades until General Secretary Mikhail GORBACHEV (1985-91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize Communism, but his initiatives inadvertently released forces that by December 1991 splintered the USSR into Russia and 14 other independent republics. Since then, Russia has shifted its post-Soviet democratic ambitions in favor of a centralized semi-authoritarian state whose legitimacy is buttressed, in part, by carefully managed national elections, former President PUTIN's genuine popularity, and the prudent management of Russia's windfall energy wealth. Russia has severely disabled a Chechen rebel movement, although violence still occurs throughout the North Caucasus.

Natural resources: wide natural resource base including major deposits of oil, natural gas, coal, and many strategic minerals, reserves of rare earth elements, timber

note: formidable obstacles of climate, terrain, and distance hinder exploitation of natural resources

Land use: arable land: 7.17%

permanent crops: 0.11%

other: 92.72% (2005)

Irrigated land: 46,000 sq km (2003)

Total renewable water resources: 4,498 cu km (1997)

Freshwater withdrawal (domestic/industrial/agricultural): total: 76.68 cu km/yr (1996/63%/18%)

per capita: 535 cu m/yr (2000)

Natural hazards: permafrost over much of Siberia is a major impediment to development; volcanic activity in the Kuril Islands; volcanoes and earthquakes on the Kamchatka Peninsula; spring floods and summer/autumn forest fires throughout Siberia and parts of European Russia

volcanism: Russia experiences significant volcanic activity on the Kamchatka Peninsula and Kuril Islands; the peninsula alone is home to some 29 historically active volcanoes, with dozens more in the Kuril Islands; Kliuchevskoi (elev. 4,835 m), which erupted in 2007 and 2010, is Kamchatka's most active volcano; Avachinsky and Koryaksky volcanoes, which pose a threat to the city of Petropavlovsk-Kamchatskiy, have been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; other notable historically active volcanoes include Bezmianny, Chikurachki, Ebeko, Gorely, Grozny, Karymsky, Ketoi, Kronotsky, Ksudak, Medvezhia, Mutnovsky, Sarychev Peak, Shiveluch, Tiatia, Tolbachik, and Zheltovsky

Environment—current issues: air pollution from heavy industry, emissions of coal-fired electric plants, and transportation in major cities; industrial, municipal, and agricultural pollution of inland waterways and seacoasts; deforestation; soil erosion; soil contamination from improper application of agricultural chemicals; scattered areas of sometimes intense radioactive contamination; groundwater contamination from toxic waste; urban solid waste management; abandoned stocks of obsolete pesticides

Environment—international agreements: *party to:* Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulfur 85, Antarctic Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Wetlands, Whaling
signed, but not ratified: Air Pollution-Sulfur 94

Geography—note: largest country in the world in terms of area but unfavorably located in relation to major sea lanes of the world; despite its size, much of the country lacks proper soils and climates (either too cold or too dry) for agriculture; Mount El'brus is Europe's tallest peak

Flag description: three equal horizontal bands of white (top), blue, and red

note: the colors may have been based on those of the Dutch flag; despite many popular interpretations, there is no official meaning assigned to the colors of the Russian flag; this flag inspired other Slav countries to adopt horizontal tricolors of the same colors but in different arrangements, and so red, blue, and white became the Pan-Slav colors

National anthem: *name:* "Gimn Rossiyskoy Federatsii" (National Anthem of the Russian Federation)

lyrics/music: Sergei Vladimirovich MIKHAILOV/Alexandr Vasilievich ALEXANDROV

note: in 2000, Russia adopted the tune of the anthem of the former Soviet Union (composed in 1939); the lyrics, also adopted in 2000, were written by the same person who authored the Soviet lyrics in 1943

ECONOMY

Economy—overview: Russia has undergone significant changes since the

collapse of the Soviet Union, moving from a globally-isolated, centrally-planned economy to a more market-based and globally-integrated economy. Economic reforms in the 1990s privatized most industry, with notable exceptions in the energy and defense-related sectors. The protection of property rights is still weak and the private sector remains subject to heavy state interference. Russian industry is primarily split between globally-competitive commodity producers—in 2009 Russia was the world's largest exporter of natural gas, the second largest exporter of oil, and the third largest exporter of steel and primary aluminum—and other less competitive heavy industries that remain dependent on the Russian domestic market. This reliance on commodity exports makes Russia vulnerable to boom and bust cycles that follow the highly volatile swings in global commodity prices. The government since 2007 has embarked on an ambitious program to reduce this dependency and build up the country's high technology sectors, but with few results so far. The economy had averaged 7% growth since the 1998 Russian financial crisis, resulting in a doubling of real disposable incomes and the emergence of a middle class. The Russian economy, however, was one of the hardest hit by the 2008-09 global economic crisis as oil prices plummeted and the foreign credits that Russian banks and firms relied on dried up. The Central Bank of Russia spent one-third of its \$600 billion international reserves, the world's third largest, in late 2008 to slow the devaluation of the ruble. The government also devoted \$200 billion in a rescue plan to increase liquidity in the banking sector and aid Russian firms unable to roll over large foreign debts coming due. The economic decline bottomed out in mid-2009 and the economy began to grow in the first quarter of 2010. However, a severe drought and fires in central Russia reduced agricultural output, prompting a ban on grain exports for part of the year, and slowed growth in other sectors such as manufacturing and retail trade. High oil prices buoyed Russian growth in the first quarter of 2011 and could help Russia reduce the budget deficit inherited from the lean years of 2008-09, but inflation and increased government expenditures may limit the positive impact of these revenues. Russia's long-term challenges include a shrinking workforce, a high level of corruption, difficulty in accessing capital for smaller, non-energy companies, and poor infrastructure in need of large investments.

Telephones—main lines in use: 44.802 million (2009)

country comparison to the world: 4

Telephones—mobile cellular: 230.5 million (2009)

country comparison to the world: 4

Telephone system: *general assessment:* the telephone system is experiencing significant changes; there are more than 1,000 companies licensed to offer communication services; access to digital lines has improved, particularly in urban centers; Internet and e-mail services are improving; Russia has made progress toward building the telecommunications infrastructure necessary for a market economy; the estimated number of mobile subscribers jumped from fewer than 1 million in 1998 to some 230 million in 2009; a large demand for fixed line service remains unsatisfied

domestic: cross-country digital trunk lines run from Saint Petersburg to Khabarovsk, and from Moscow to Novorossiysk; the telephone systems in 60 regional capitals have modern digital infrastructures; cellular services, both analog and digital, are available in many areas; in rural areas, the telephone services are still outdated, inadequate, and low density

international: country code—7; Russia is connected internationally by undersea fiber optic cables; digital switches in several cities provide more than 50,000 lines for international calls; satellite earth stations provide access to Intelsat, Intersputnik, Eutelsat, Inmarsat, and Orbita systems (2008)

Broadcast media: 6 national TV stations with the federal government owning 1 and holding a controlling interest in a second; state-owned Gazprom maintains a controlling interest in a third national channel; government-affiliated Bank Rossiya owns controlling interest in a fourth and fifth, while the sixth national channel is owned by the Moscow city administration;

roughly 3,300 national, regional, and local TV stations operating with over two-thirds completely or partially controlled by the federal or local governments; satellite TV services are available; 2 state-run national radio networks with a third majority-owned by Gazprom; roughly 2,400 public and commercial radio stations (2007)

Internet country code: .ru; note—Russia also has responsibility for a legacy domain “.su” that was allocated to the Soviet Union and is being phased out

Internet hosts: 10.382 million (2010)

TRANSNATIONAL ISSUES

Disputes—international: Russia remains concerned about the smuggling of poppy derivatives from Afghanistan through Central Asian countries; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with the 2004 Agreement, ending their centuries-long border disputes; the sovereignty dispute over the islands of Etorofu, Kunashiri, Shikotan, and the Habomai group, known in Japan as the “Northern Territories” and in Russia as the “Southern Kurils,” occupied by the Soviet Union in 1945, now administered by Russia, and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Russia’s military support and subsequent recognition of Abkhazia and South Ossetia independence in 2008 continue to sour relations with Georgia; Azerbaijan, Kazakhstan, and Russia ratified Caspian seabed delimitation trea-

ties based on equidistance, while Iran continues to insist on a one-fifth slice of the lake; Norway and Russia signed a comprehensive maritime boundary agreement in 2010; various groups in Finland advocate restoration of Karelia (Kareliya) and other areas ceded to the Soviet Union following the Second World War but the Finnish Government asserts no territorial demands; in May 2005, Russia recalled its signatures to the 1996 border agreements with Estonia (1996) and Latvia (1997), when the two Baltic states announced issuance of unilateral declarations referencing Soviet occupation and ensuing territorial losses; Russia demands better treatment of ethnic Russians in Estonia and Latvia; Estonian citizen groups continue to press for realignment of the boundary based on the 1920 Tartu Peace Treaty that would bring the now divided ethnic Setu people and parts of the Narva region within Estonia; Lithuania and Russia committed to demarcating their boundary in 2006 in accordance with the land and maritime treaty ratified by Russia in May 2003 and by Lithuania in 1999; Lithuania operates a simplified transit regime for Russian nationals traveling from the Kaliningrad coastal exclave into Russia, while still conforming, as an EU member state with an EU external border, where strict Schengen border rules apply; preparations for the demarcation delimi-

tation of land boundary with Ukraine have commenced; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov remains unresolved despite a December 2003 framework agreement and on-going expert-level discussions; Kazakhstan and Russia boundary delimitation was ratified on November 2005 and field demarcation should commence in 2007; Russian Duma has not yet ratified 1990 Bering Sea Maritime Boundary Agreement with the US; Denmark (Greenland) and Norway have made submissions to the Commission on the Limits of the Continental shelf (CLCS) and Russia is collecting additional data to augment its 2001 CLCS submission

Refugees and internally displaced persons: IDPs: 18,000-160,000 (displacement from Chechnya and North Ossetia) (2007)

Trafficking in persons: current situation: Russia is a source, transit, and destination country for men, women, and children trafficked for various purposes; it remains a significant source of women trafficked to over 50 countries for commercial sexual exploitation; Russia is also a transit and destination country for men and women trafficked from Central Asia, Eastern Europe, and North Korea to Central and Western Europe and the Middle East for purposes of forced

labor and sexual exploitation; internal trafficking remains a problem in Russia with women trafficked from rural areas to urban centers for commercial sexual exploitation, and men trafficked internally and from Central Asia for forced labor in the construction and agricultural industries; debt bondage is common among trafficking victims, and child sex tourism remains a concern

tier rating: Tier 2 Watch List—Russia is on the Tier 2 Watch List for a fifth consecutive year for its failure to show evidence of increasing efforts to combat trafficking over the previous year, particularly in providing assistance to victims of trafficking; comprehensive trafficking victim assistance legislation, which would address key deficiencies, has been pending before the Duma since 2003 and was neither passed nor enacted in 2007 (2008)

Illicit drugs: limited cultivation of illicit cannabis and opium poppy and producer of methamphetamine, mostly for domestic consumption; government has active illicit crop eradication program; used as transshipment point for Asian opiates, cannabis, and Latin American cocaine bound for growing domestic markets, to a lesser extent Western and Central Europe, and occasionally to the US; major source of heroin precursor chemicals; corruption and organized crime are key concerns; major consumer of opiates

RWANDA

INTRODUCTION

Background: In 1959, three years before independence from Belgium, the majority ethnic group, the Hutus, overthrew the ruling Tutsi king. Over the next several years, thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF), and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions, culminating in April 1994 in a state-orchestrated genocide, in which Rwandans killed up to a million of their fellow

citizens, including approximately three-quarters of the Tutsi population. The genocide ended later that same year when the predominantly Tutsi RPF, operating out of Uganda and northern Rwanda, defeated the national army and Hutu militias, and established an RPF-led government of national unity. Approximately 2 million Hutu refugees—many fearing Tutsi retribution—fled to neighboring Burundi, Tanzania, Uganda, and Zaire. Since then, most of the refugees have returned to Rwanda, but several thousand remained in the neighboring Democratic Republic of the Congo (DRC; the former Zaire) and formed an extremist insurgency bent on retaking Rwanda, much as the RPF tried in 1990. Rwanda held its first local elections in 1999 and its first post-genocide presidential and legislative elections in 2003. Rwanda in 2009 staged a joint military operation with the Congolese Army in DRC to rout out the Hutu extremist insurgency there and Kigali and Kinshasa restored diplomatic relations. Rwanda also joined the Commonwealth in late 2009.

ECONOMY

Economy—overview: Rwanda is a poor rural country with about 90% of the population engaged in (mainly subsistence) agriculture and some mineral and agro-processing. Tourism is now Rwanda's primary foreign exchange earner and in 2008, minerals overtook coffee and tea as Rwanda's primary export. Minerals exports declined 40% in 2009-10 due to the global economic downturn. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and temporarily stalled the country's ability to attract private and external investment. However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy to pre-1994 levels. GDP has rebounded with an average annual growth of 7-8% since 2003 and inflation has been reduced to single digits. Nonetheless,

a significant percent of the population still live below the official poverty line. Despite Rwanda's fertile ecosystem, food production often does not keep pace with demand, requiring food imports. Agricultural production has increased significantly over the last three years and last year Rwanda was self sufficient in food production. Rwanda continues to receive substantial aid money and obtained IMF-World Bank Heavily Indebted Poor Country (HIPC) initiative debt relief in 2005-06. In recognition of Rwanda's successful management of its macro economy, in 2010, the IMF graduated Rwanda to a Policy Support Instrument (PSI). Rwanda also received a Millennium Challenge Threshold Program in 2008. Africa's most densely populated country is trying to overcome the limitations of its small, landlocked economy by leveraging regional trade. Rwanda joined the East African Community and is aligning its budget, trade, and immigration policies with its regional partners. The government has embraced an expansionary fiscal policy to reduce poverty by improving education, infrastructure, and foreign and domestic investment and pursuing market-oriented reforms. Energy shortages, instability in neighboring states, and lack of adequate transportation linkages to other countries continue to handicap private sector growth. The Rwandan government is seeking to become regional leader in information and communication technologies. In 2010, Rwanda neared completion of the first modern Special Economic Zone (SEZ) in Kigali. The SEZ seeks to attract investment in all sectors, but specifically in agribusiness, information and communications technologies, trade and logistics, mining, and construction. The global downturn hurt export demand and tourism, but economic growth is recovering, driven in large part by the services sector, and inflation has been contained. On the back of this growth, government is gradually ending its fiscal stimulus policy while protecting aid to the poor.

TRANSNATIONAL ISSUES

Disputes—international: Burundi and Rwanda dispute two sq km (0.8 sq mi) of Sabanerwa, a farmed area in the Rukuzi Valley where the Akanyaru/Kanyaru River shifted its course southward after heavy rains in 1965; fighting among ethnic groups—loosely associated political rebels, armed gangs, and various government forces in Great Lakes region transcending the boundaries of Burundi, Democratic Republic of the Congo, Rwanda, and Uganda—abated substantially from a decade ago due largely to UN peacekeeping, international mediation, and efforts by local governments to create civil societies; nonetheless, 57,000 Rwandan refugees still reside in 21 African states, including Zambia, Gabon, and 20,000 who fled to Burundi in 2005 and 2006 to escape drought and recriminations from traditional courts investigating the 1994 massacres; the 2005 DROC and Rwanda border verification mechanism to stem rebel actions on both sides of the border remains in place

Refugees and internally displaced persons: refugees (country of origin): 46,272 (Democratic Republic of the Congo); 4,400 (Burundi) (2007)

SAINT BARTHELEMY

(OVERSEAS COLLECTIVITY OF FRANCE)

INTRODUCTION

Background: Discovered in 1493 by Christopher COLUMBUS who named it for his brother Bartolomeo, Saint Barthelemy was first settled by the French in 1648. In 1784, the French sold the island to Sweden, who renamed the largest town Gustavia, after the Swedish King GUSTAV III, and made it a free port; the island prospered as a trade and supply center during the colonial wars of the 18th century. France repurchased the island in 1878 and placed it under the administration of Guadeloupe. Saint Barthelemy retained its free port status along with various Swedish appellations such as Swedish street and town names, and the three-crown symbol on the coat of arms. In 2003, the populace of the island voted to secede from Guadeloupe and in 2007, the island became a French overseas collectivity.
